When printing the following posters in-house, set your printer settings to the “fit to page” option for accurate sizing and resolution.

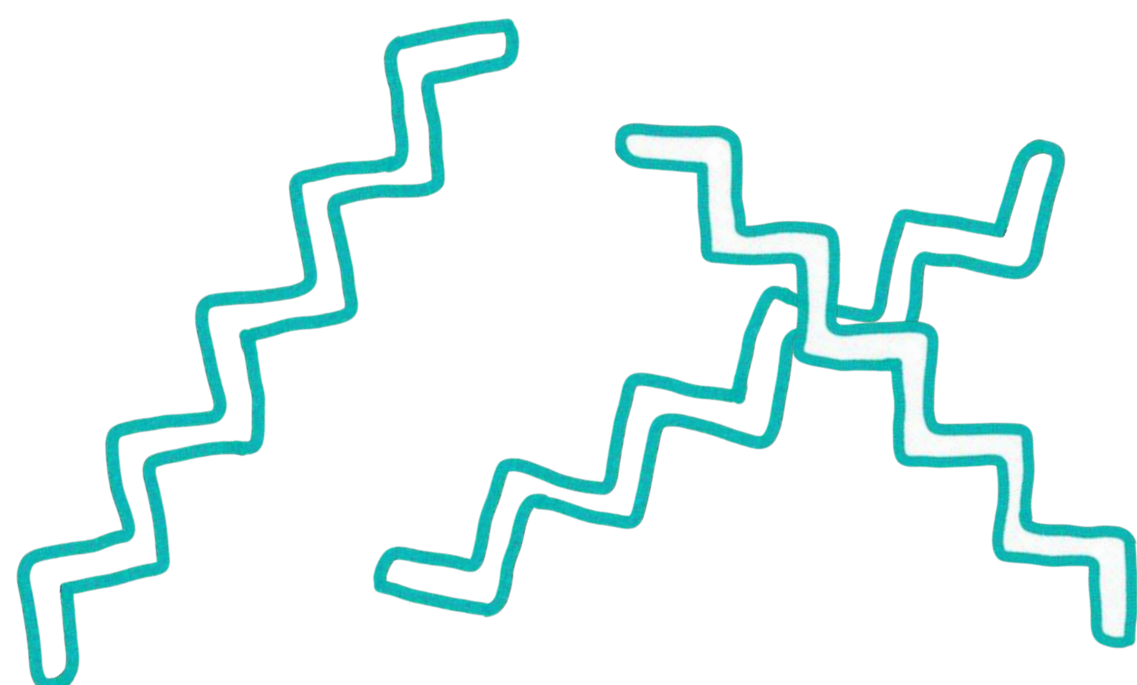

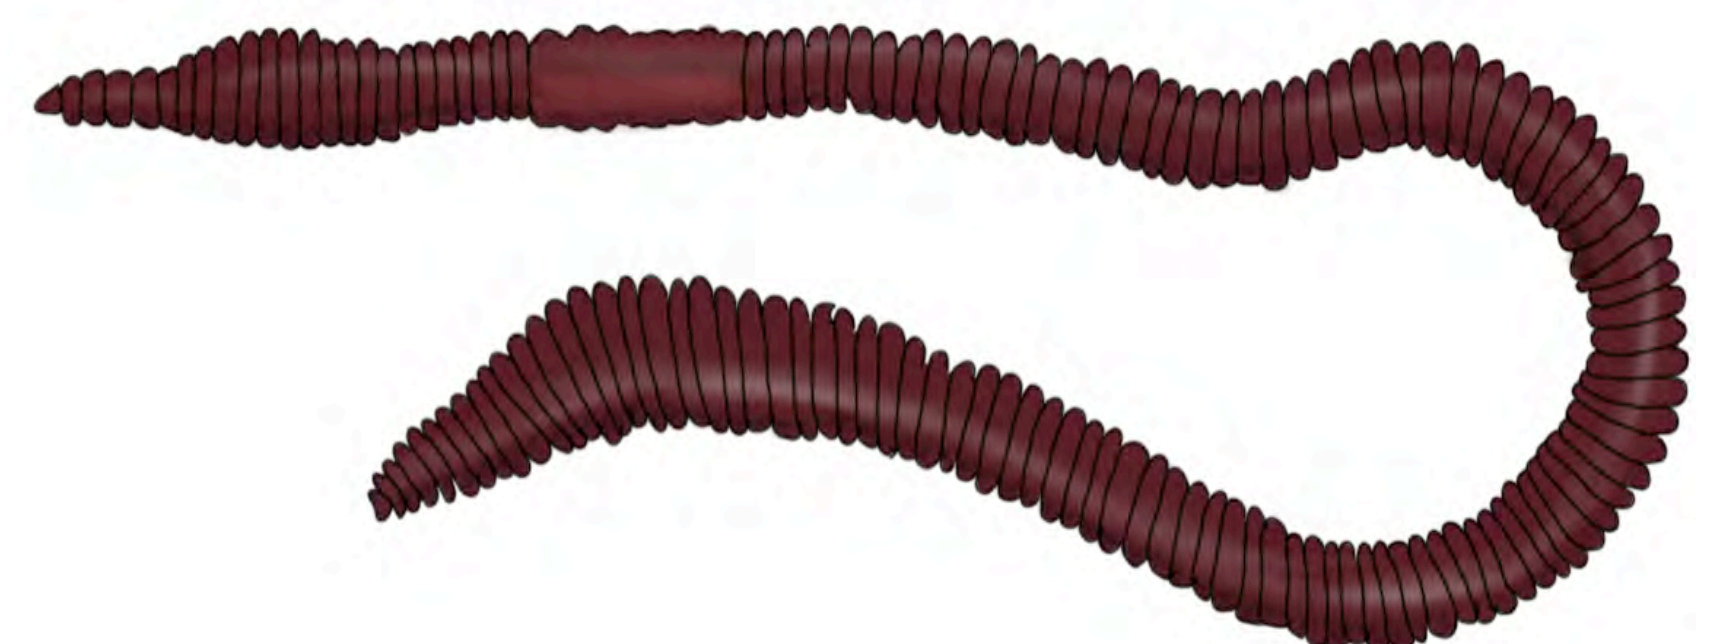

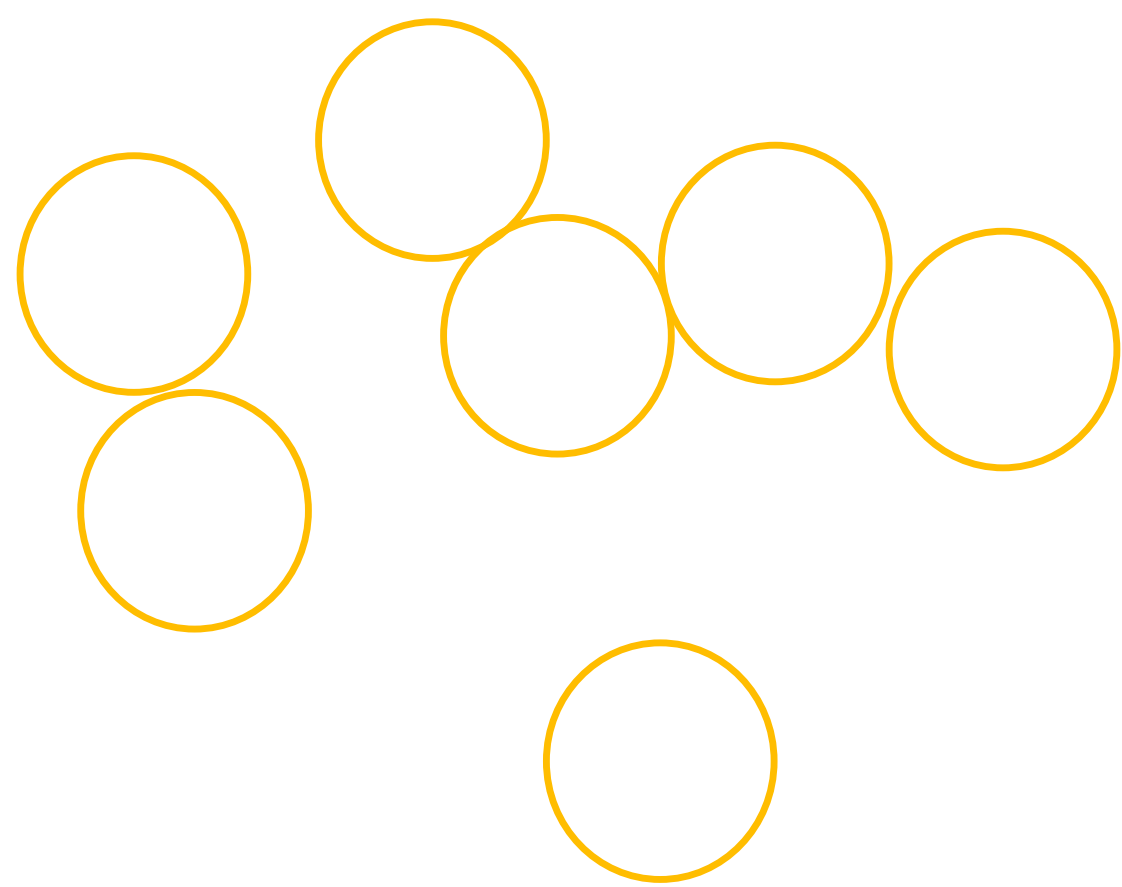

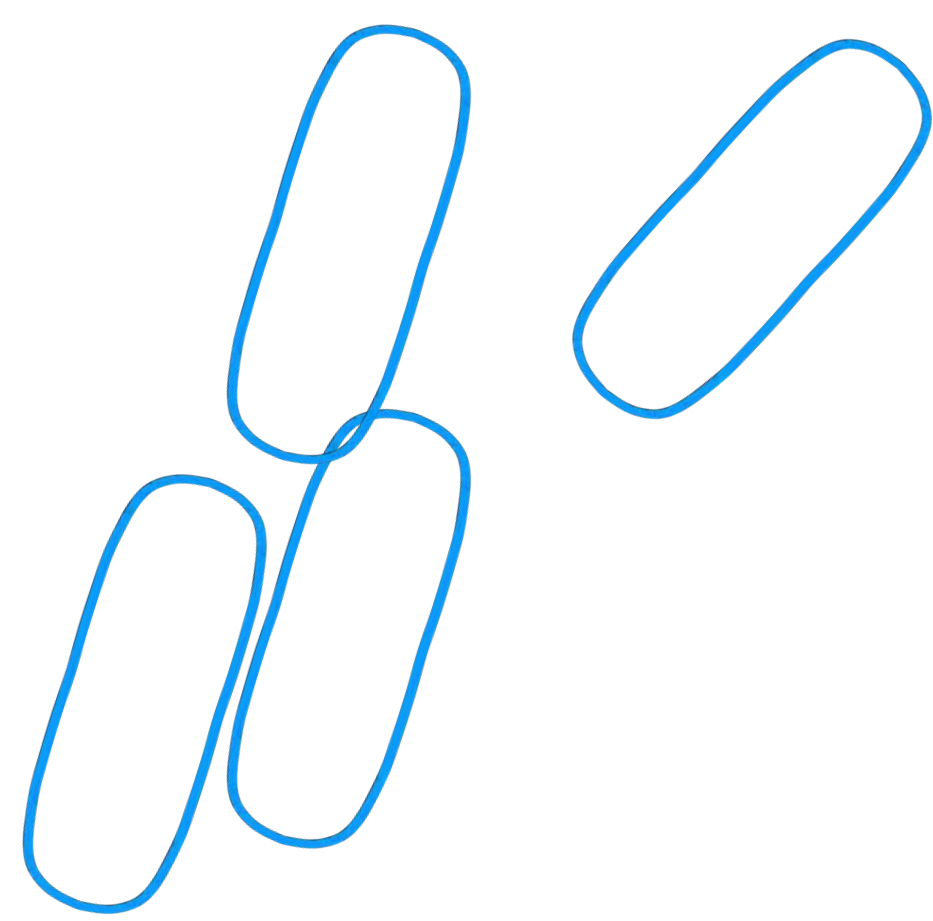

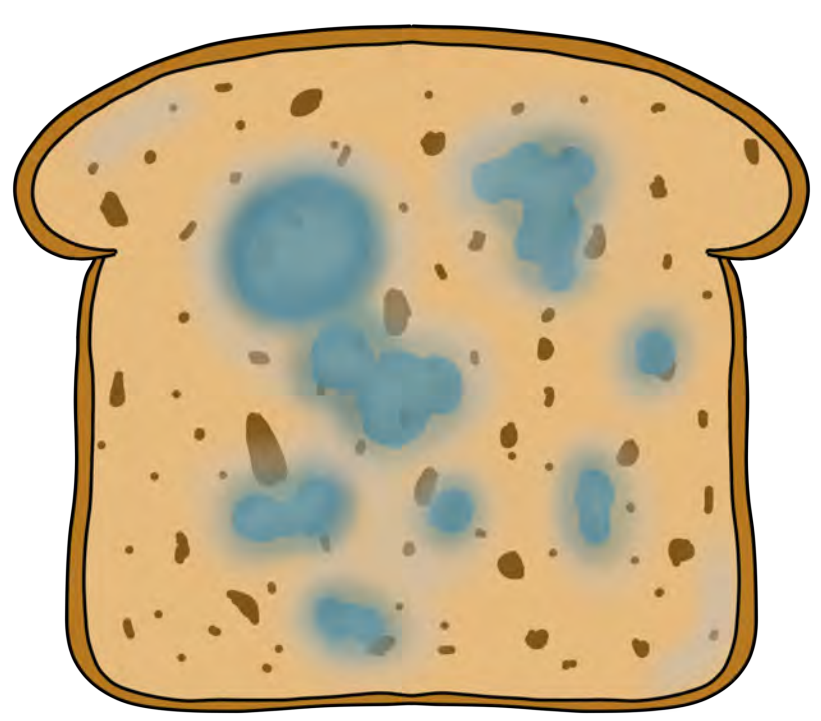

FBI Decomposers

Decompose: break down into smaller, simpler parts

What are the FBI?

Fungus! Bacteria! Invertebrates!

Hearing

Sight

Smell

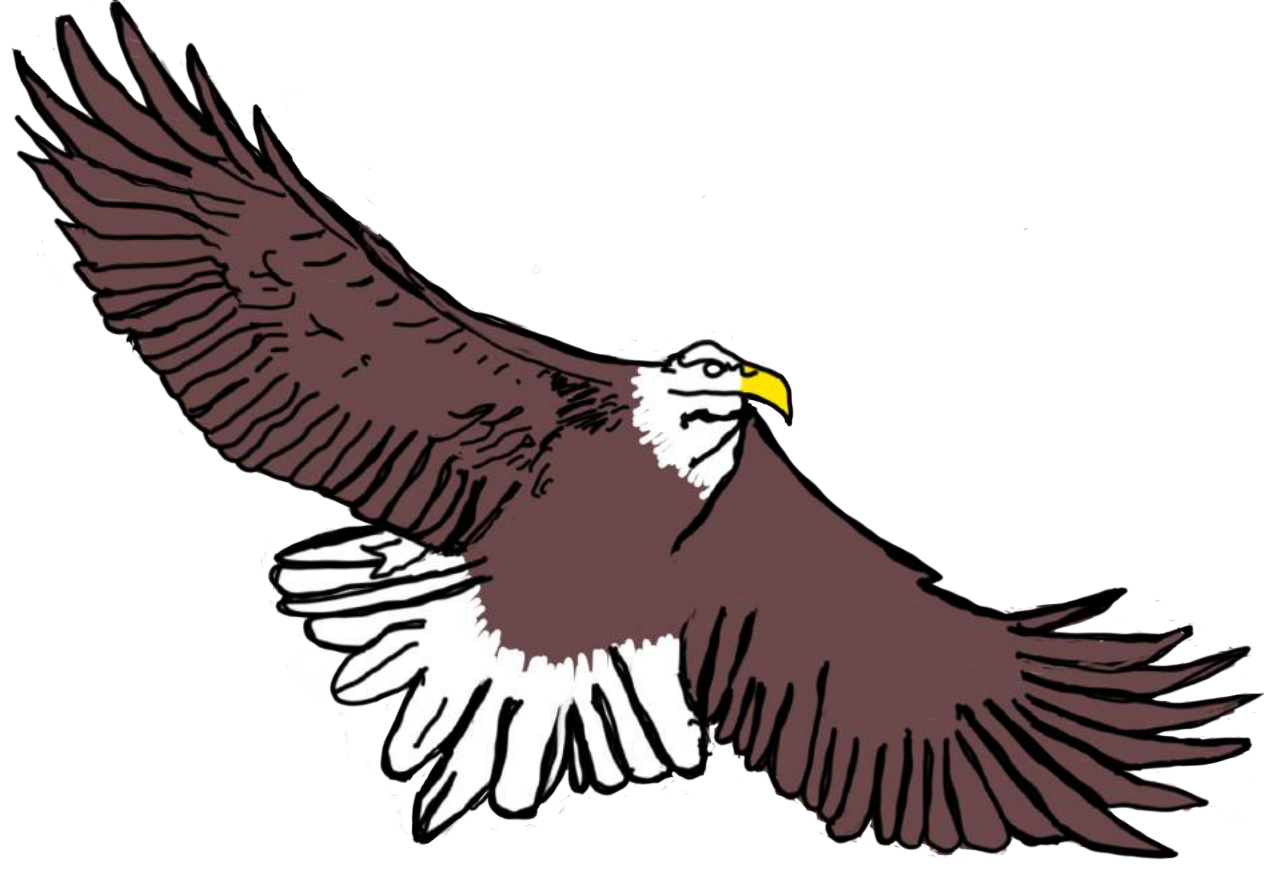

Taste

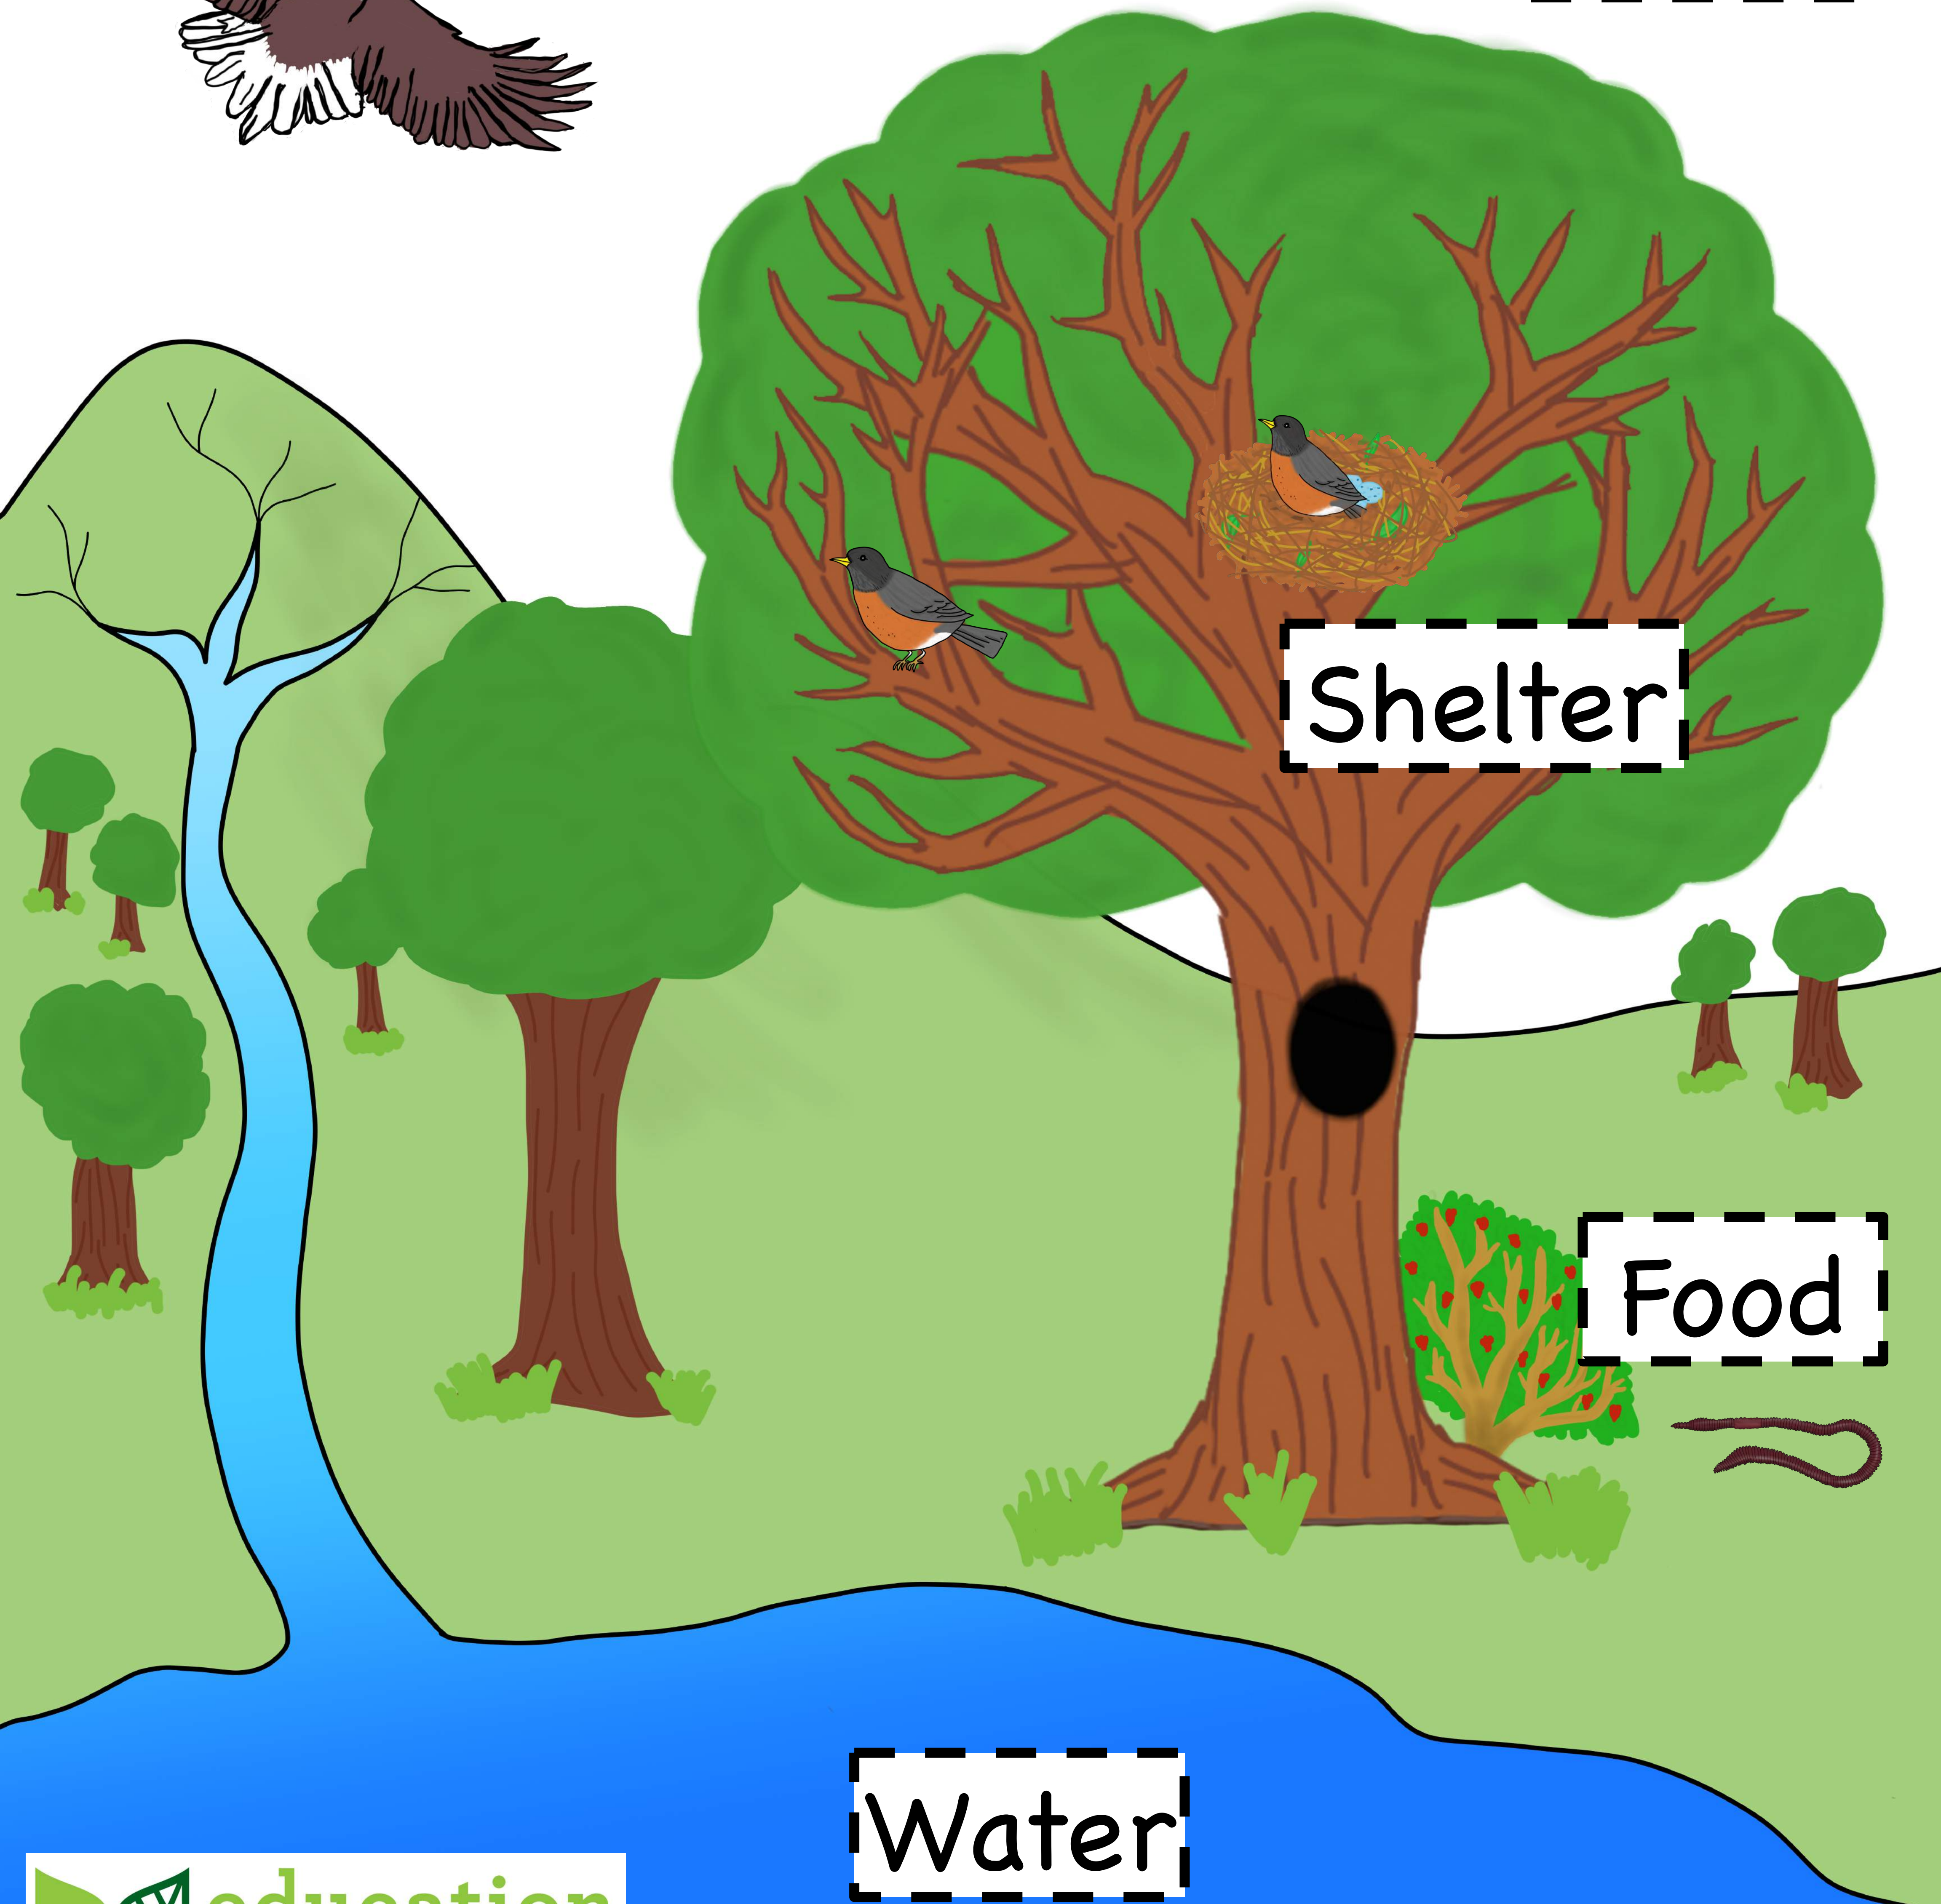

Touch

What Makes a Habitat?

Space

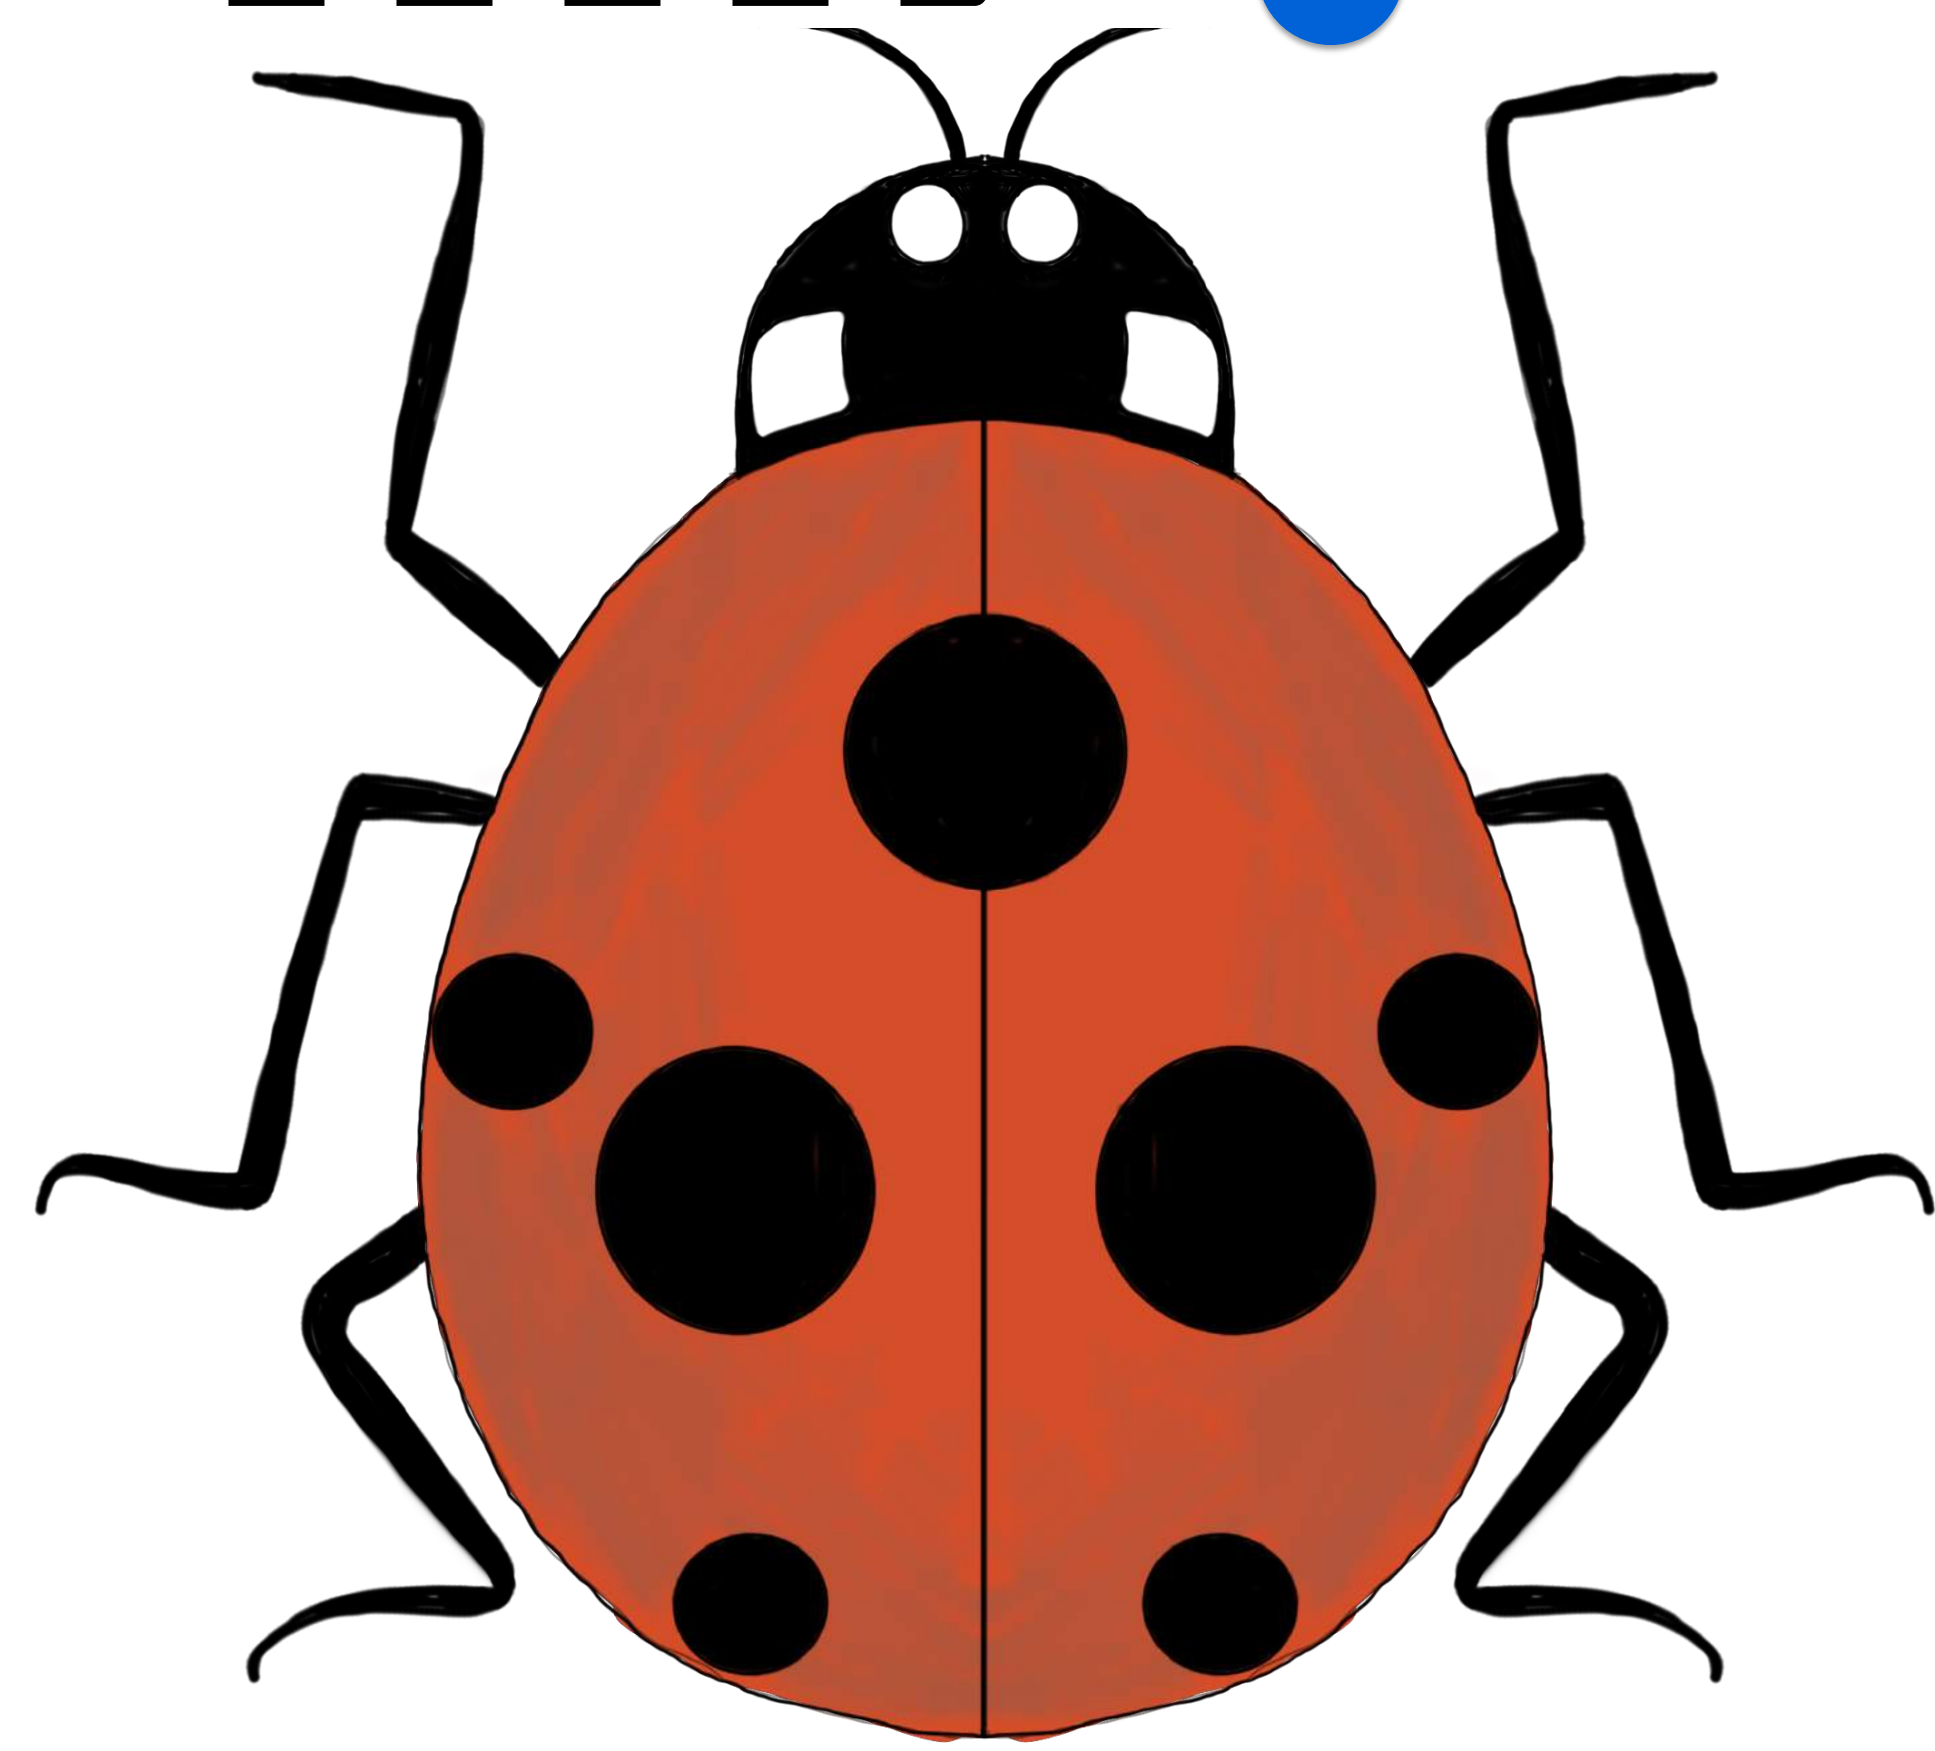

Shelter

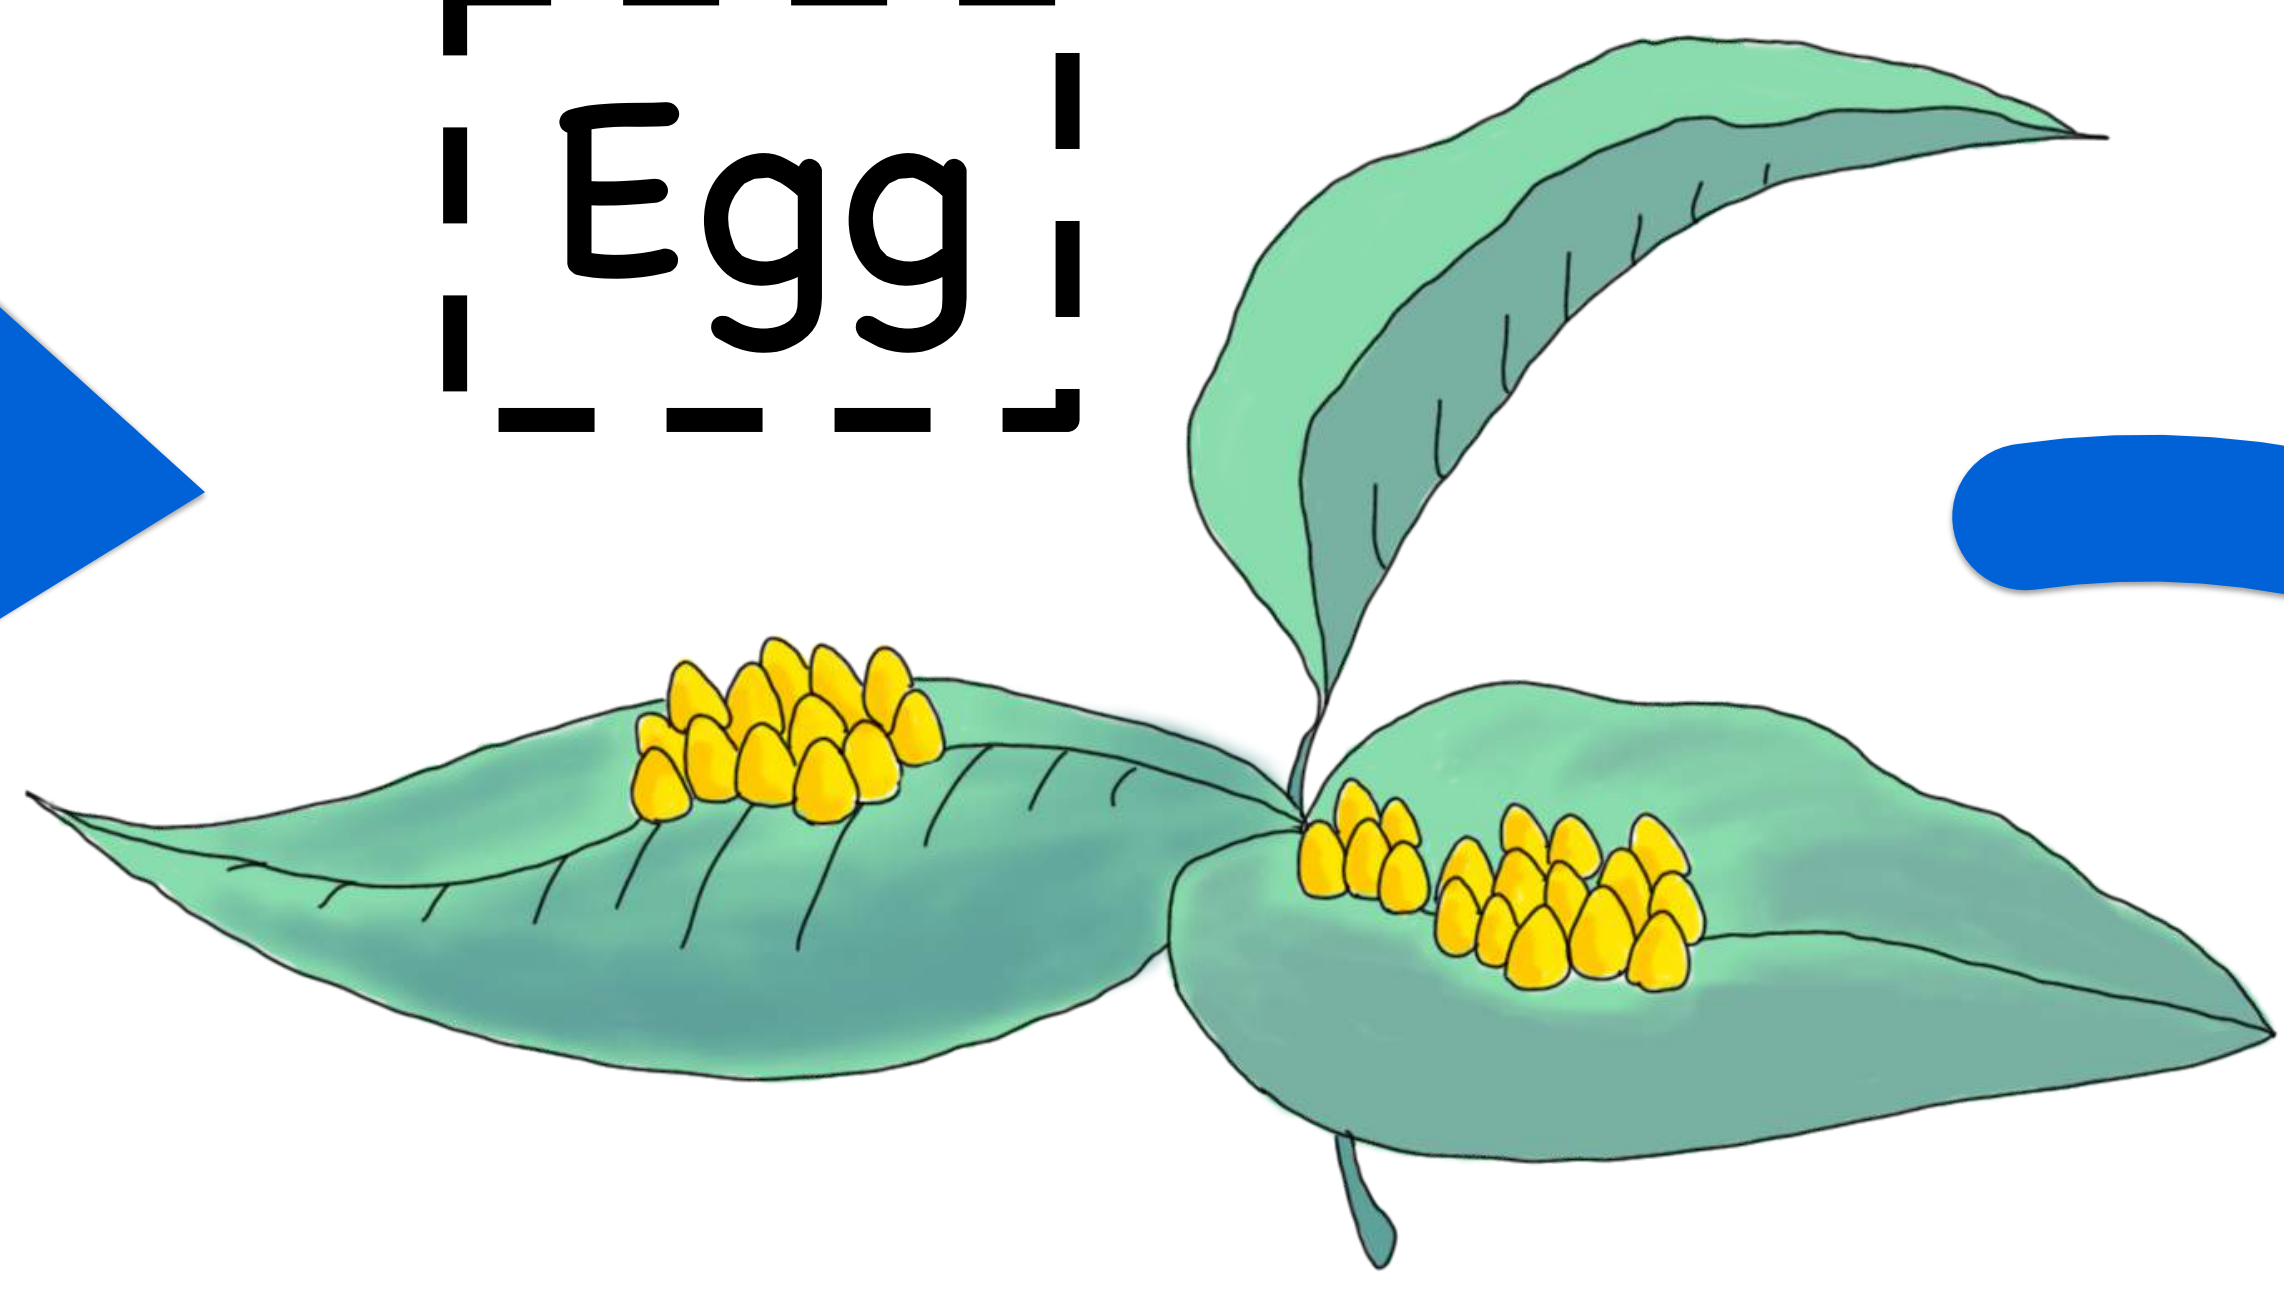

Food

Water

Adult

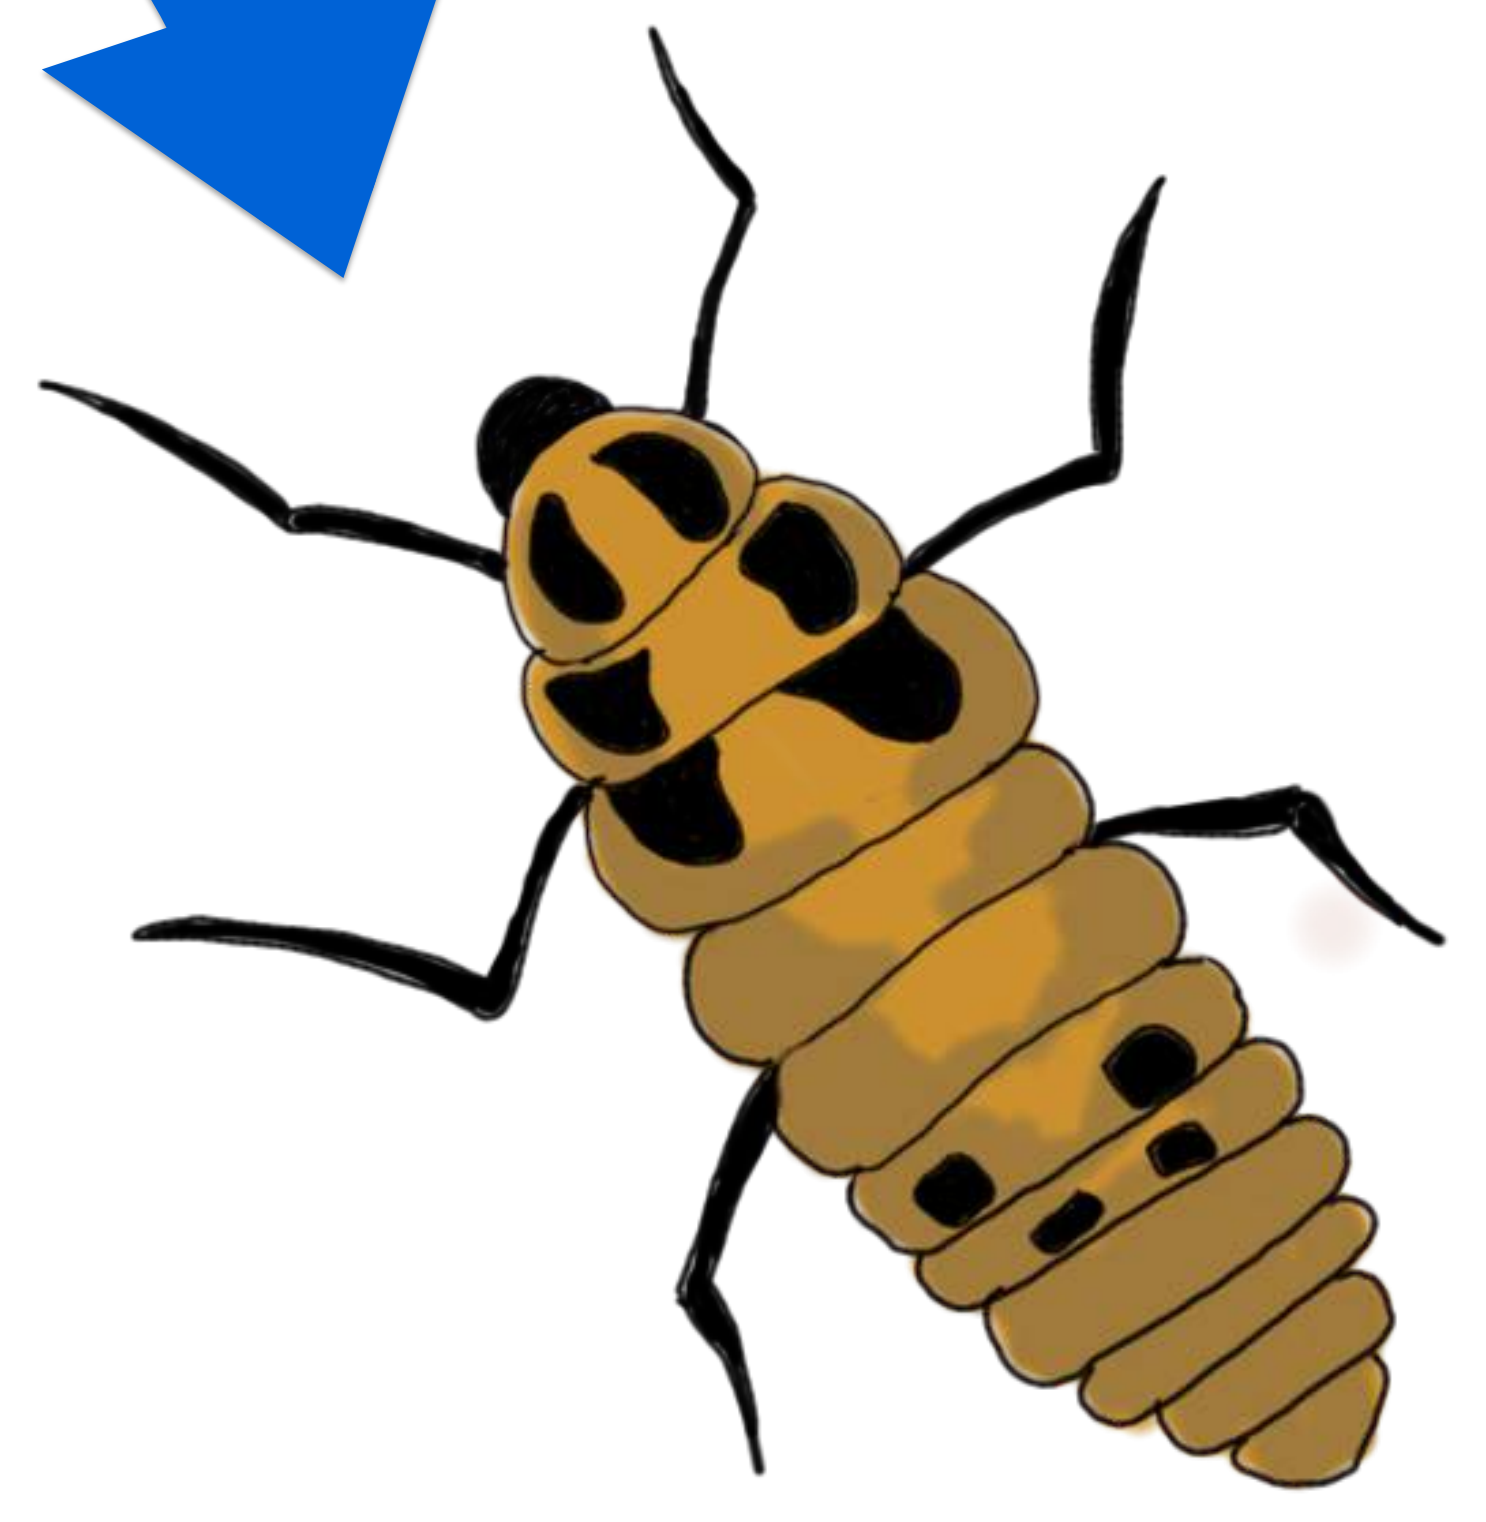

Egg

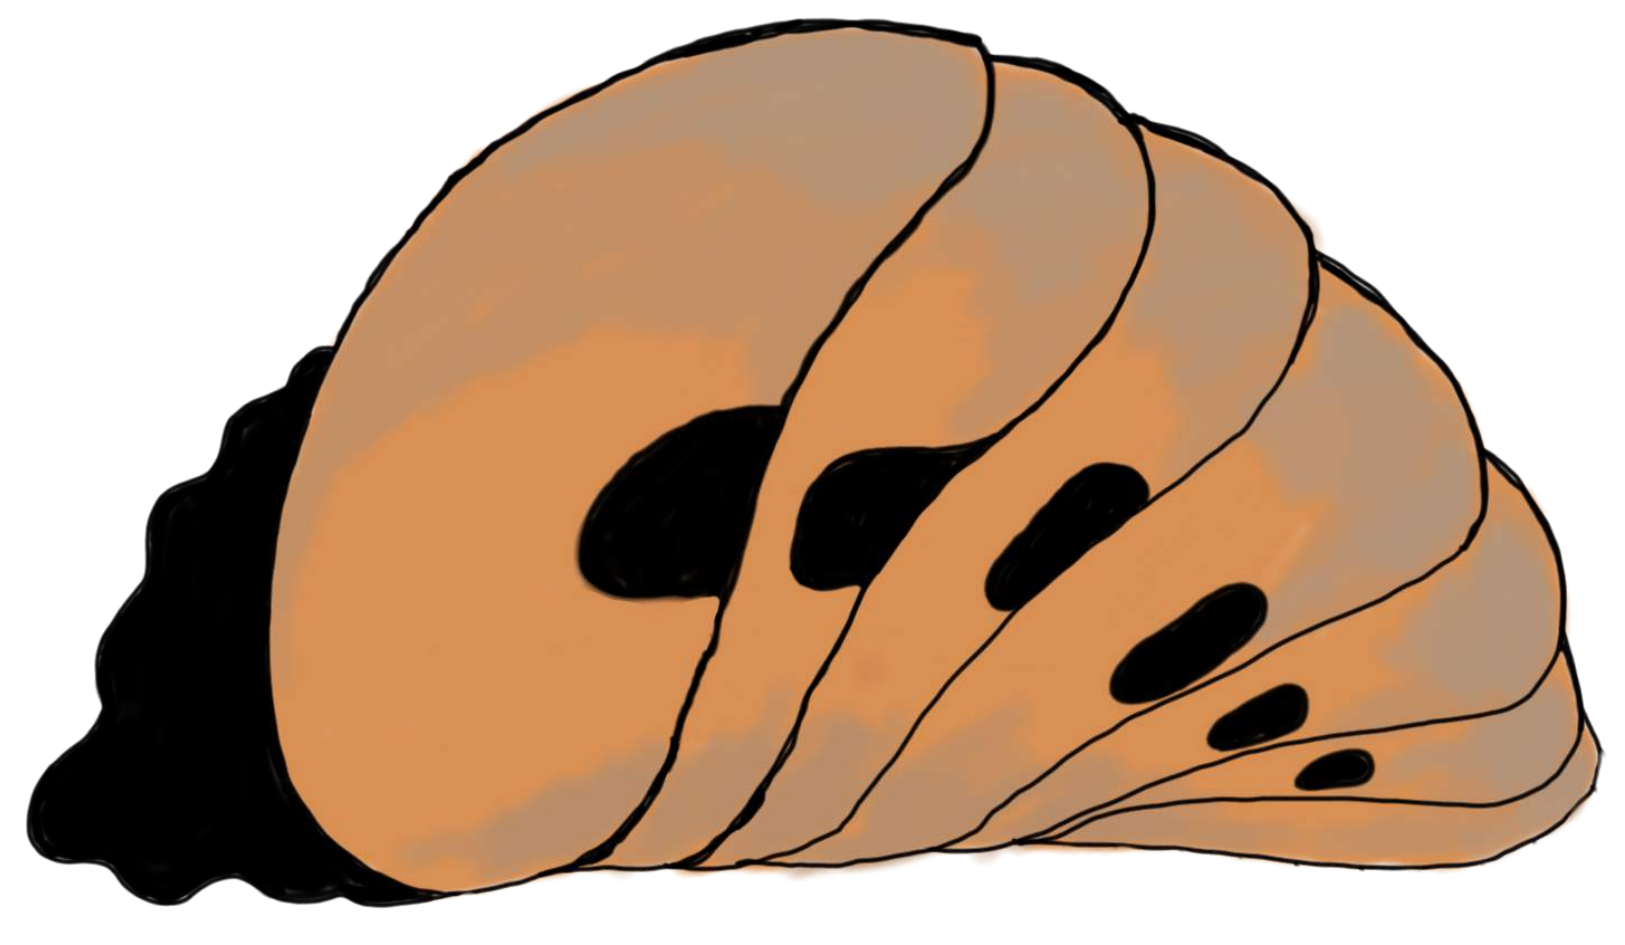

Insect Life Cycle

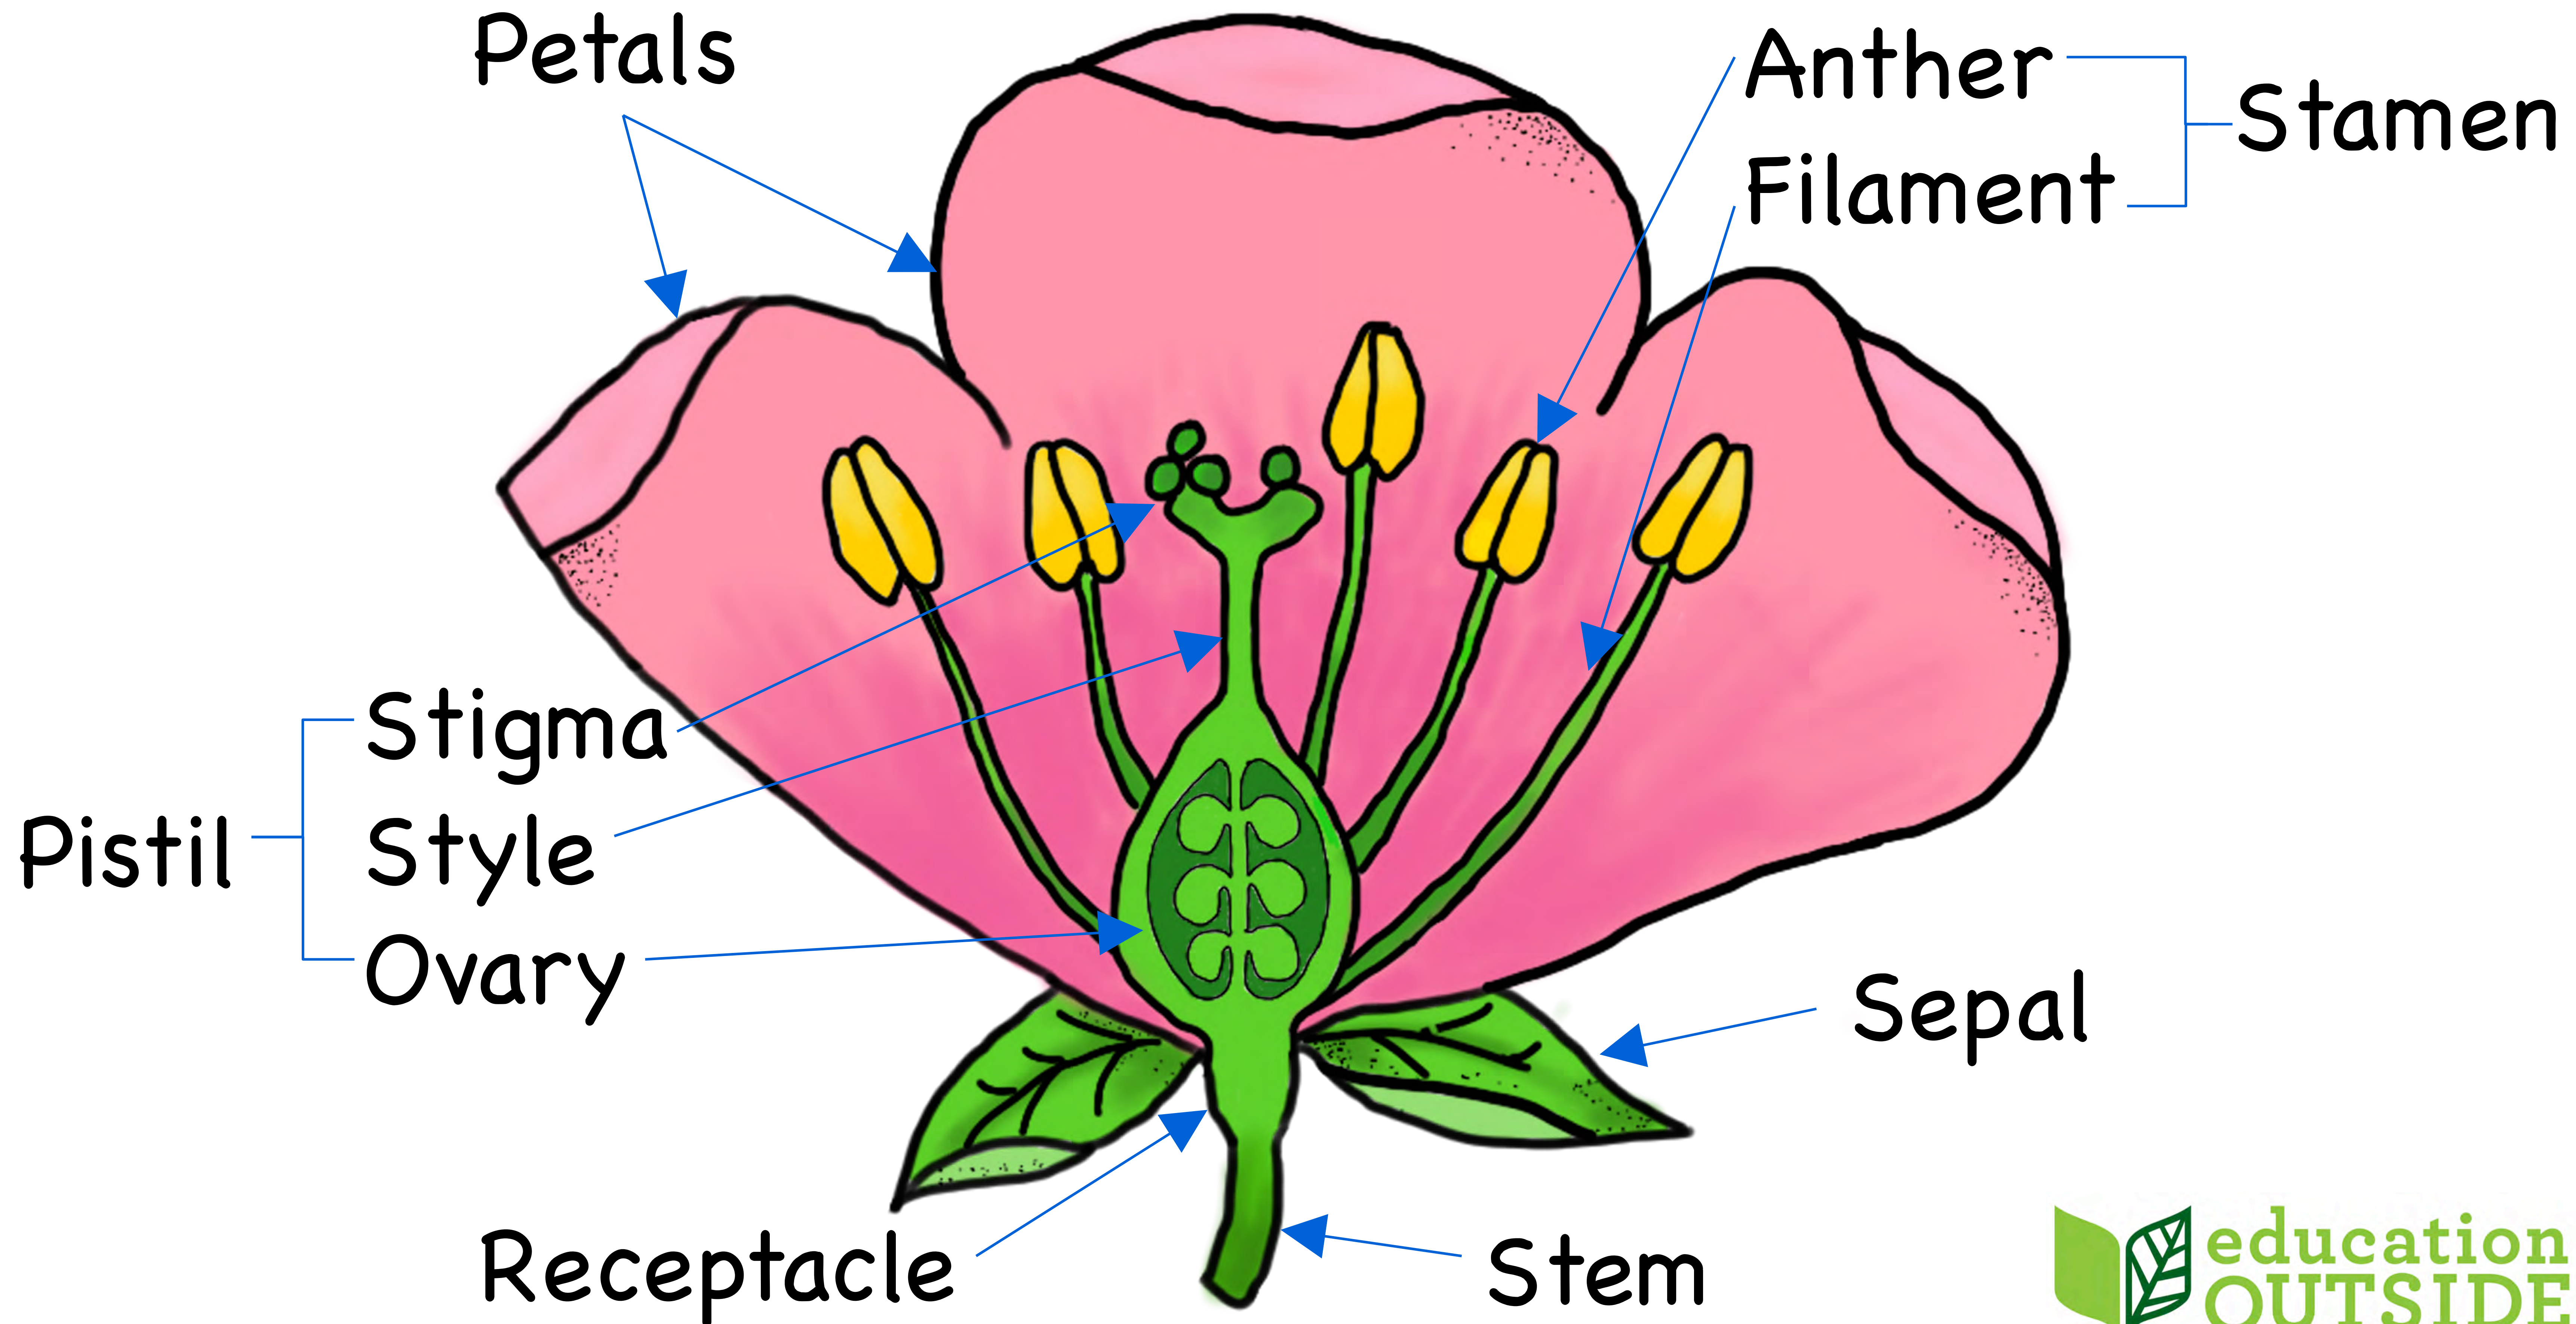

Larvae

Pupa

Parts of a Flower

Parts of a Flower

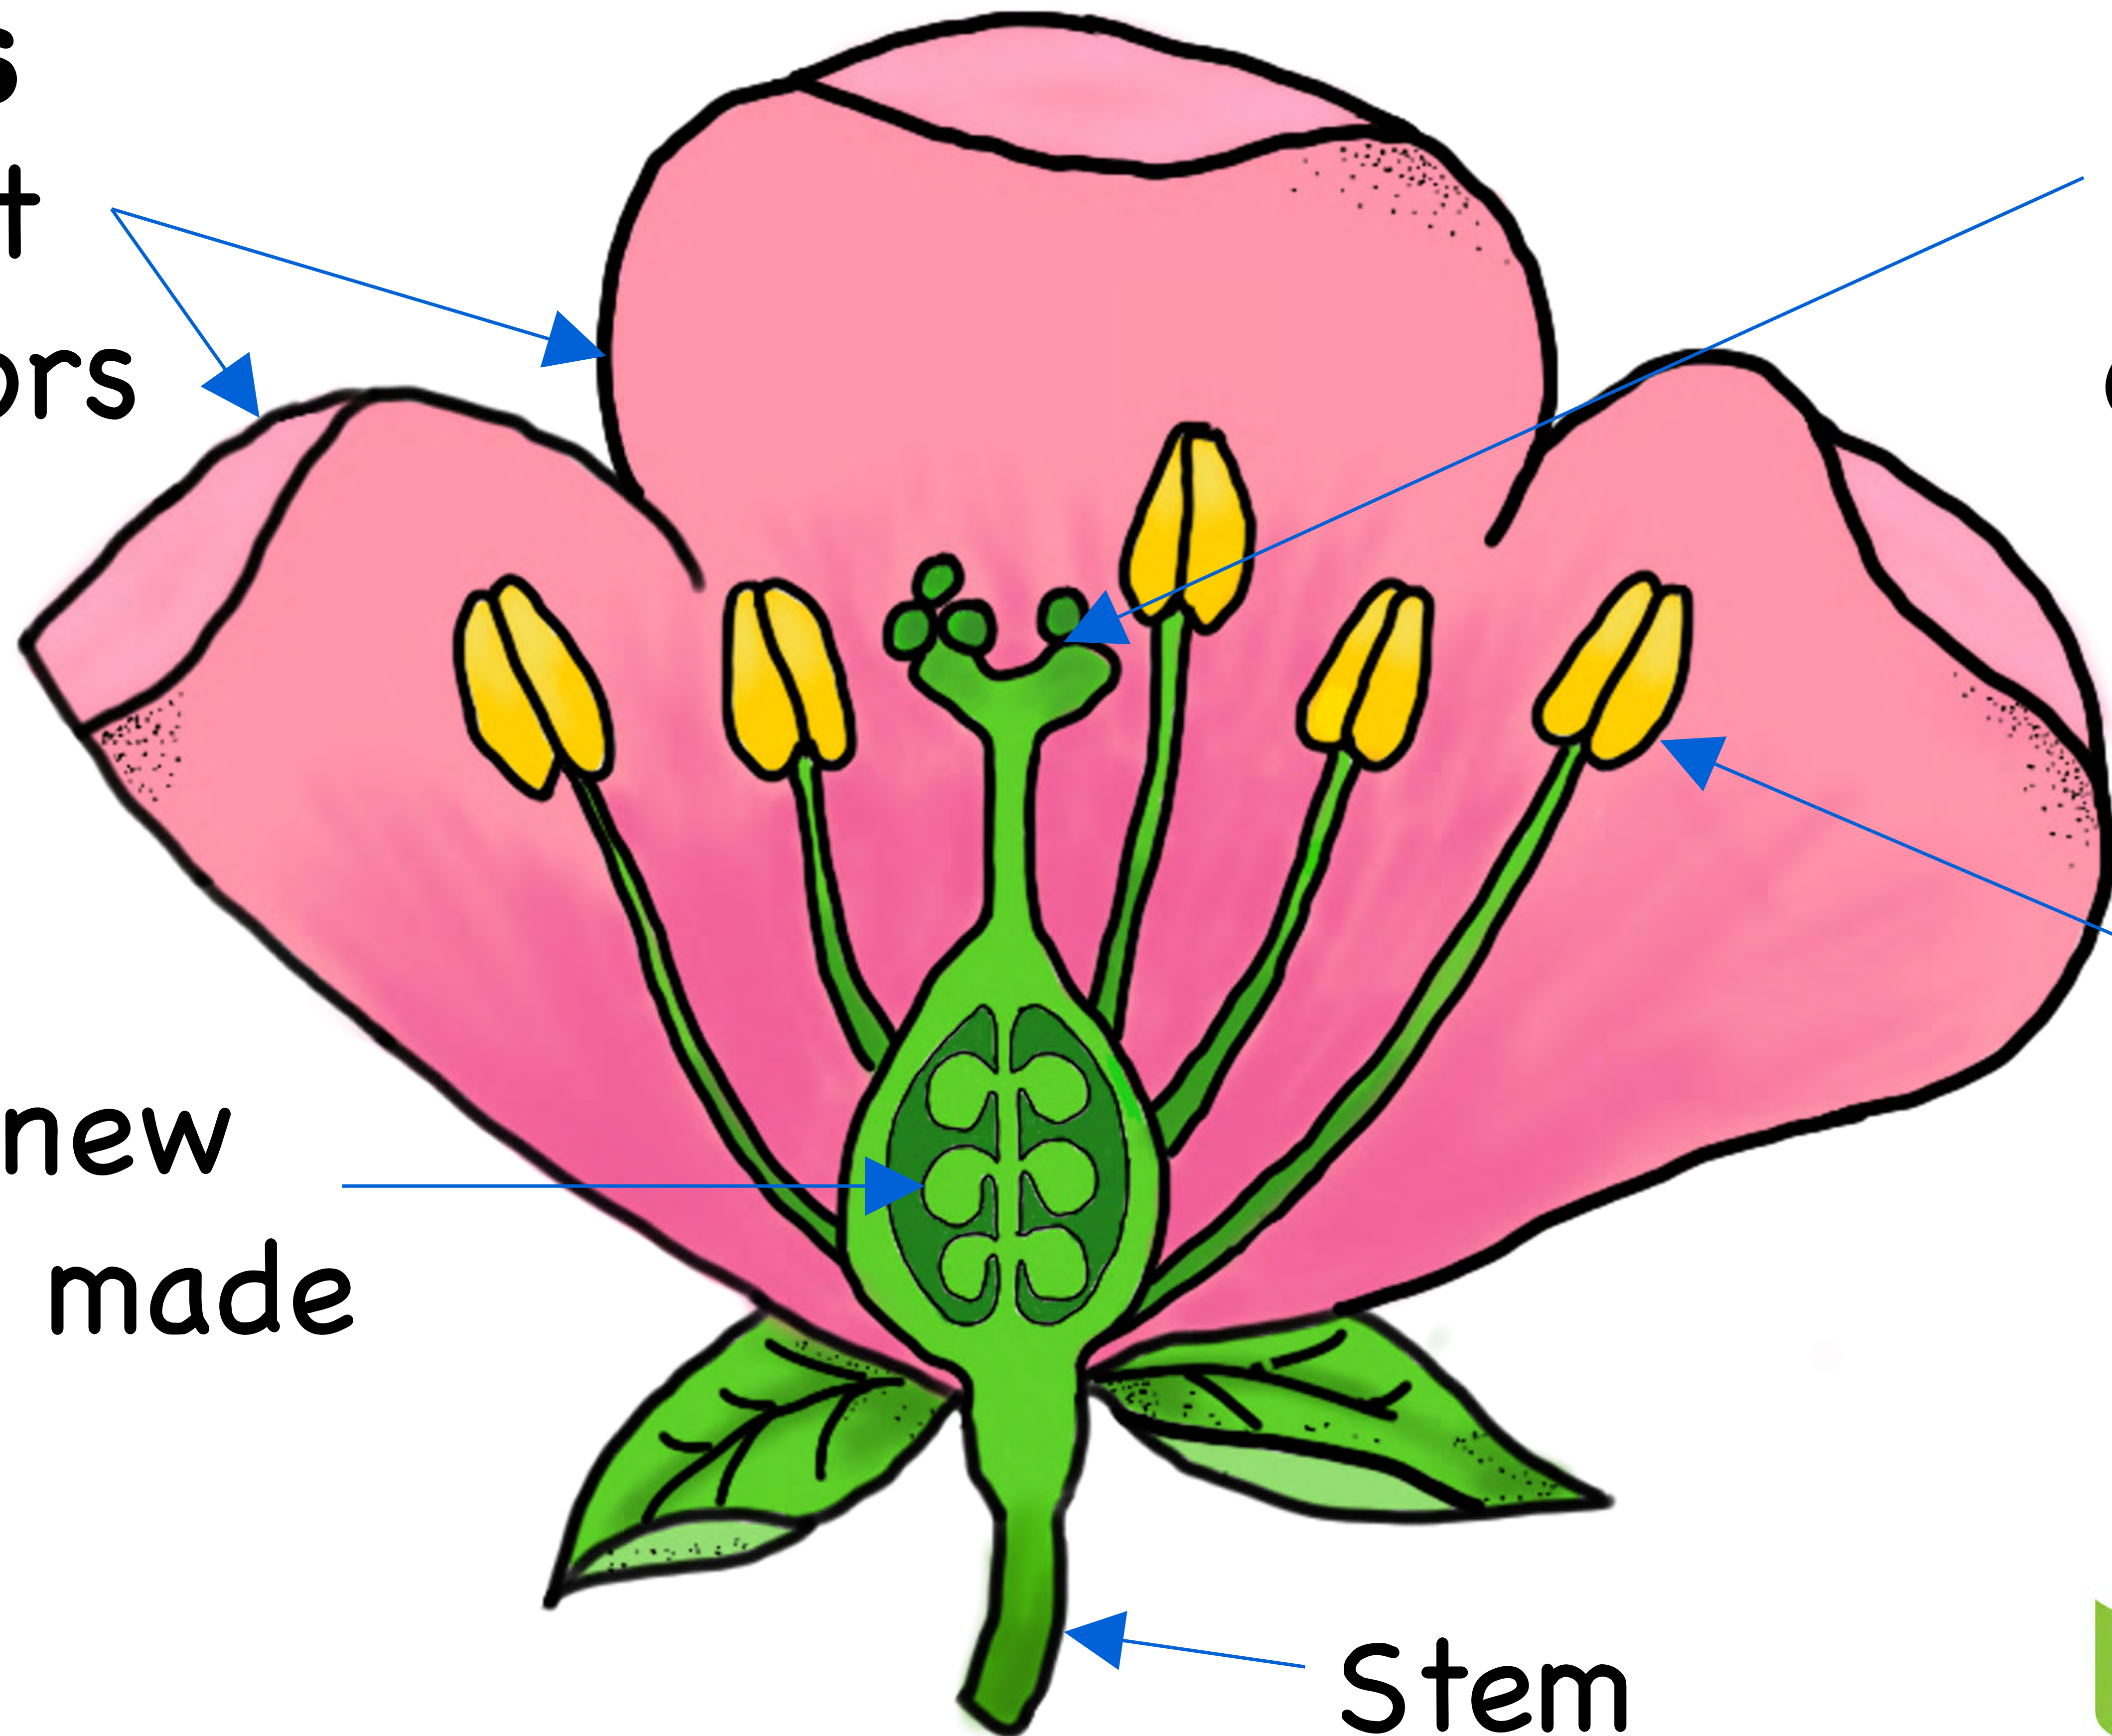

Petals
attract
pollinators

Where
pollen is
collected

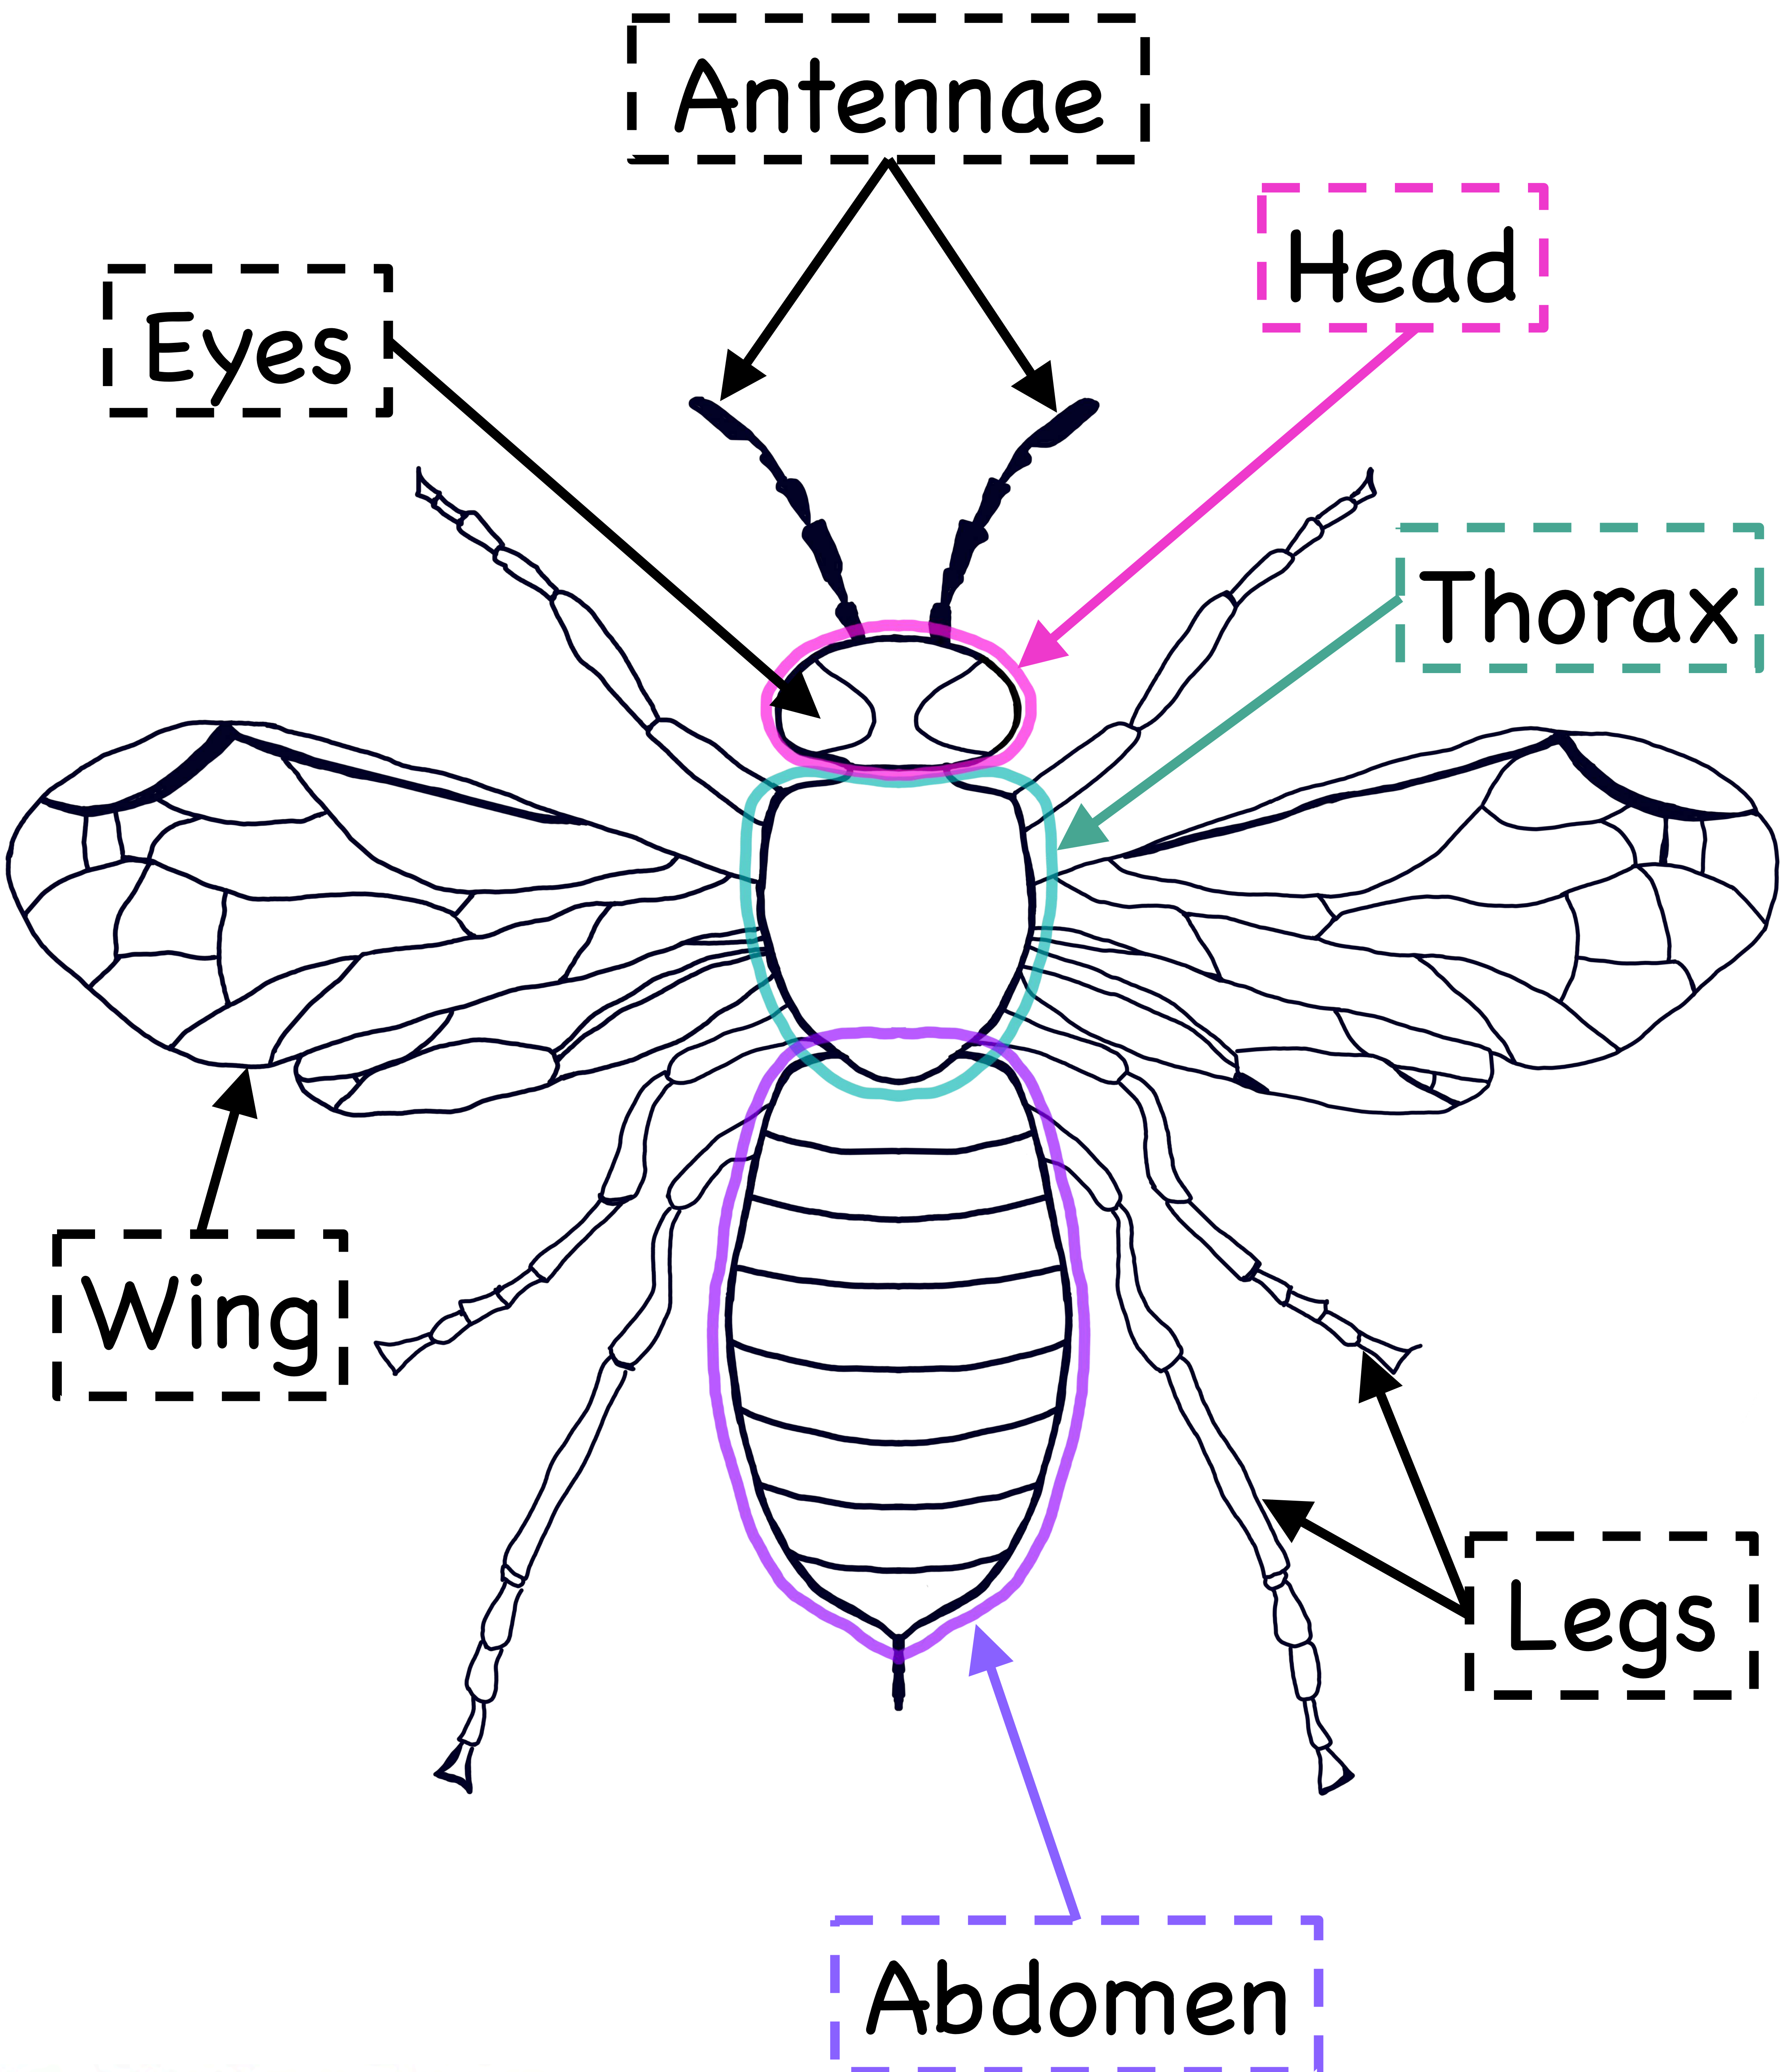

Where
pollen is
made

Where new
seeds are made

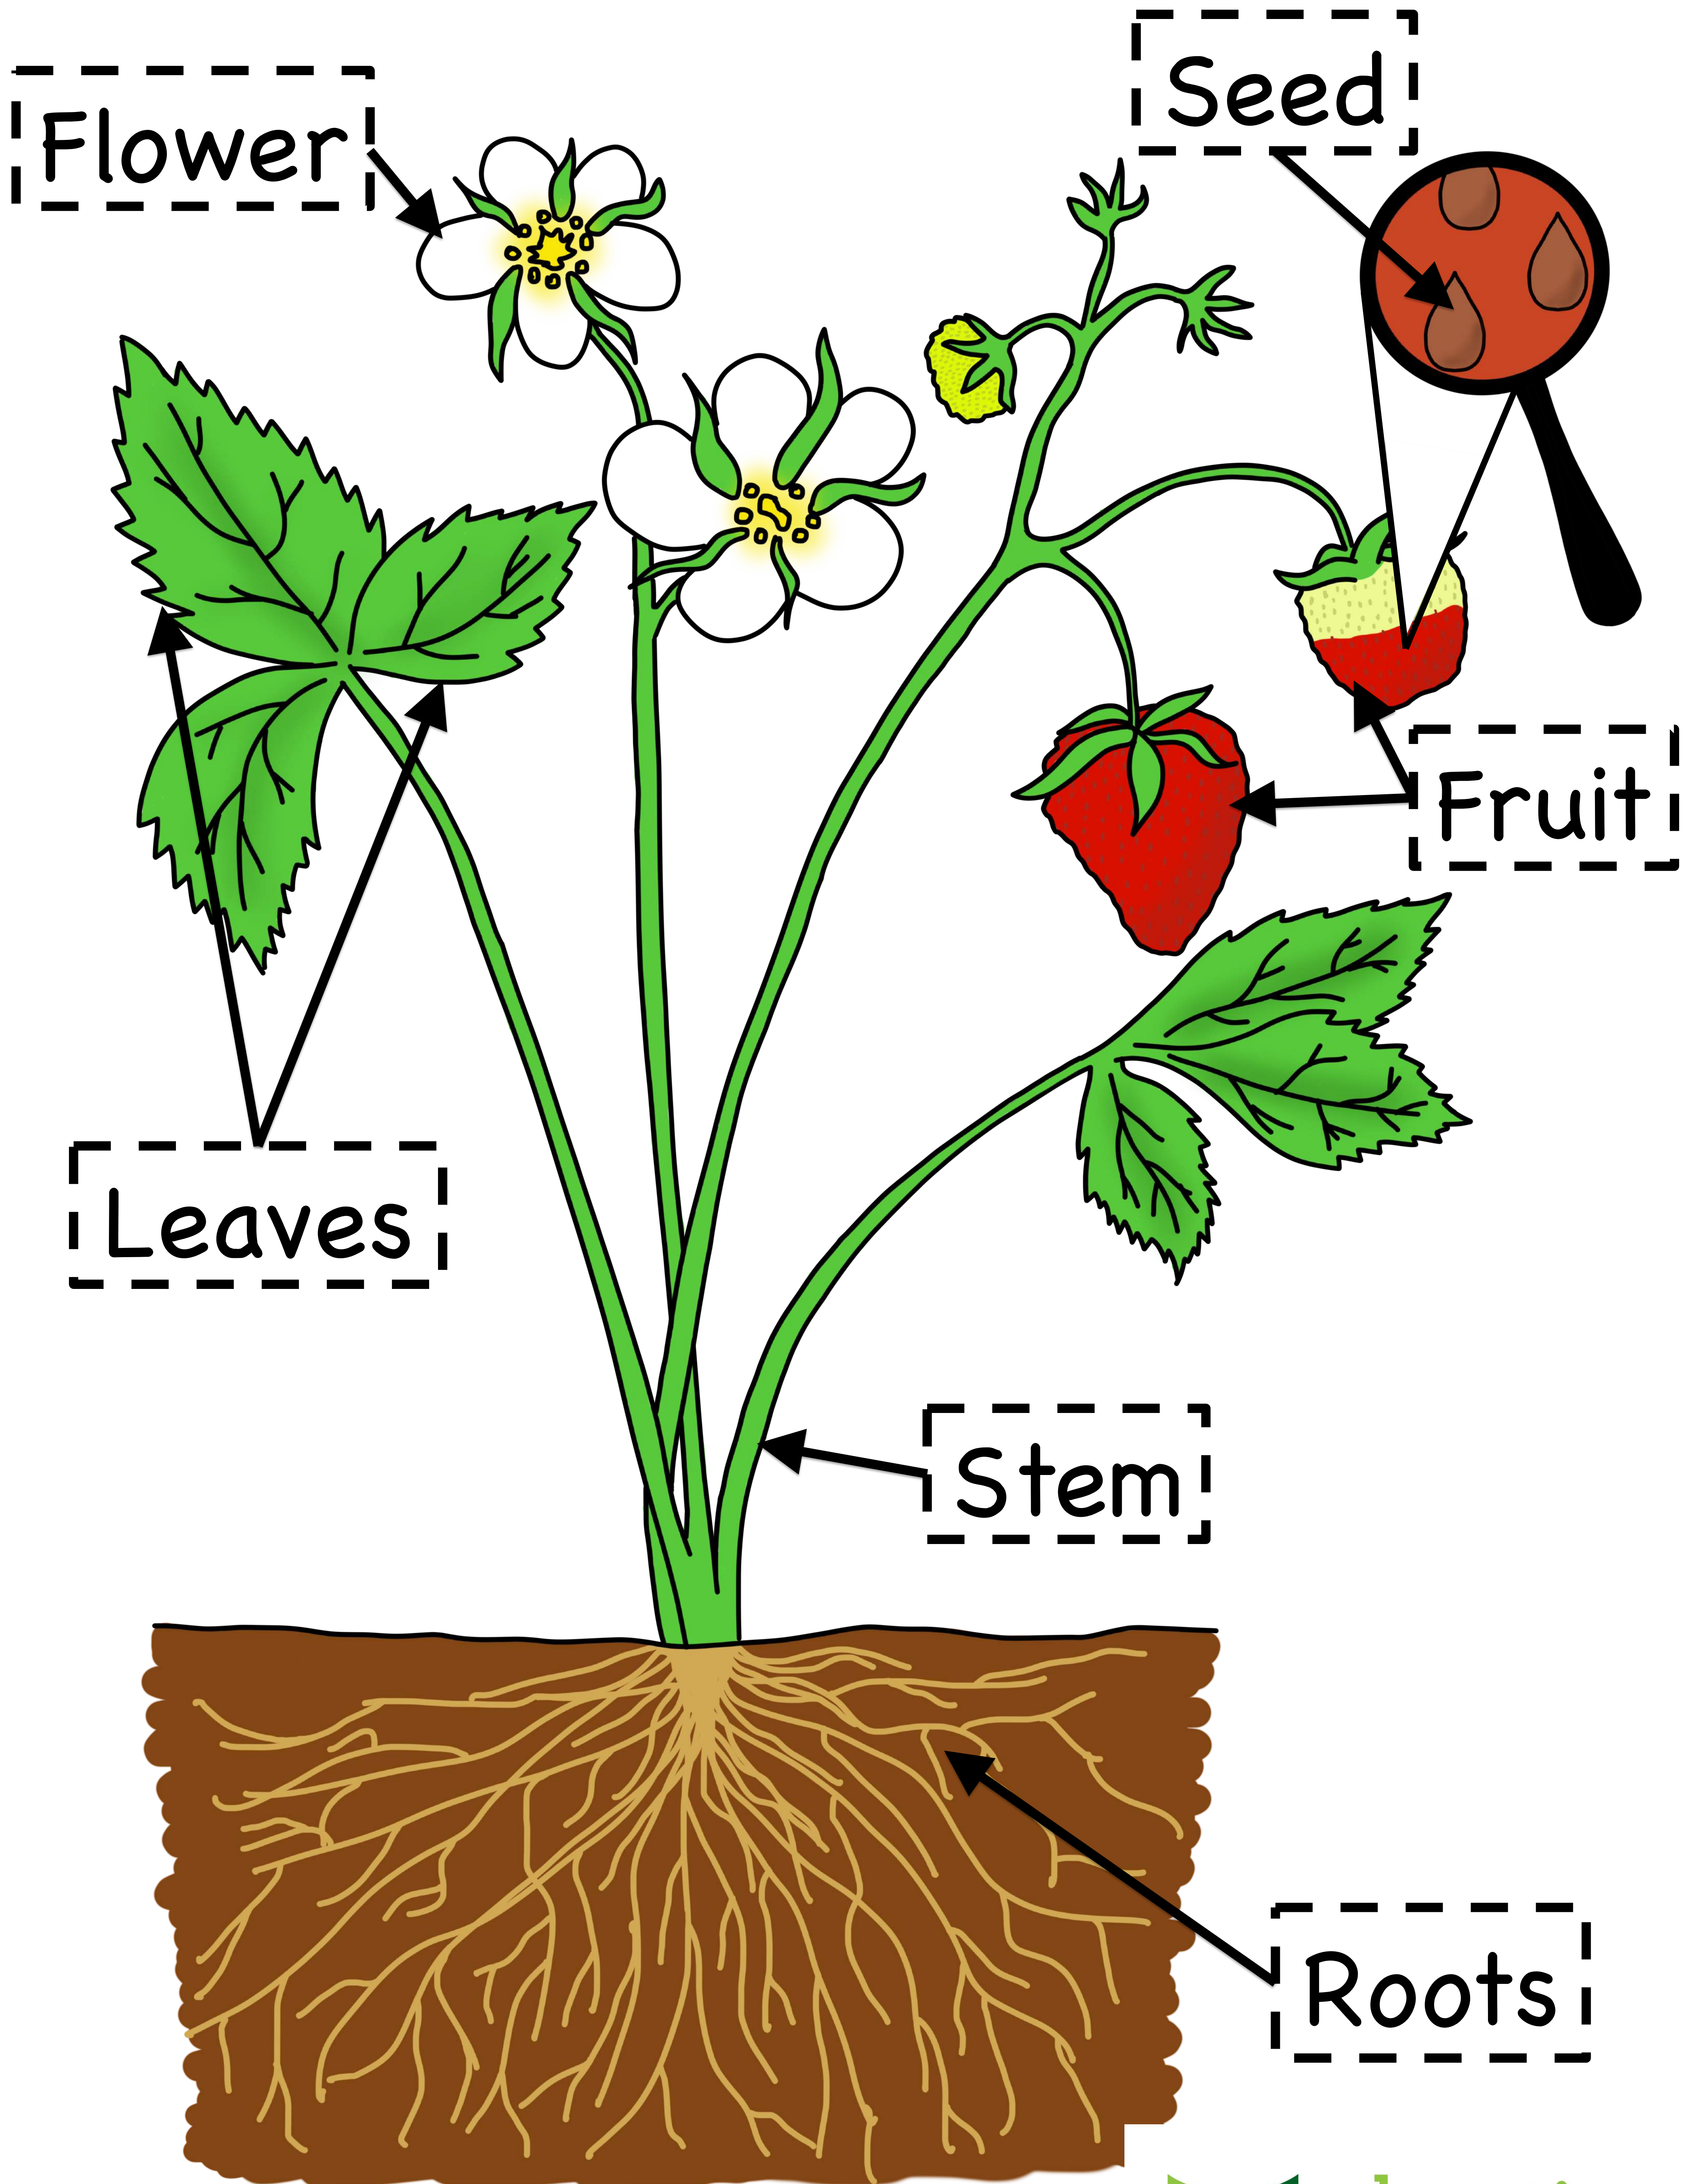

Stem

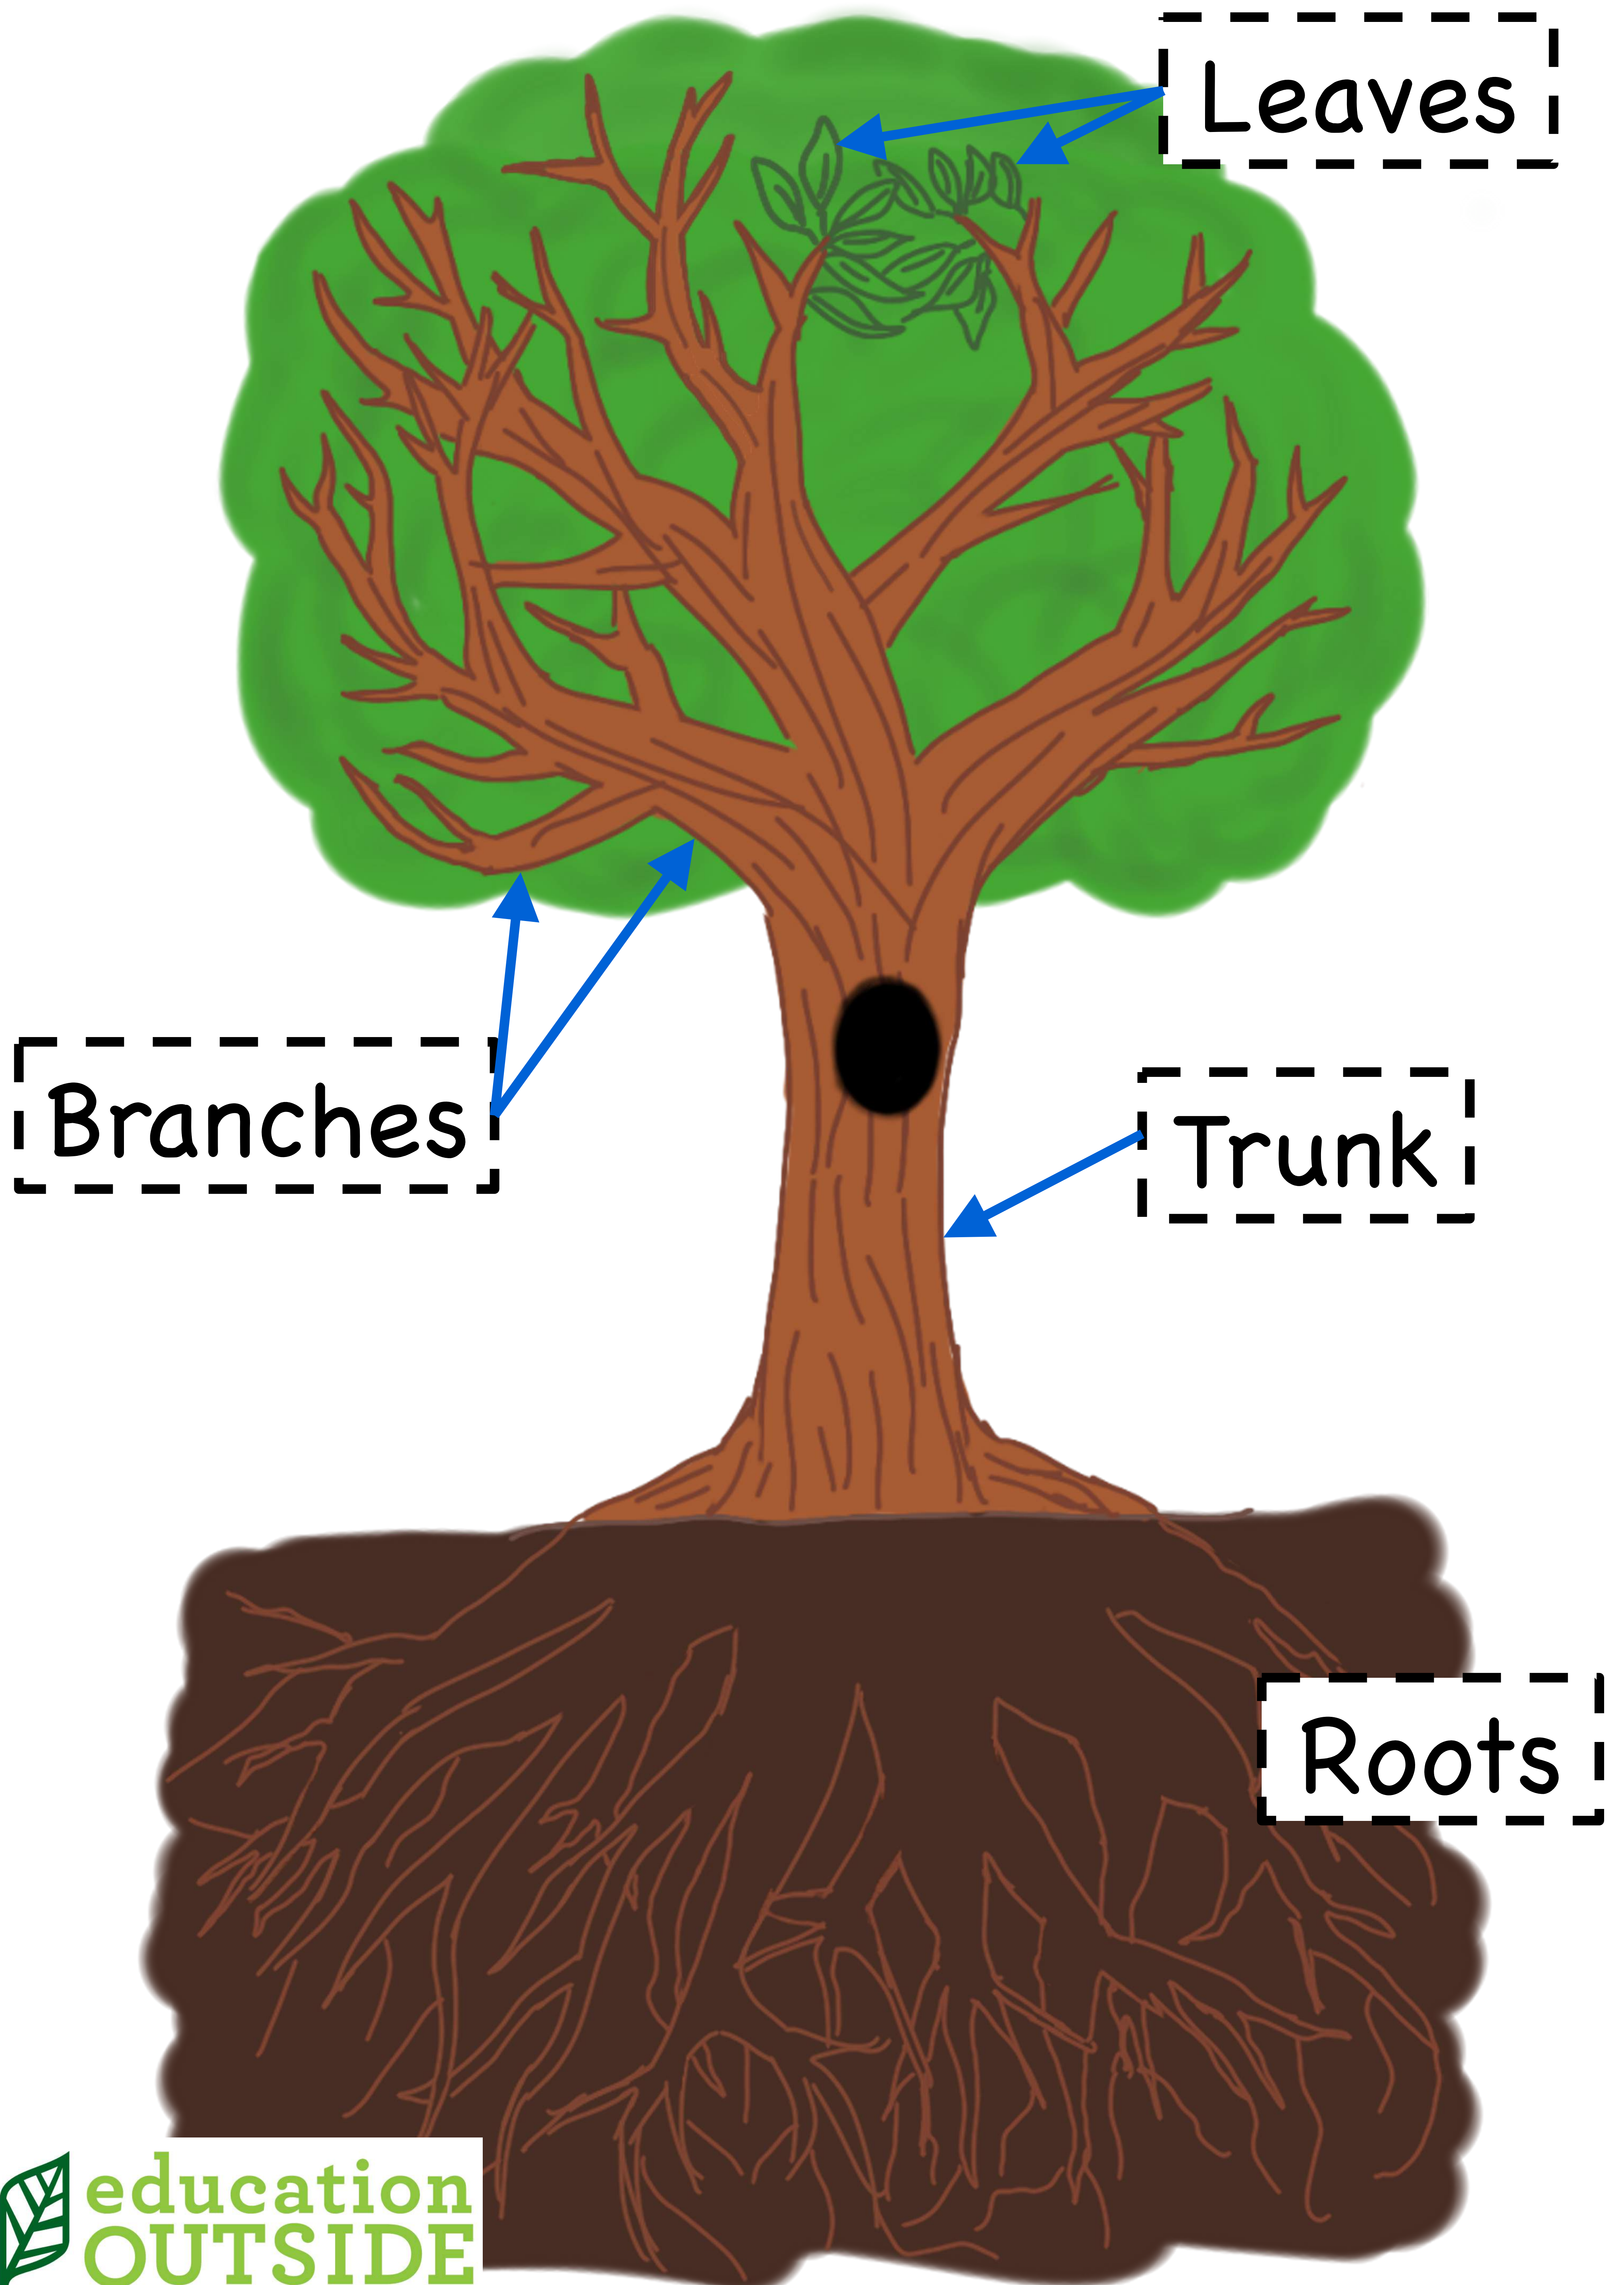

Parts of an Insect

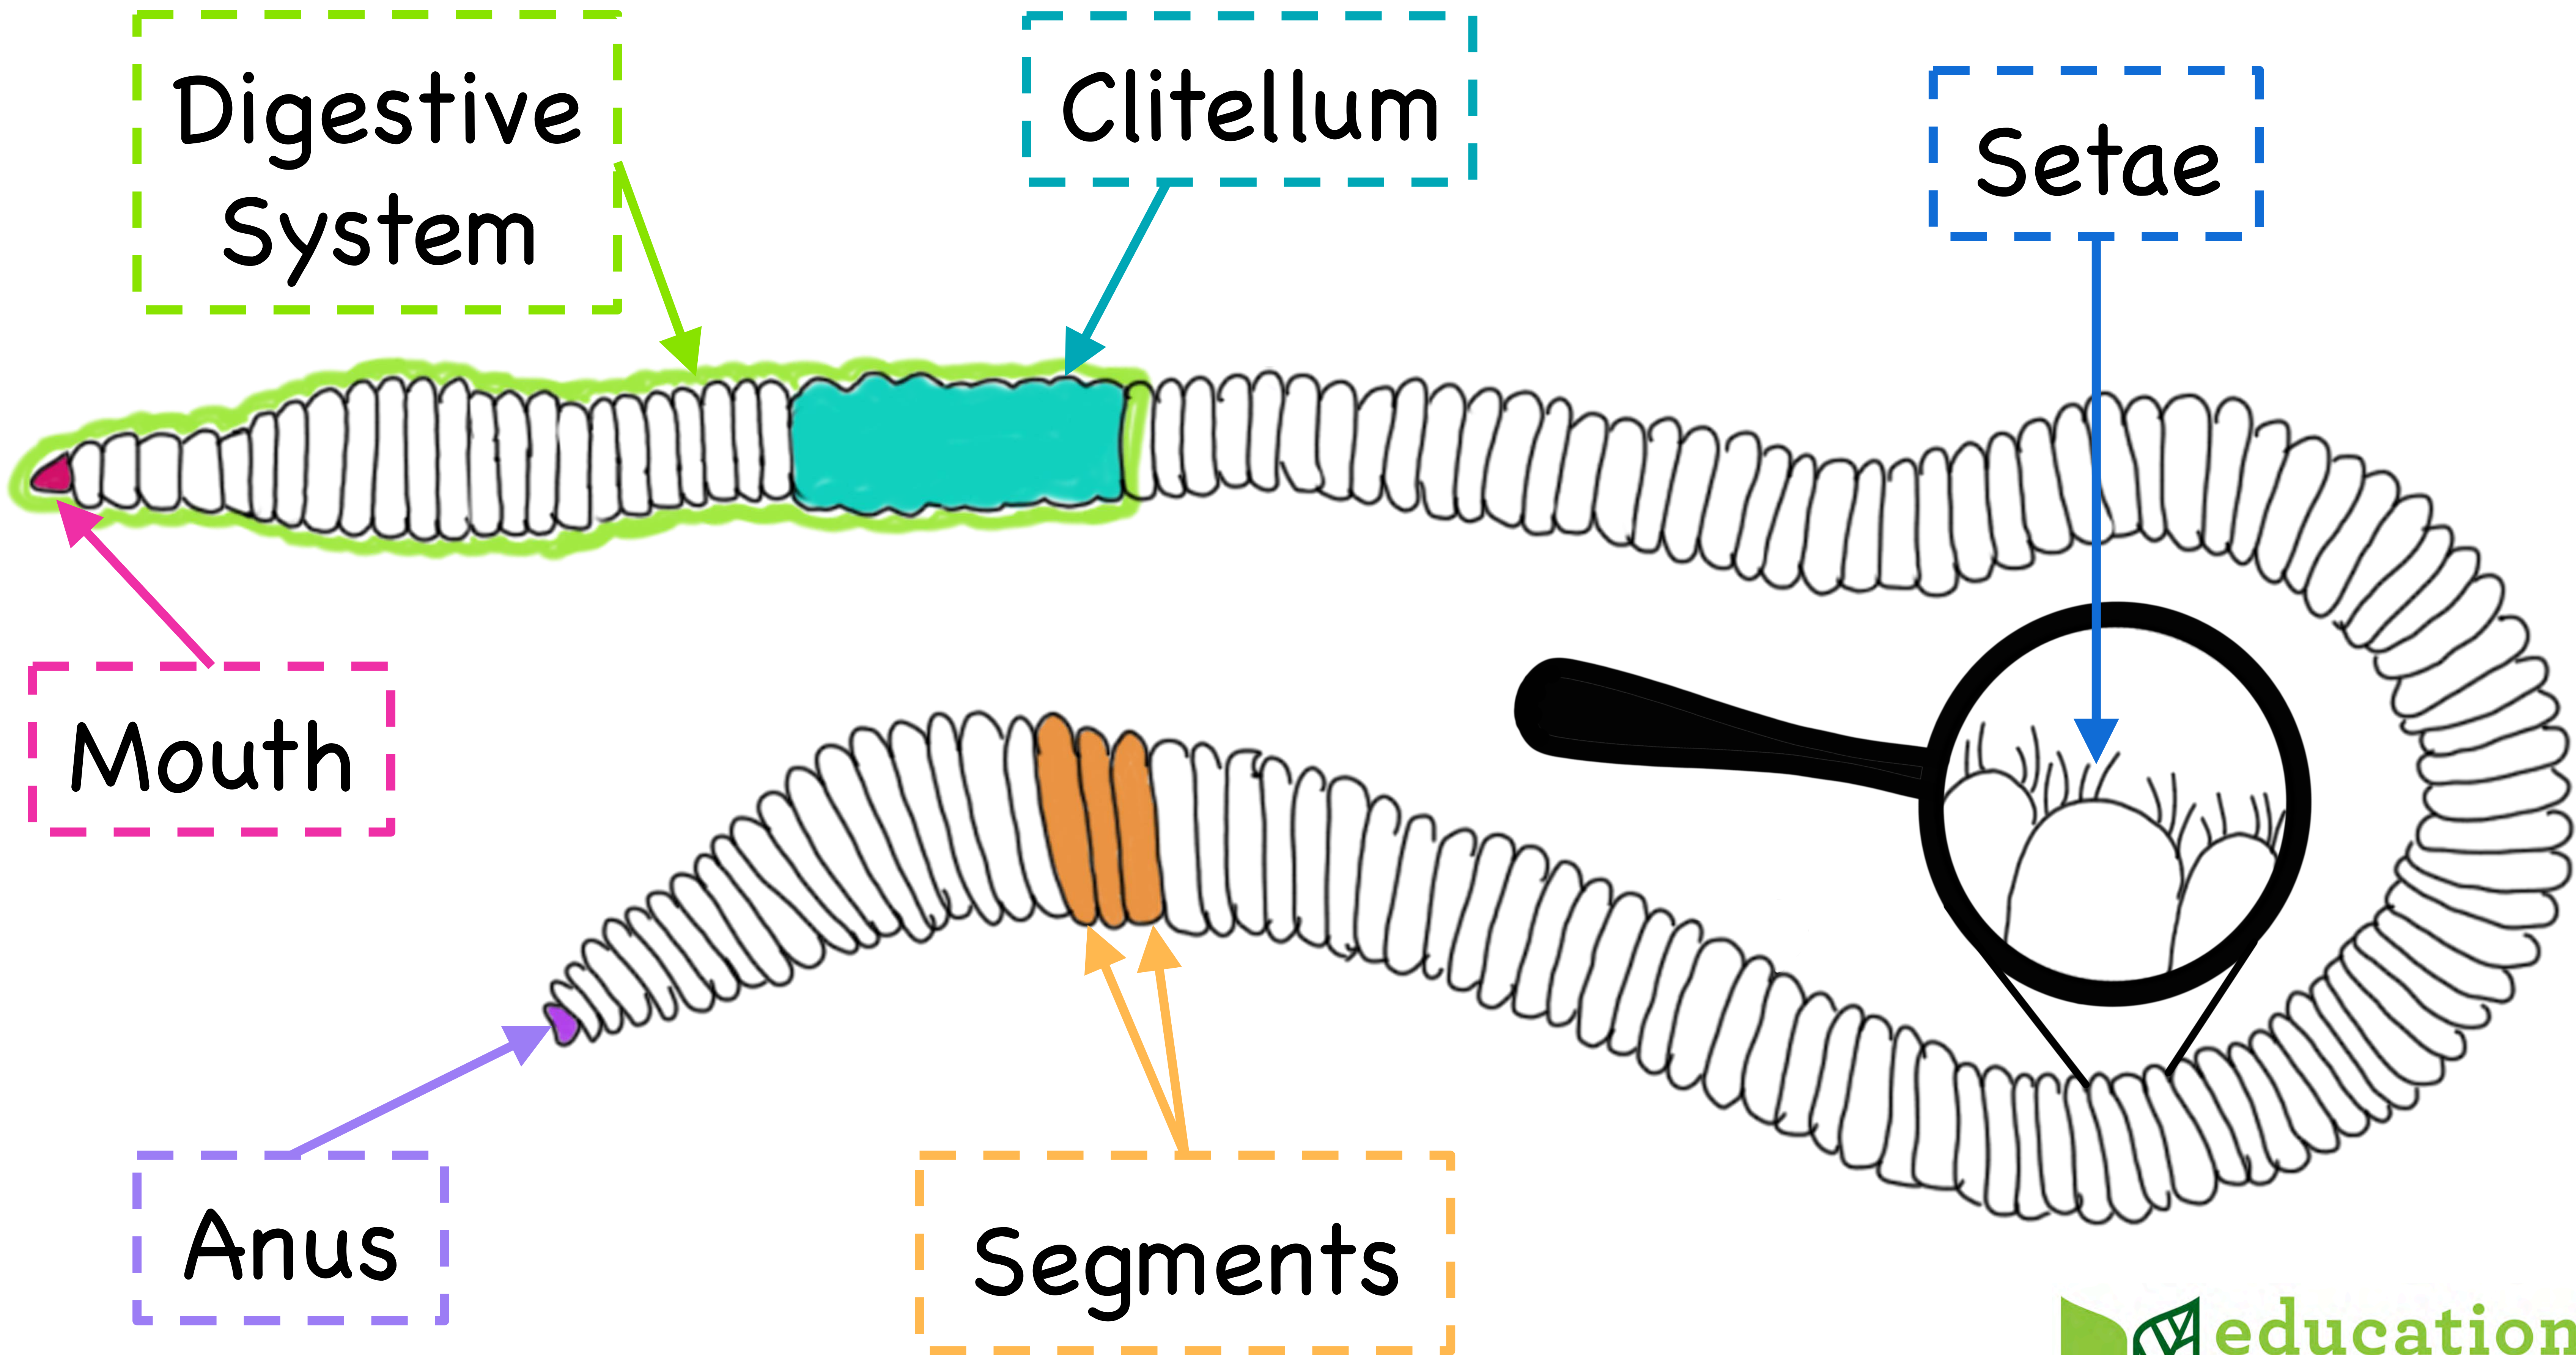

Parts of a Plant

Parts of a Tree

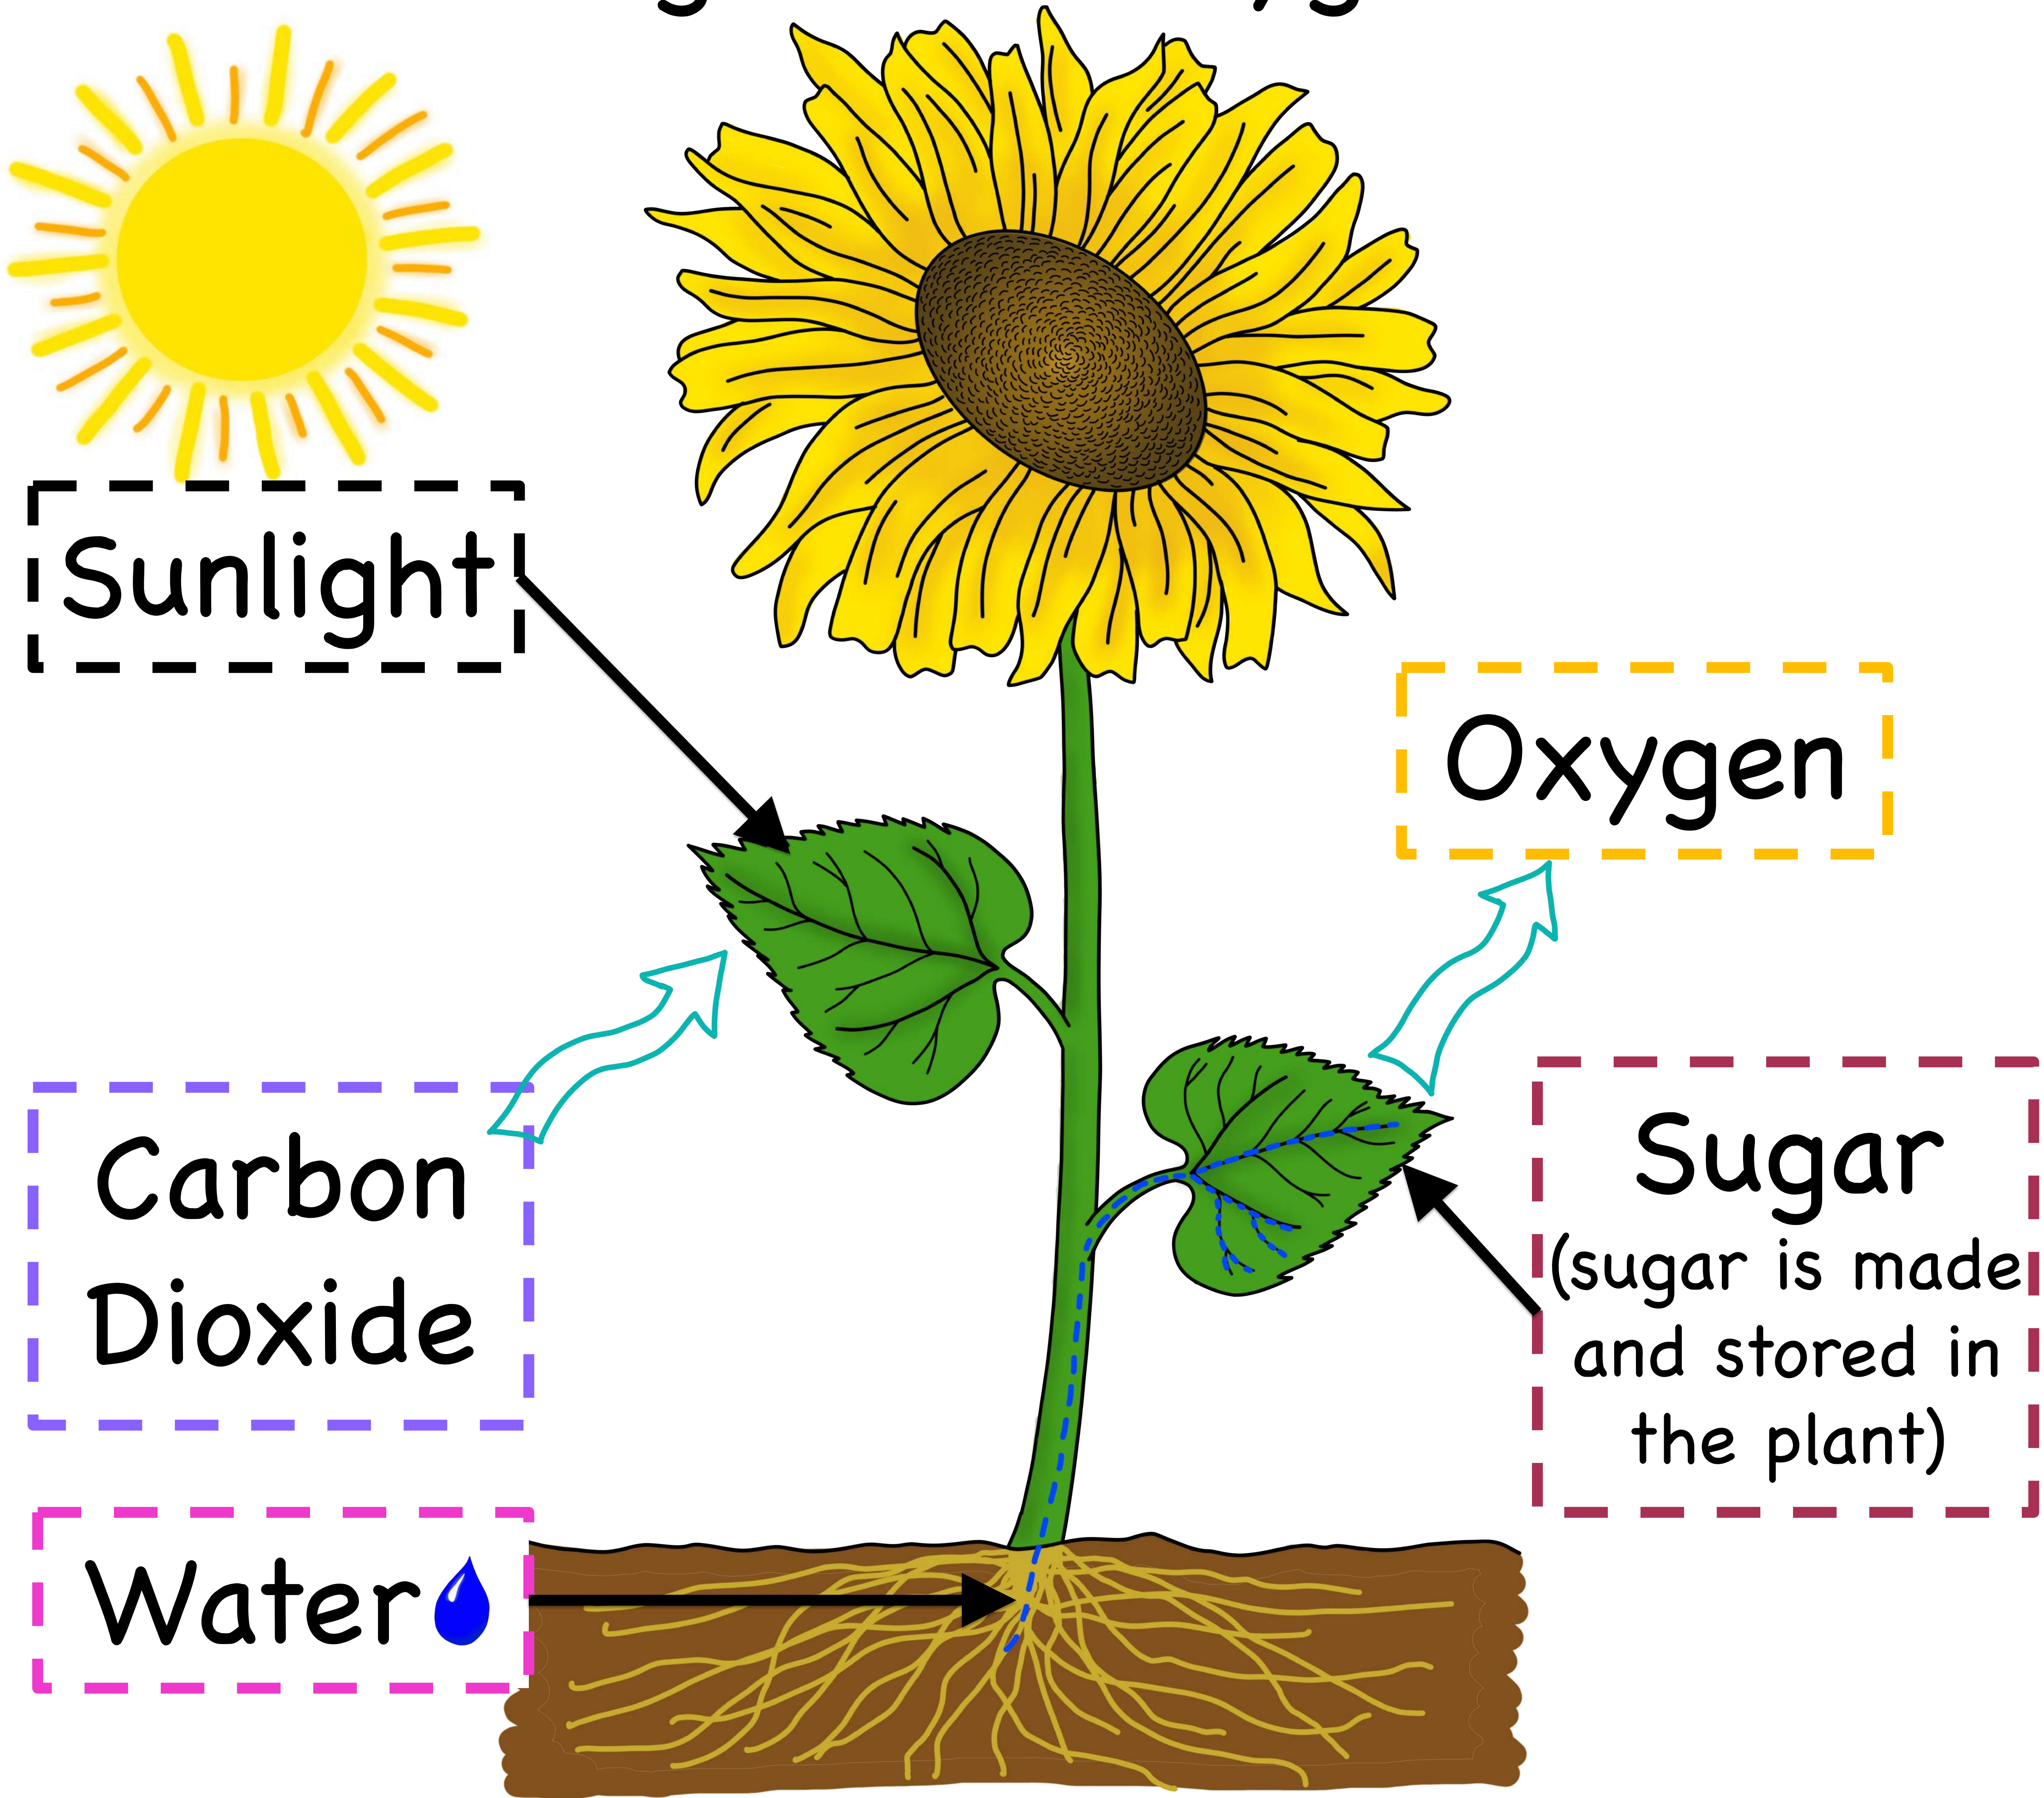

Parts of a Worm

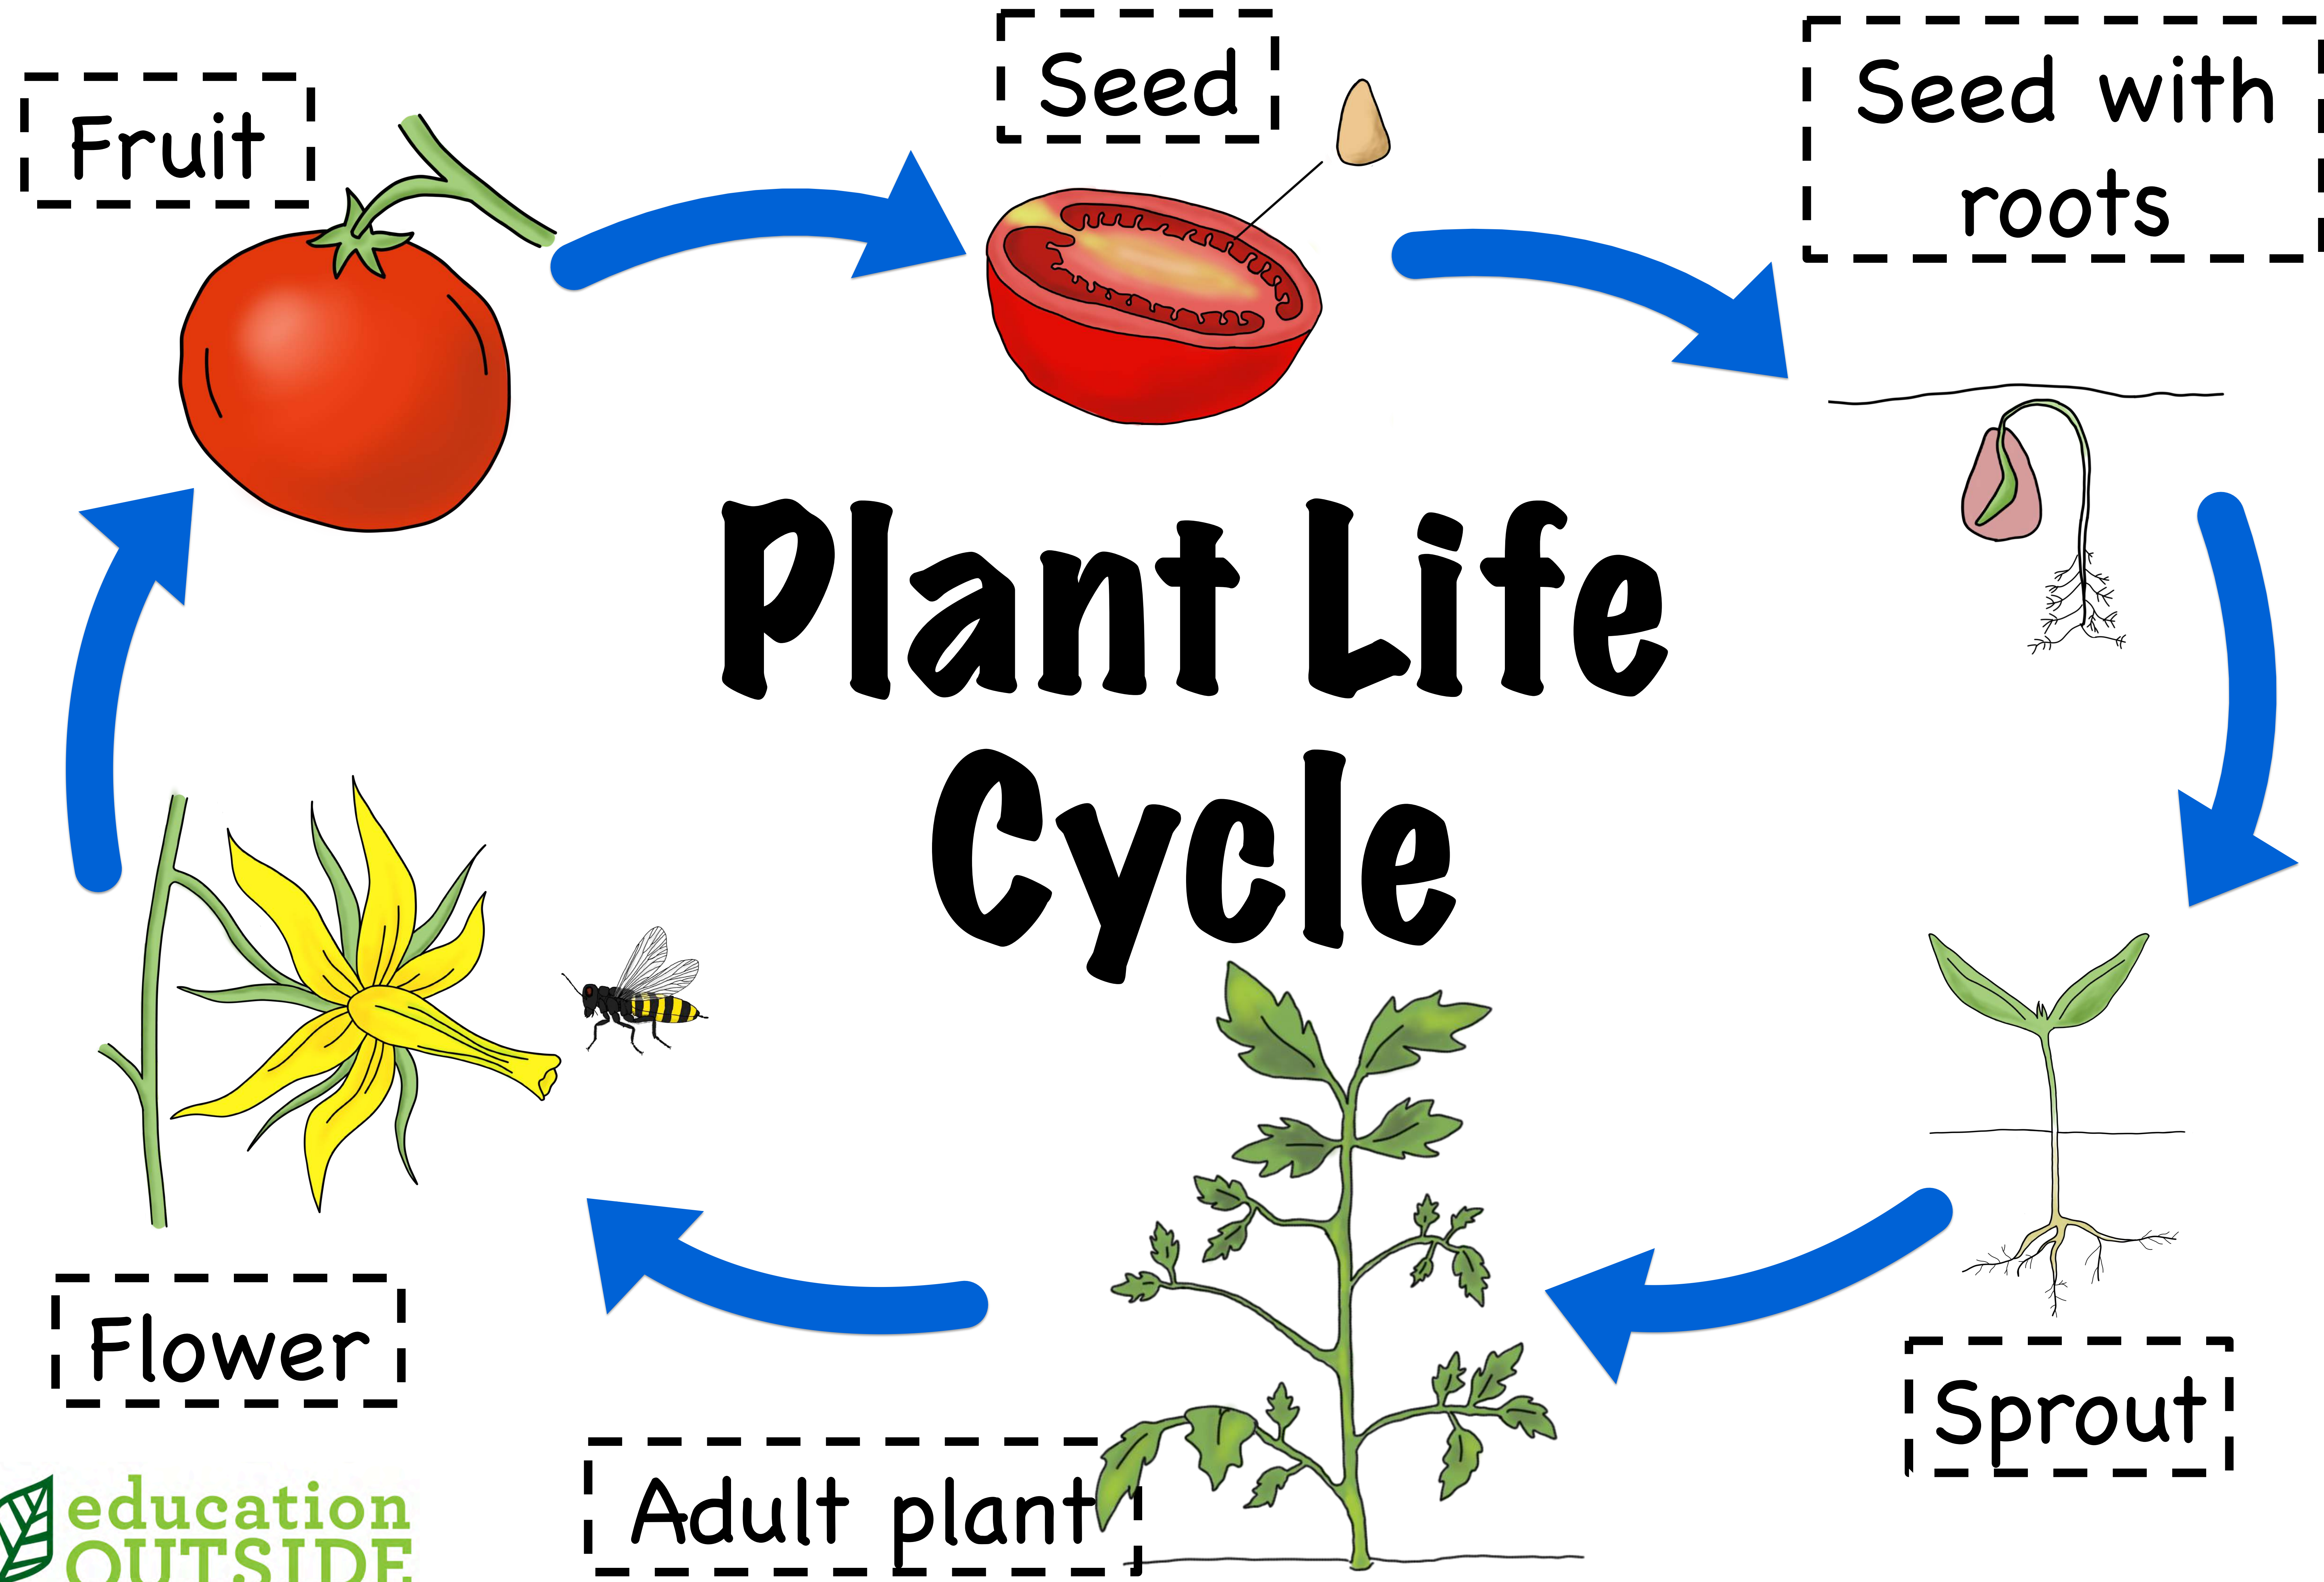

Photosynthesis

- The way plants make their food
- Uses sunlight and carbon dioxide
- Makes sugar and oxygen

Plant Life Cycle

Fruit

Seed

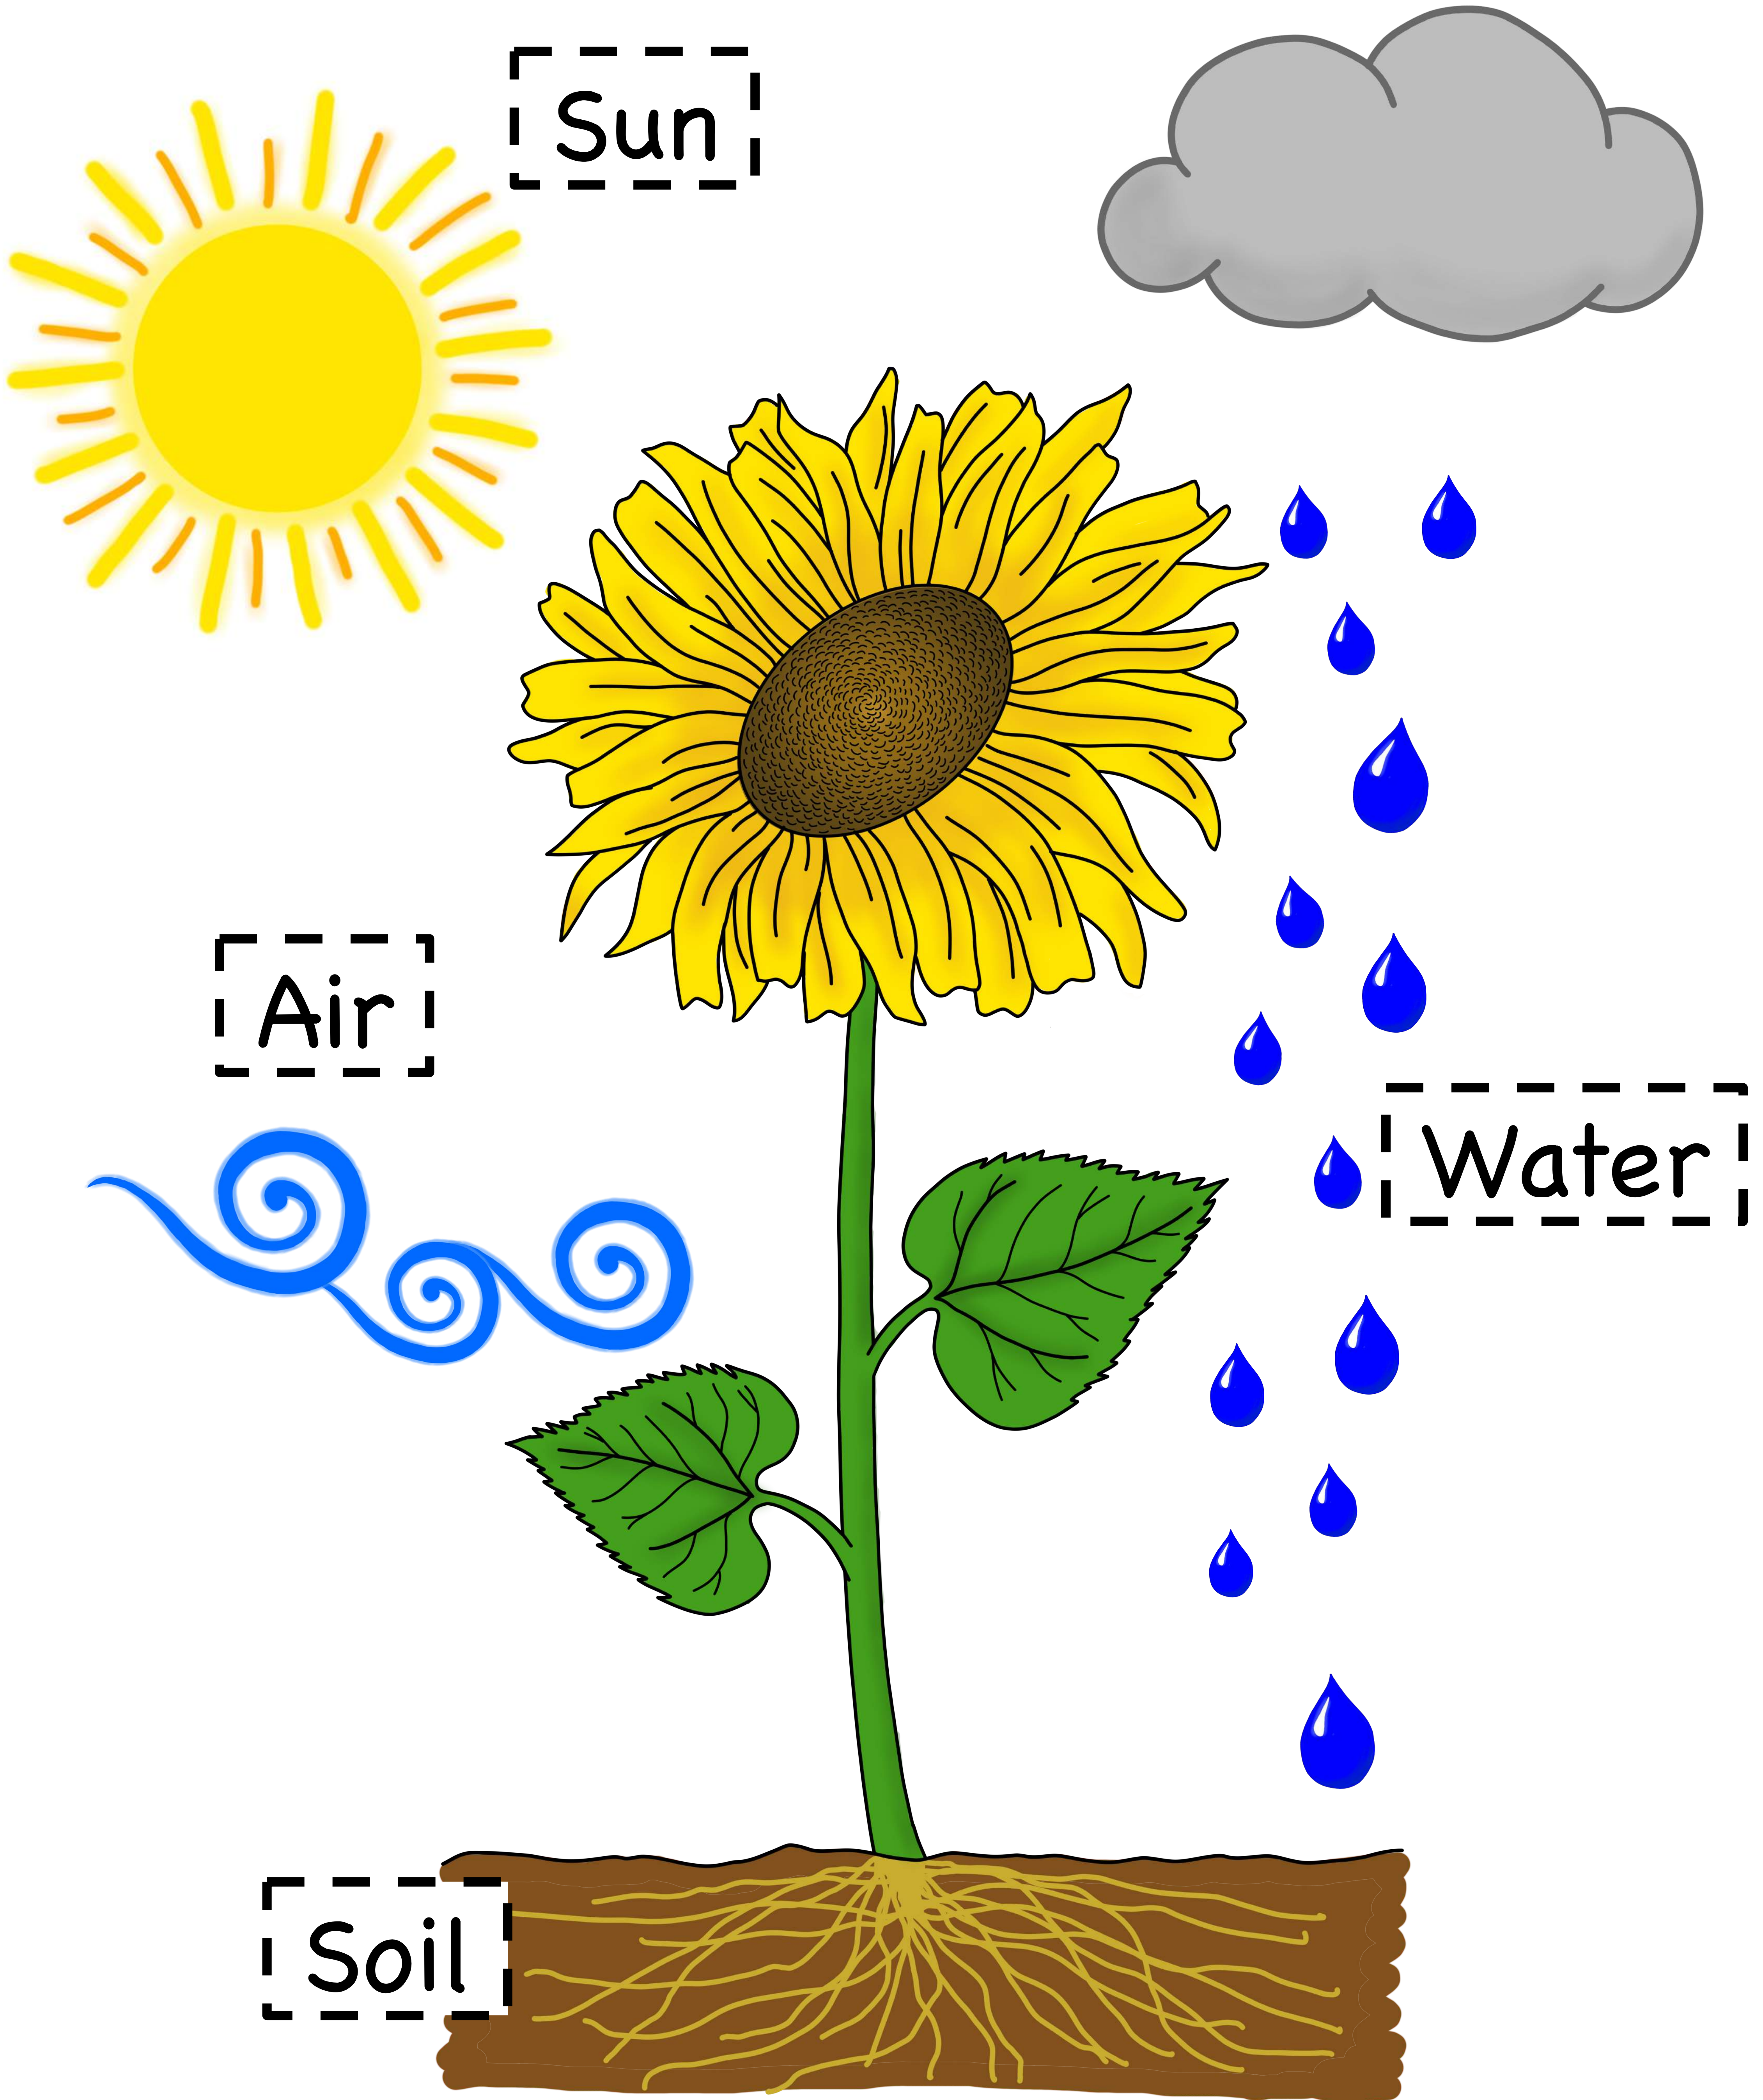

Seed with roots

Flower

Adult plant

Sprout

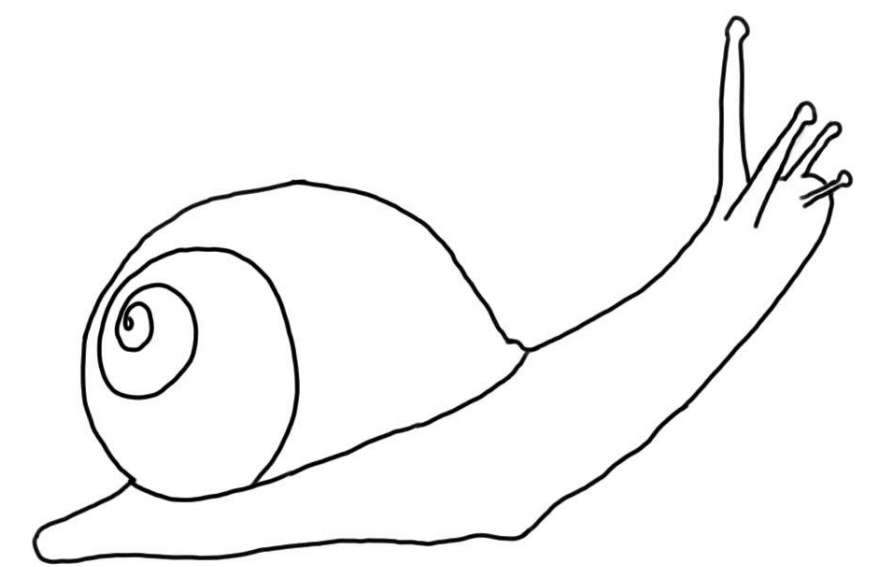

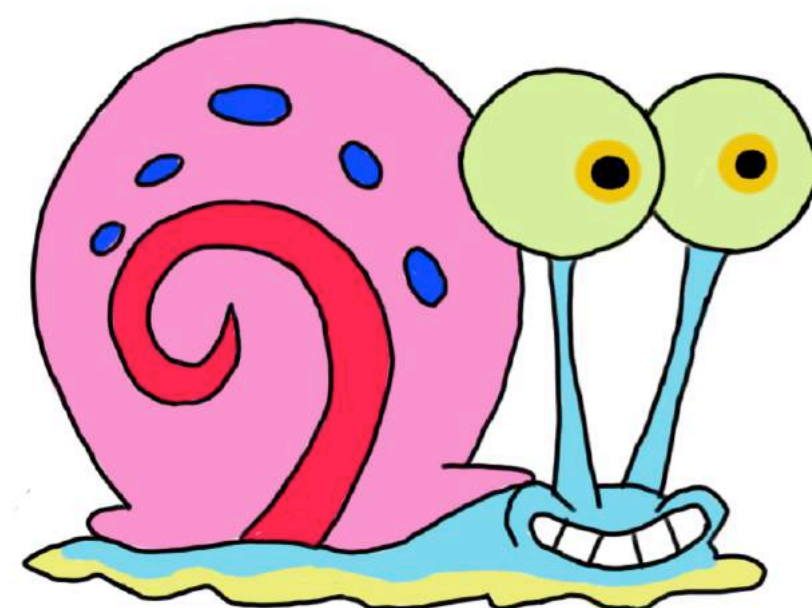

What Do Plants Need?

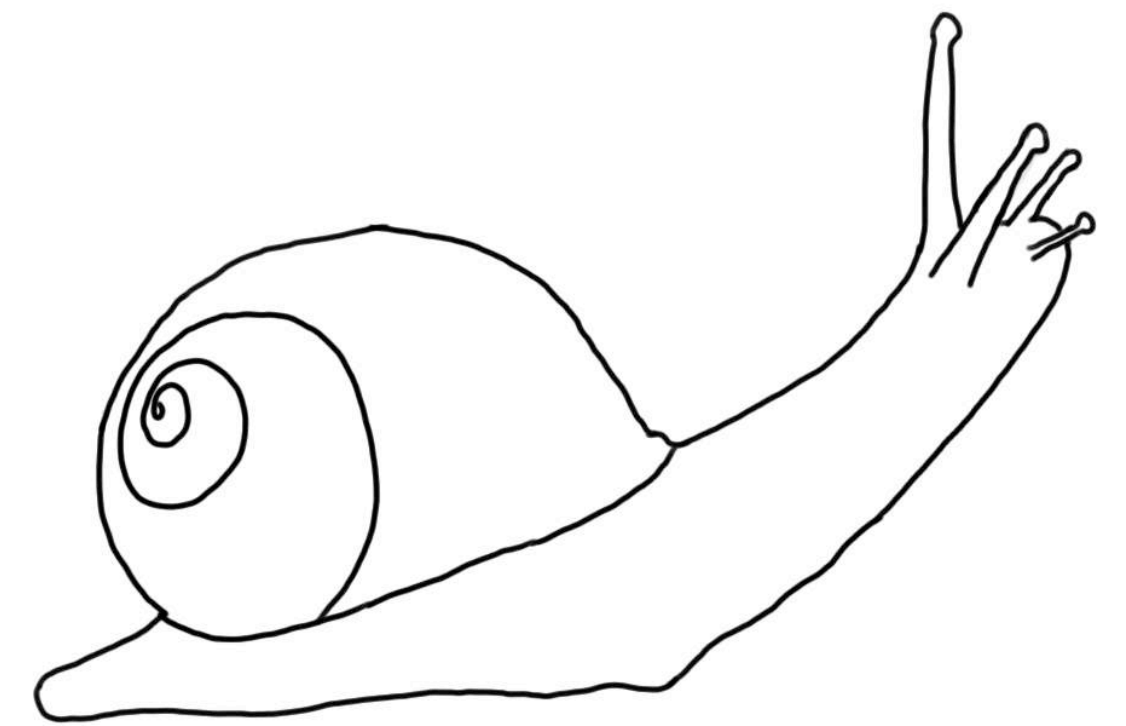

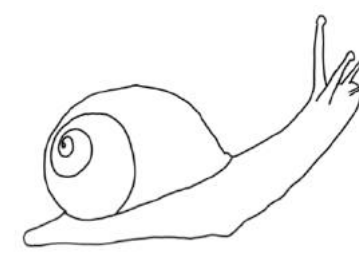

Draw Like A Scientist!

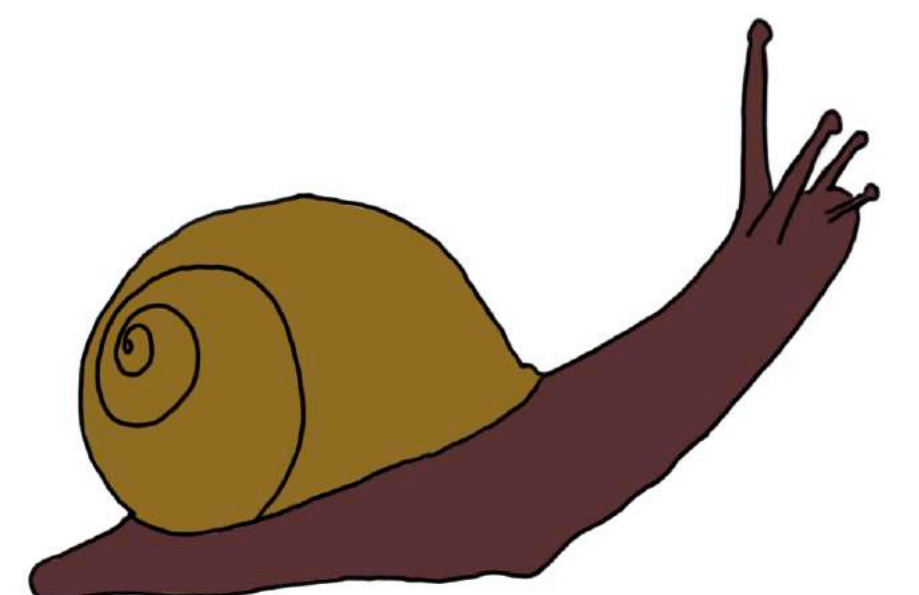

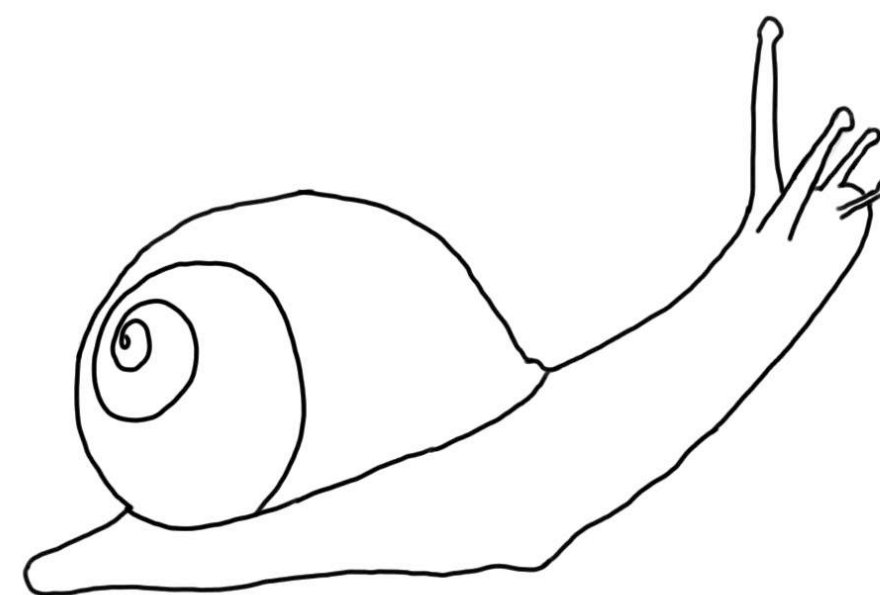

Accurate

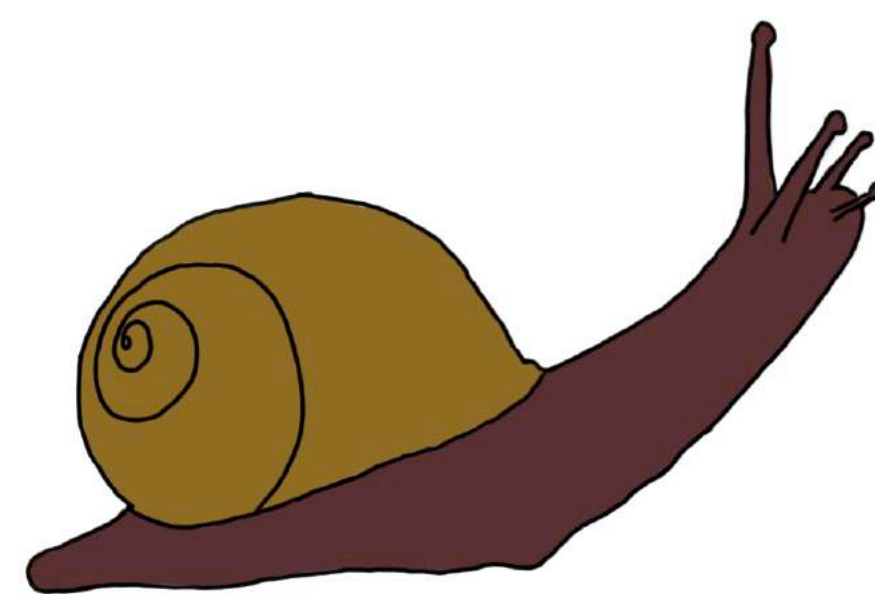

Big

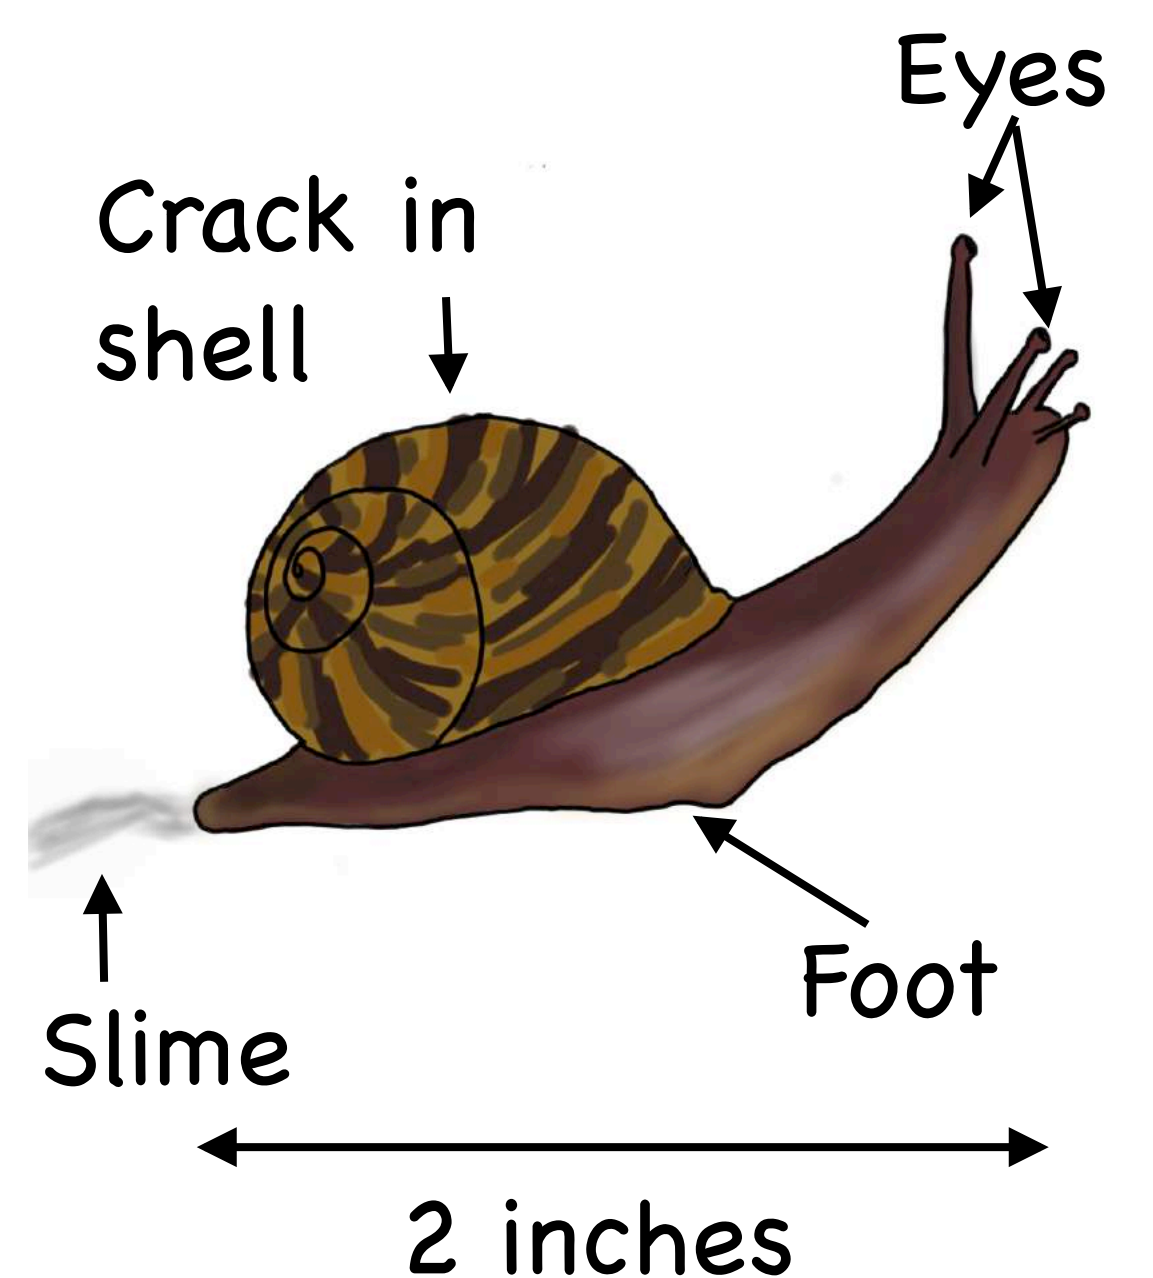

Colorful

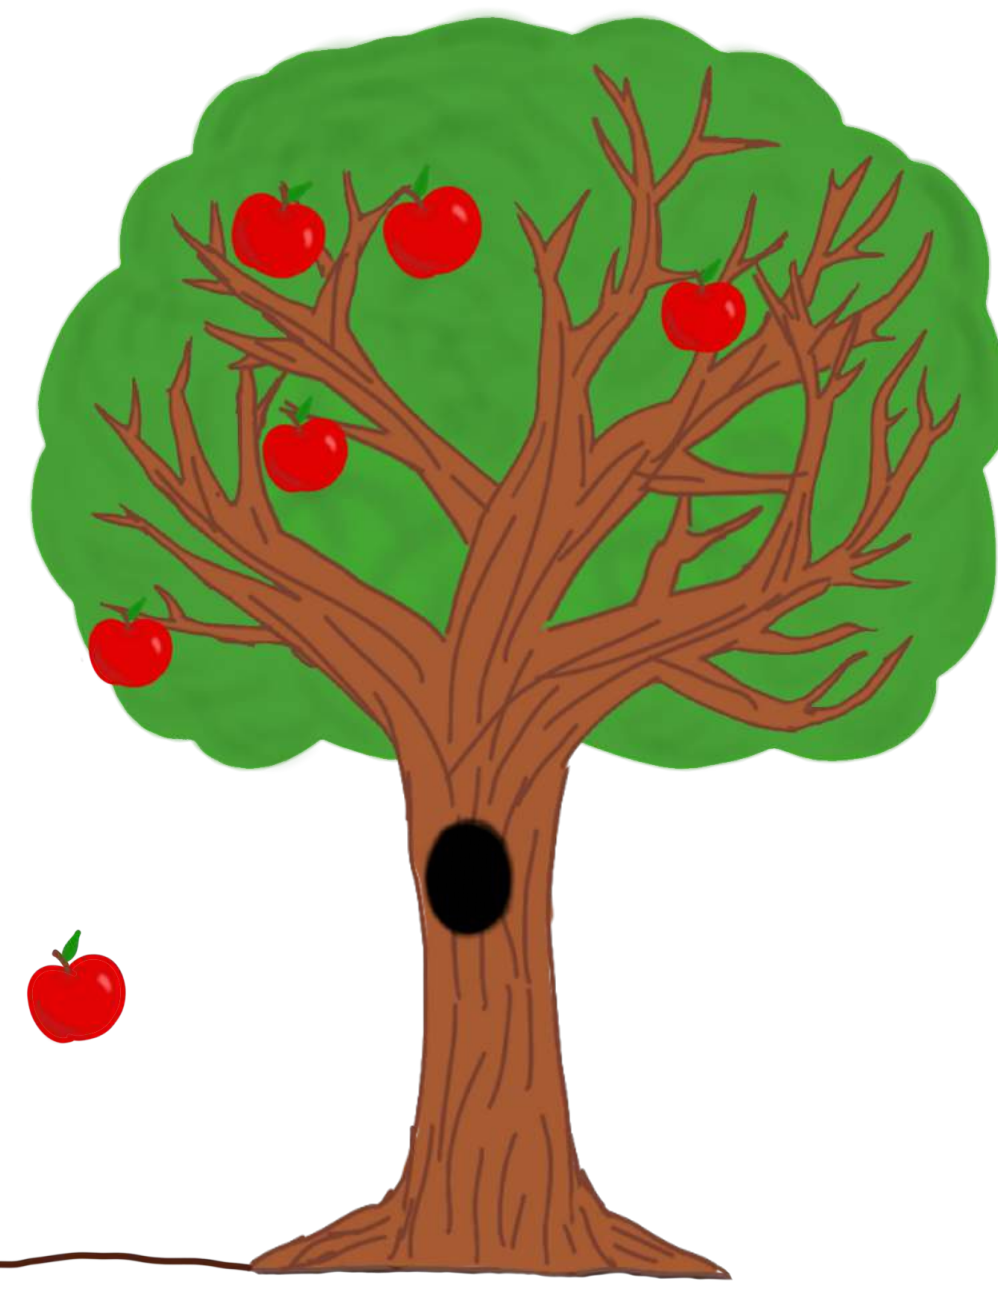

Detailed

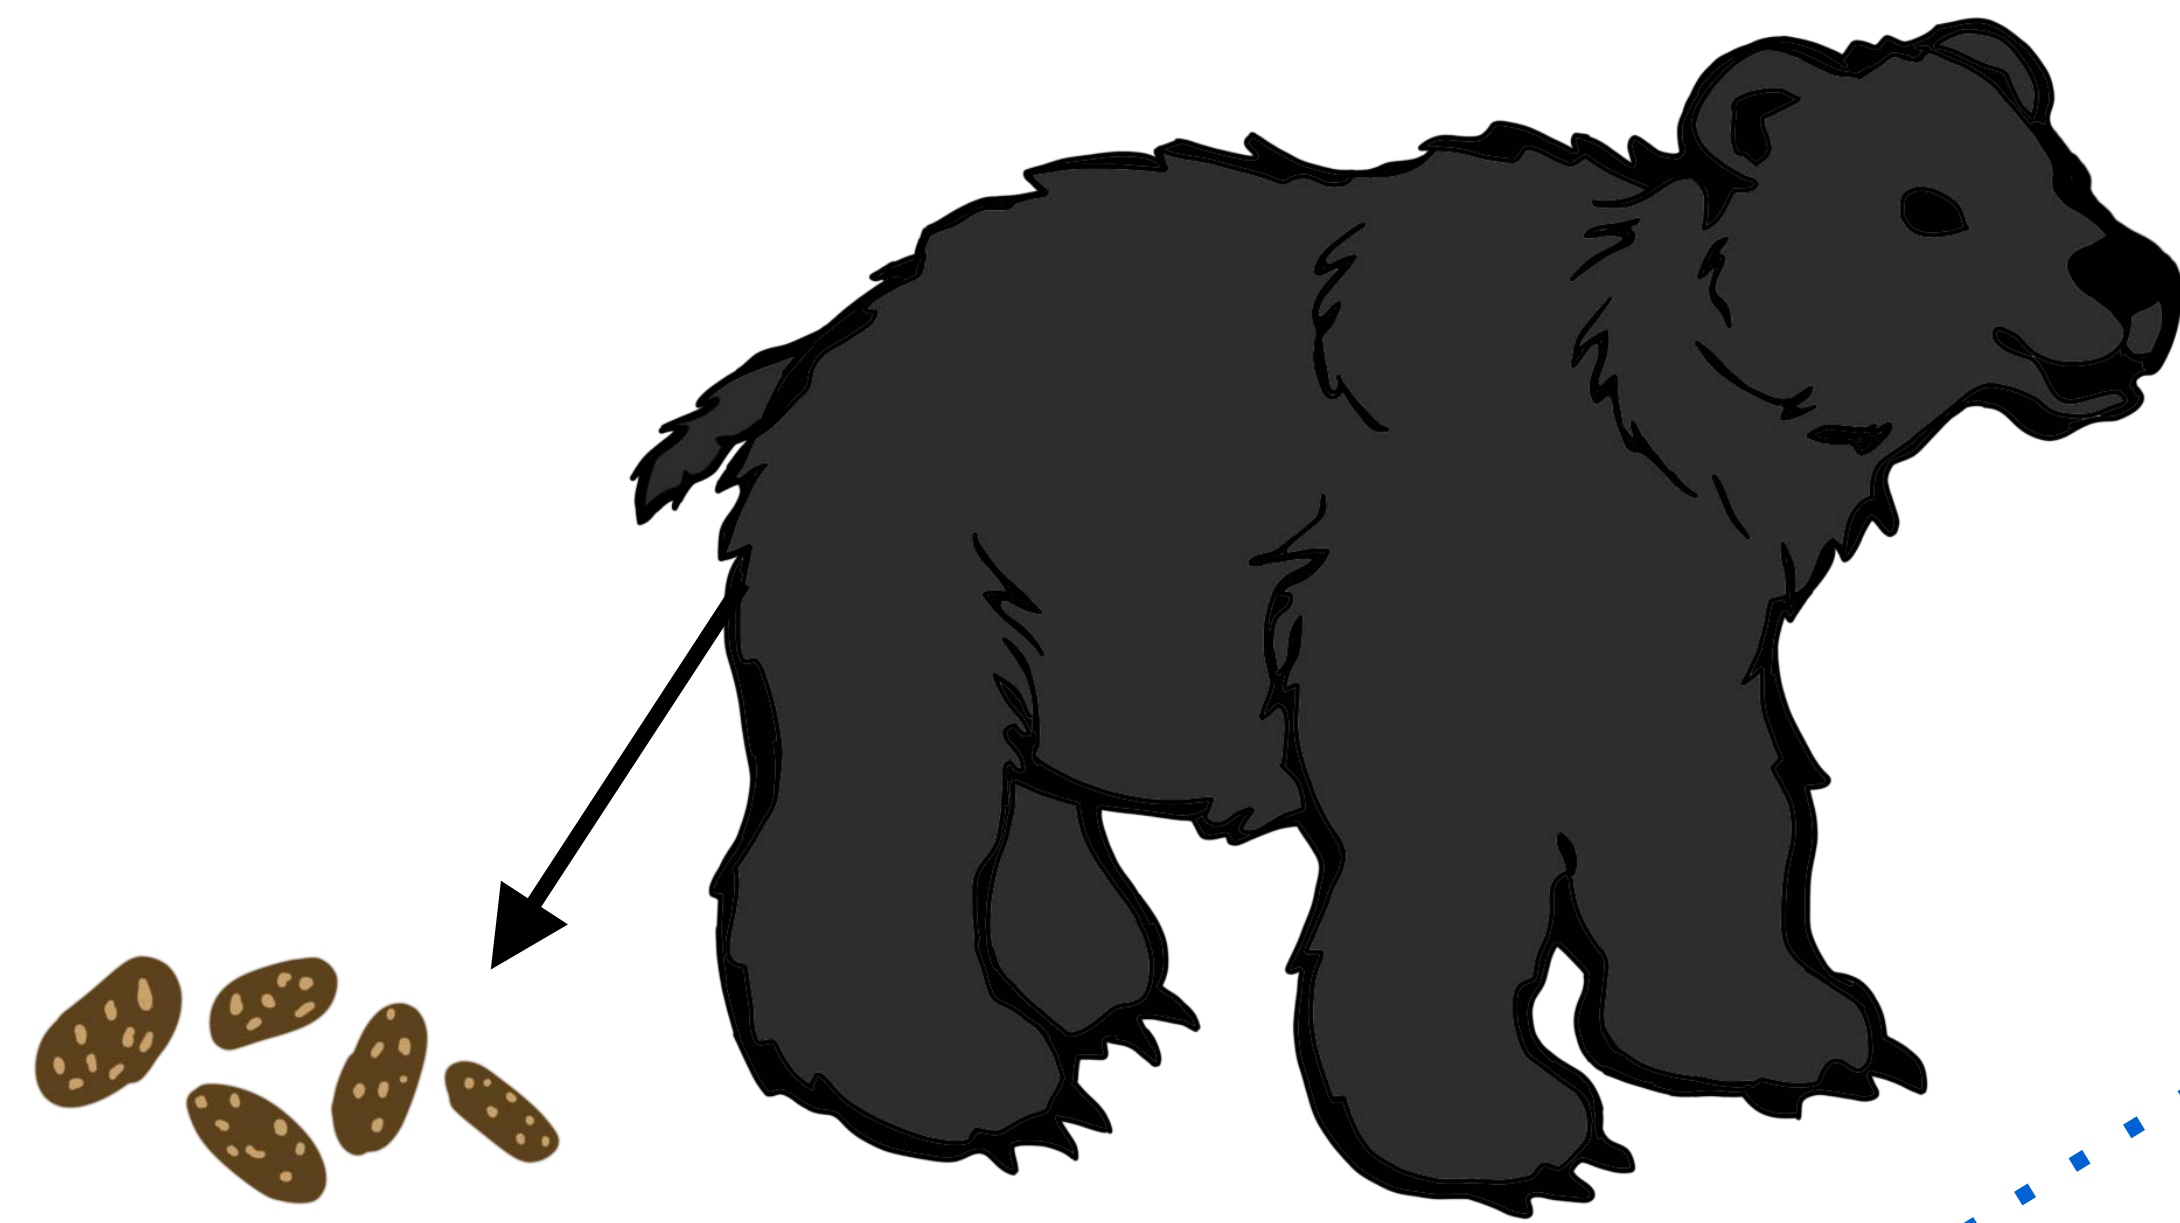

Explained

Dropping
and Rolling

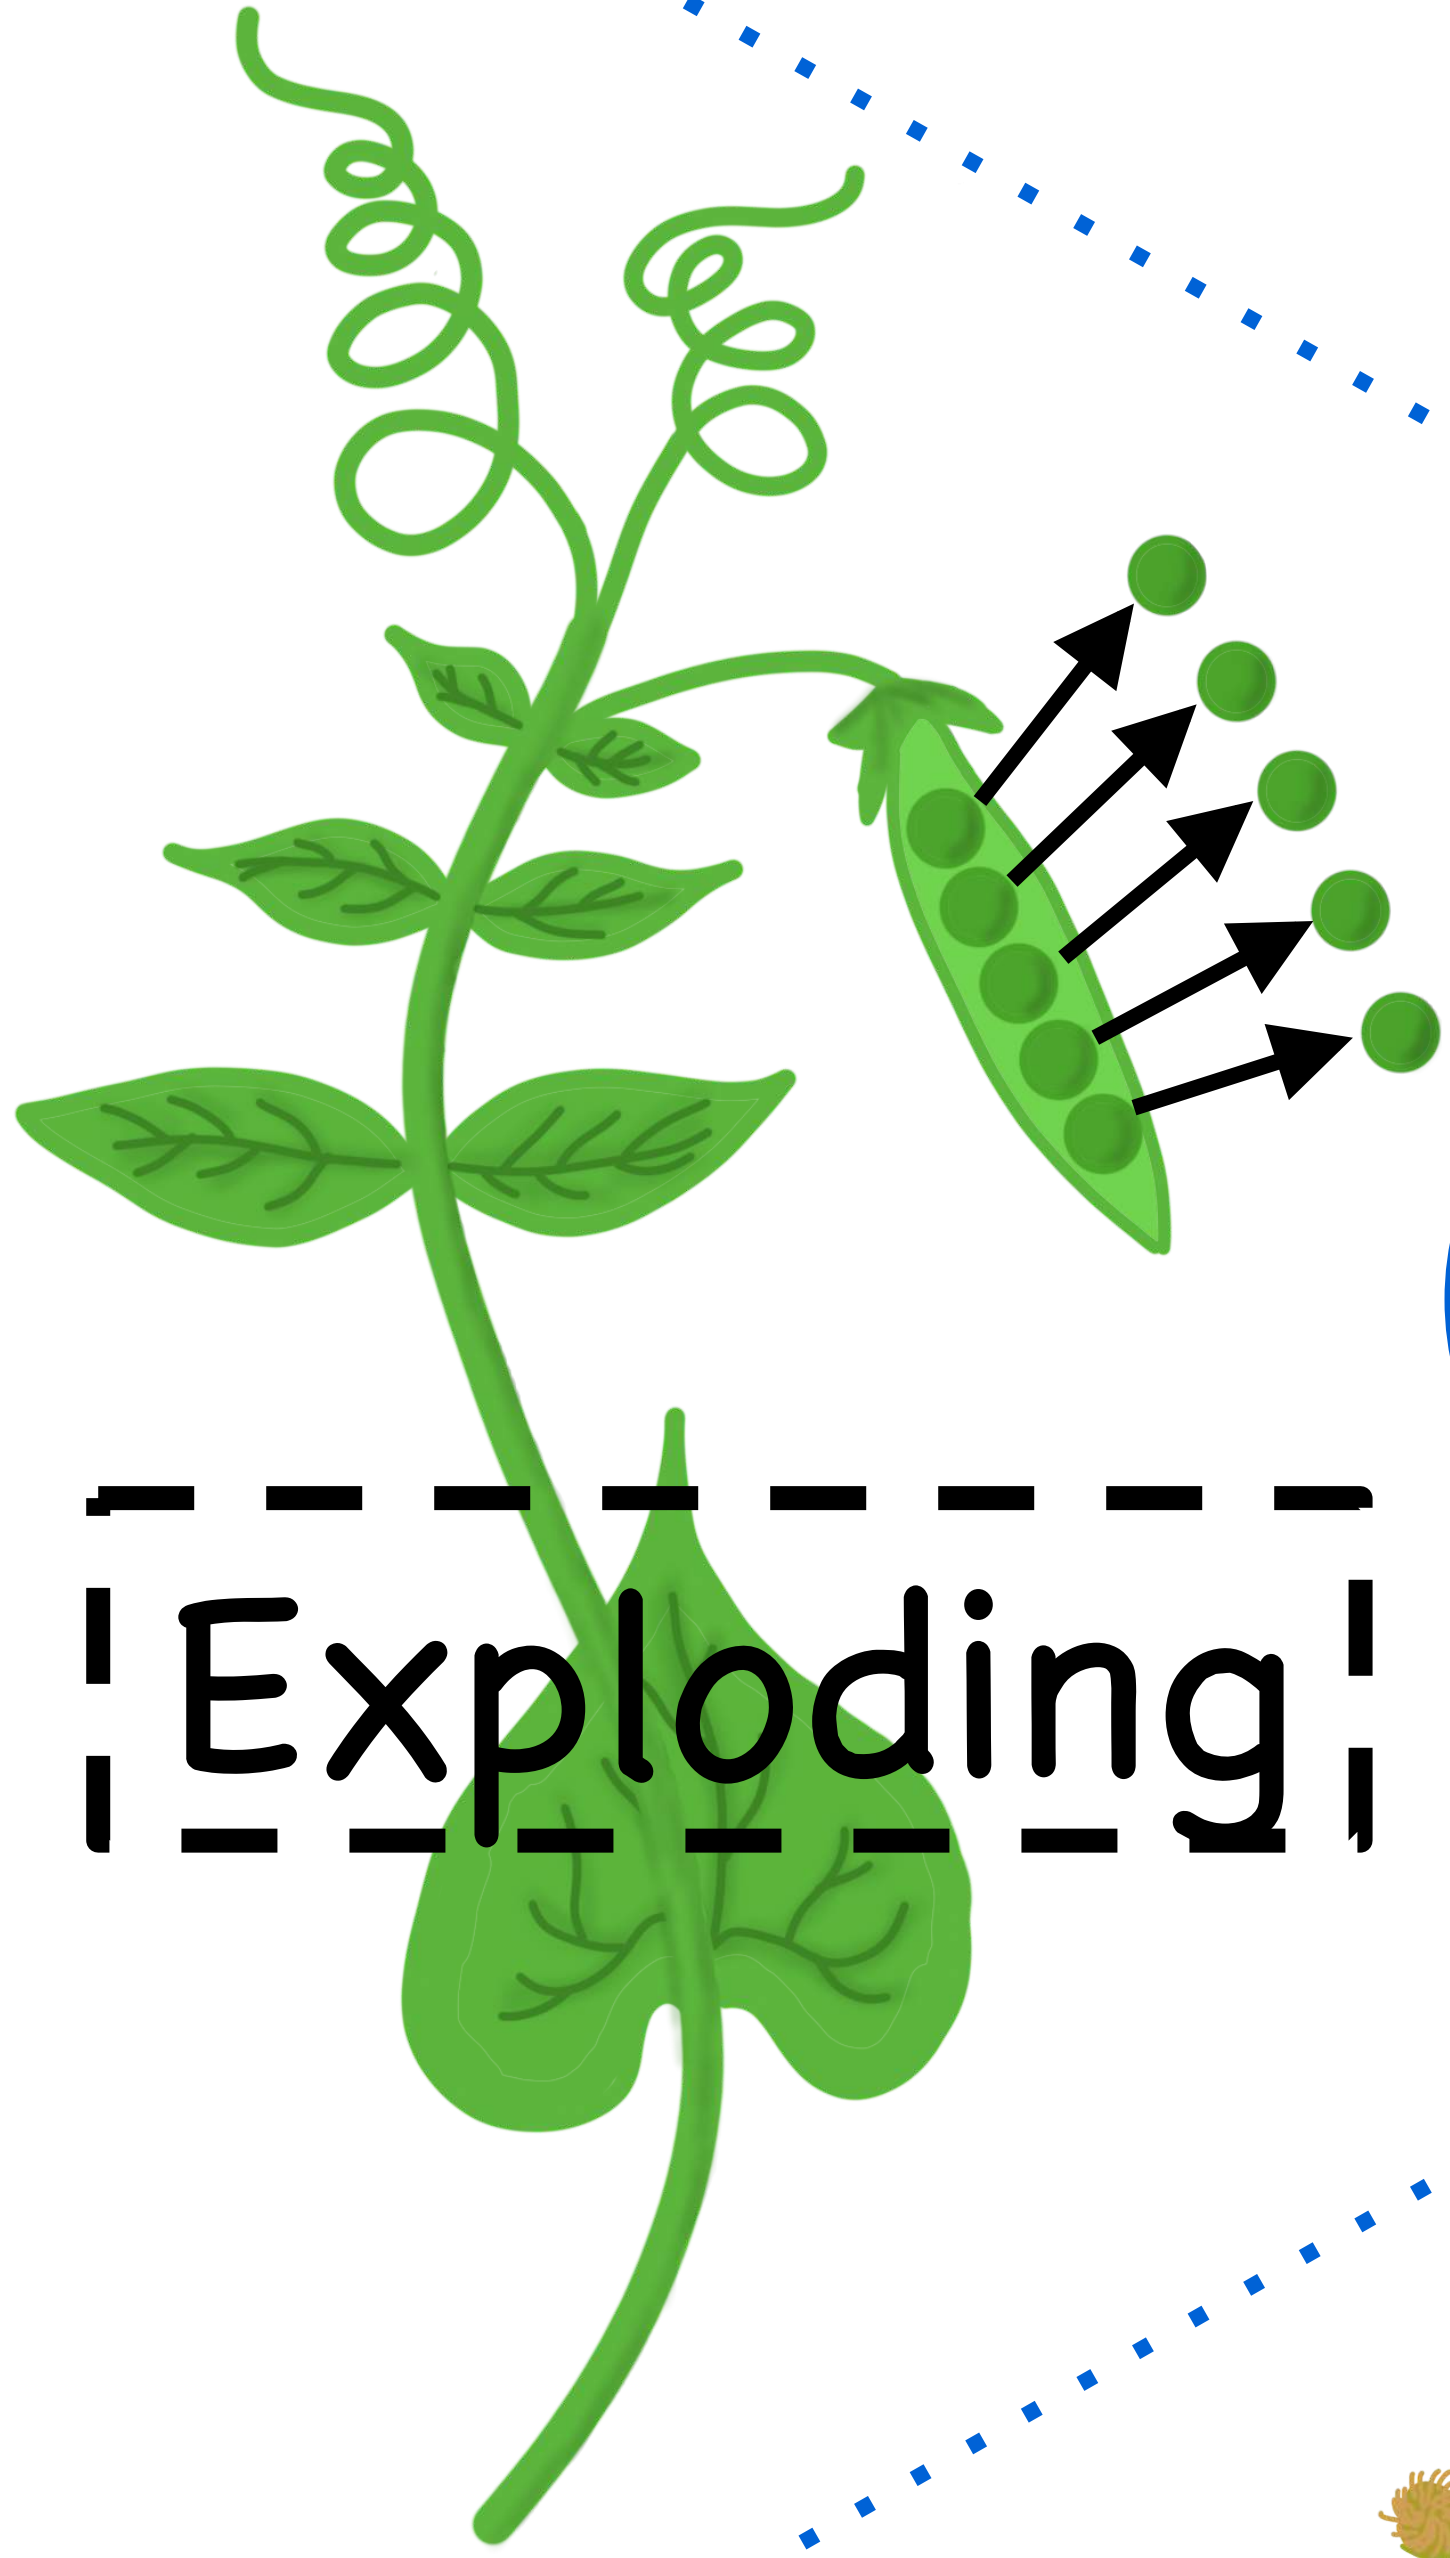

Pooping

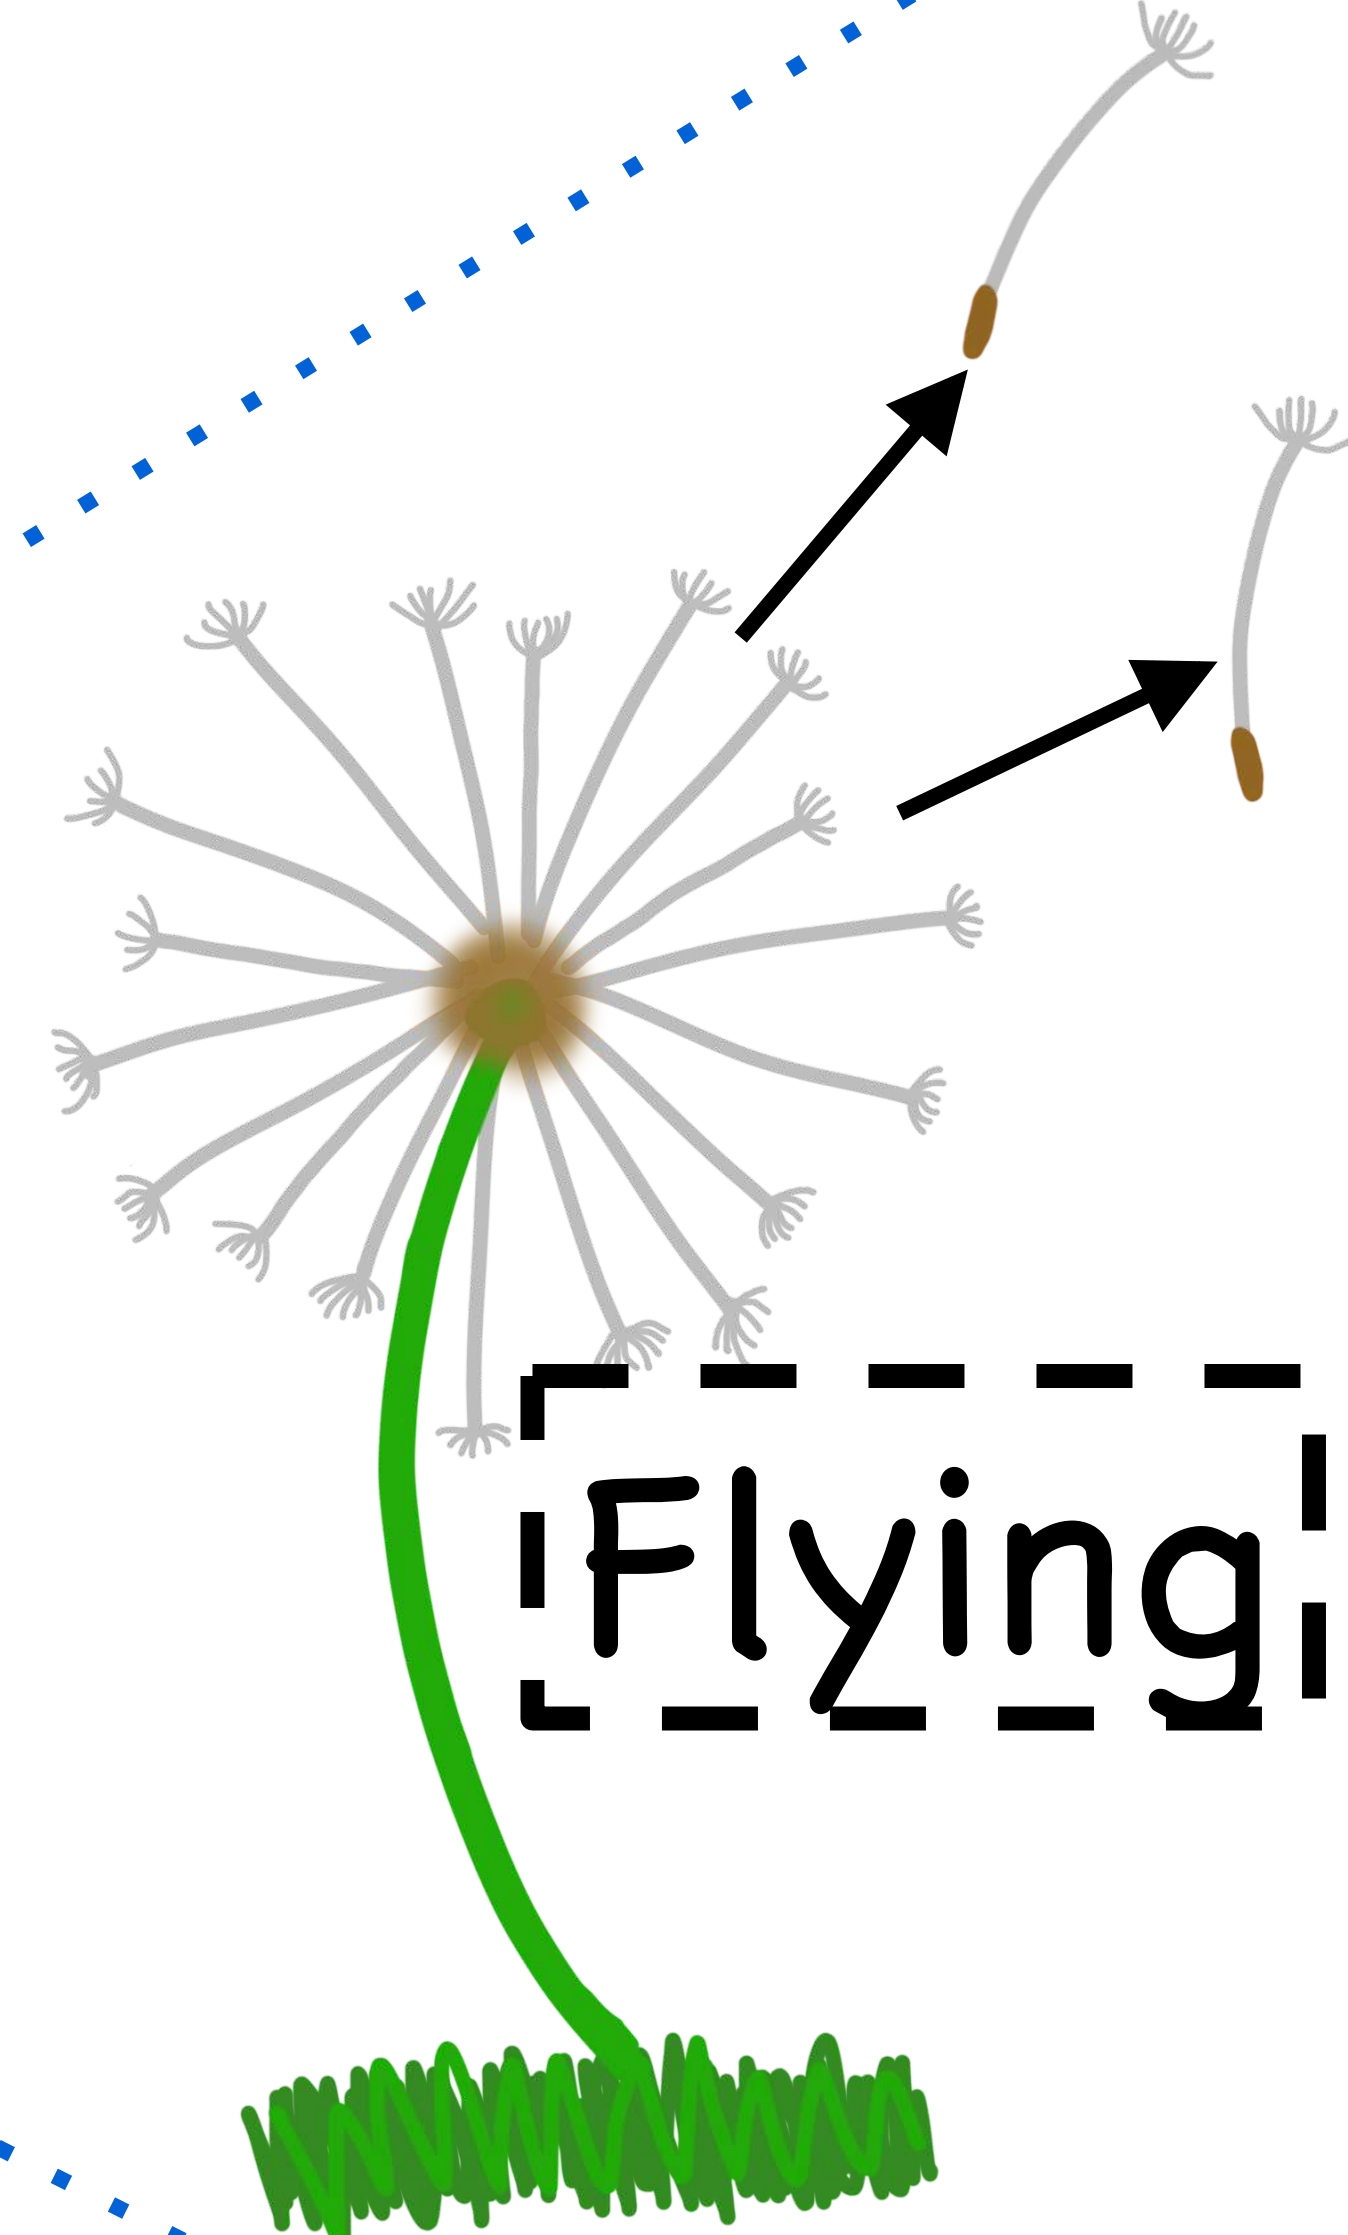

How Do Seeds Travel?

Exploding

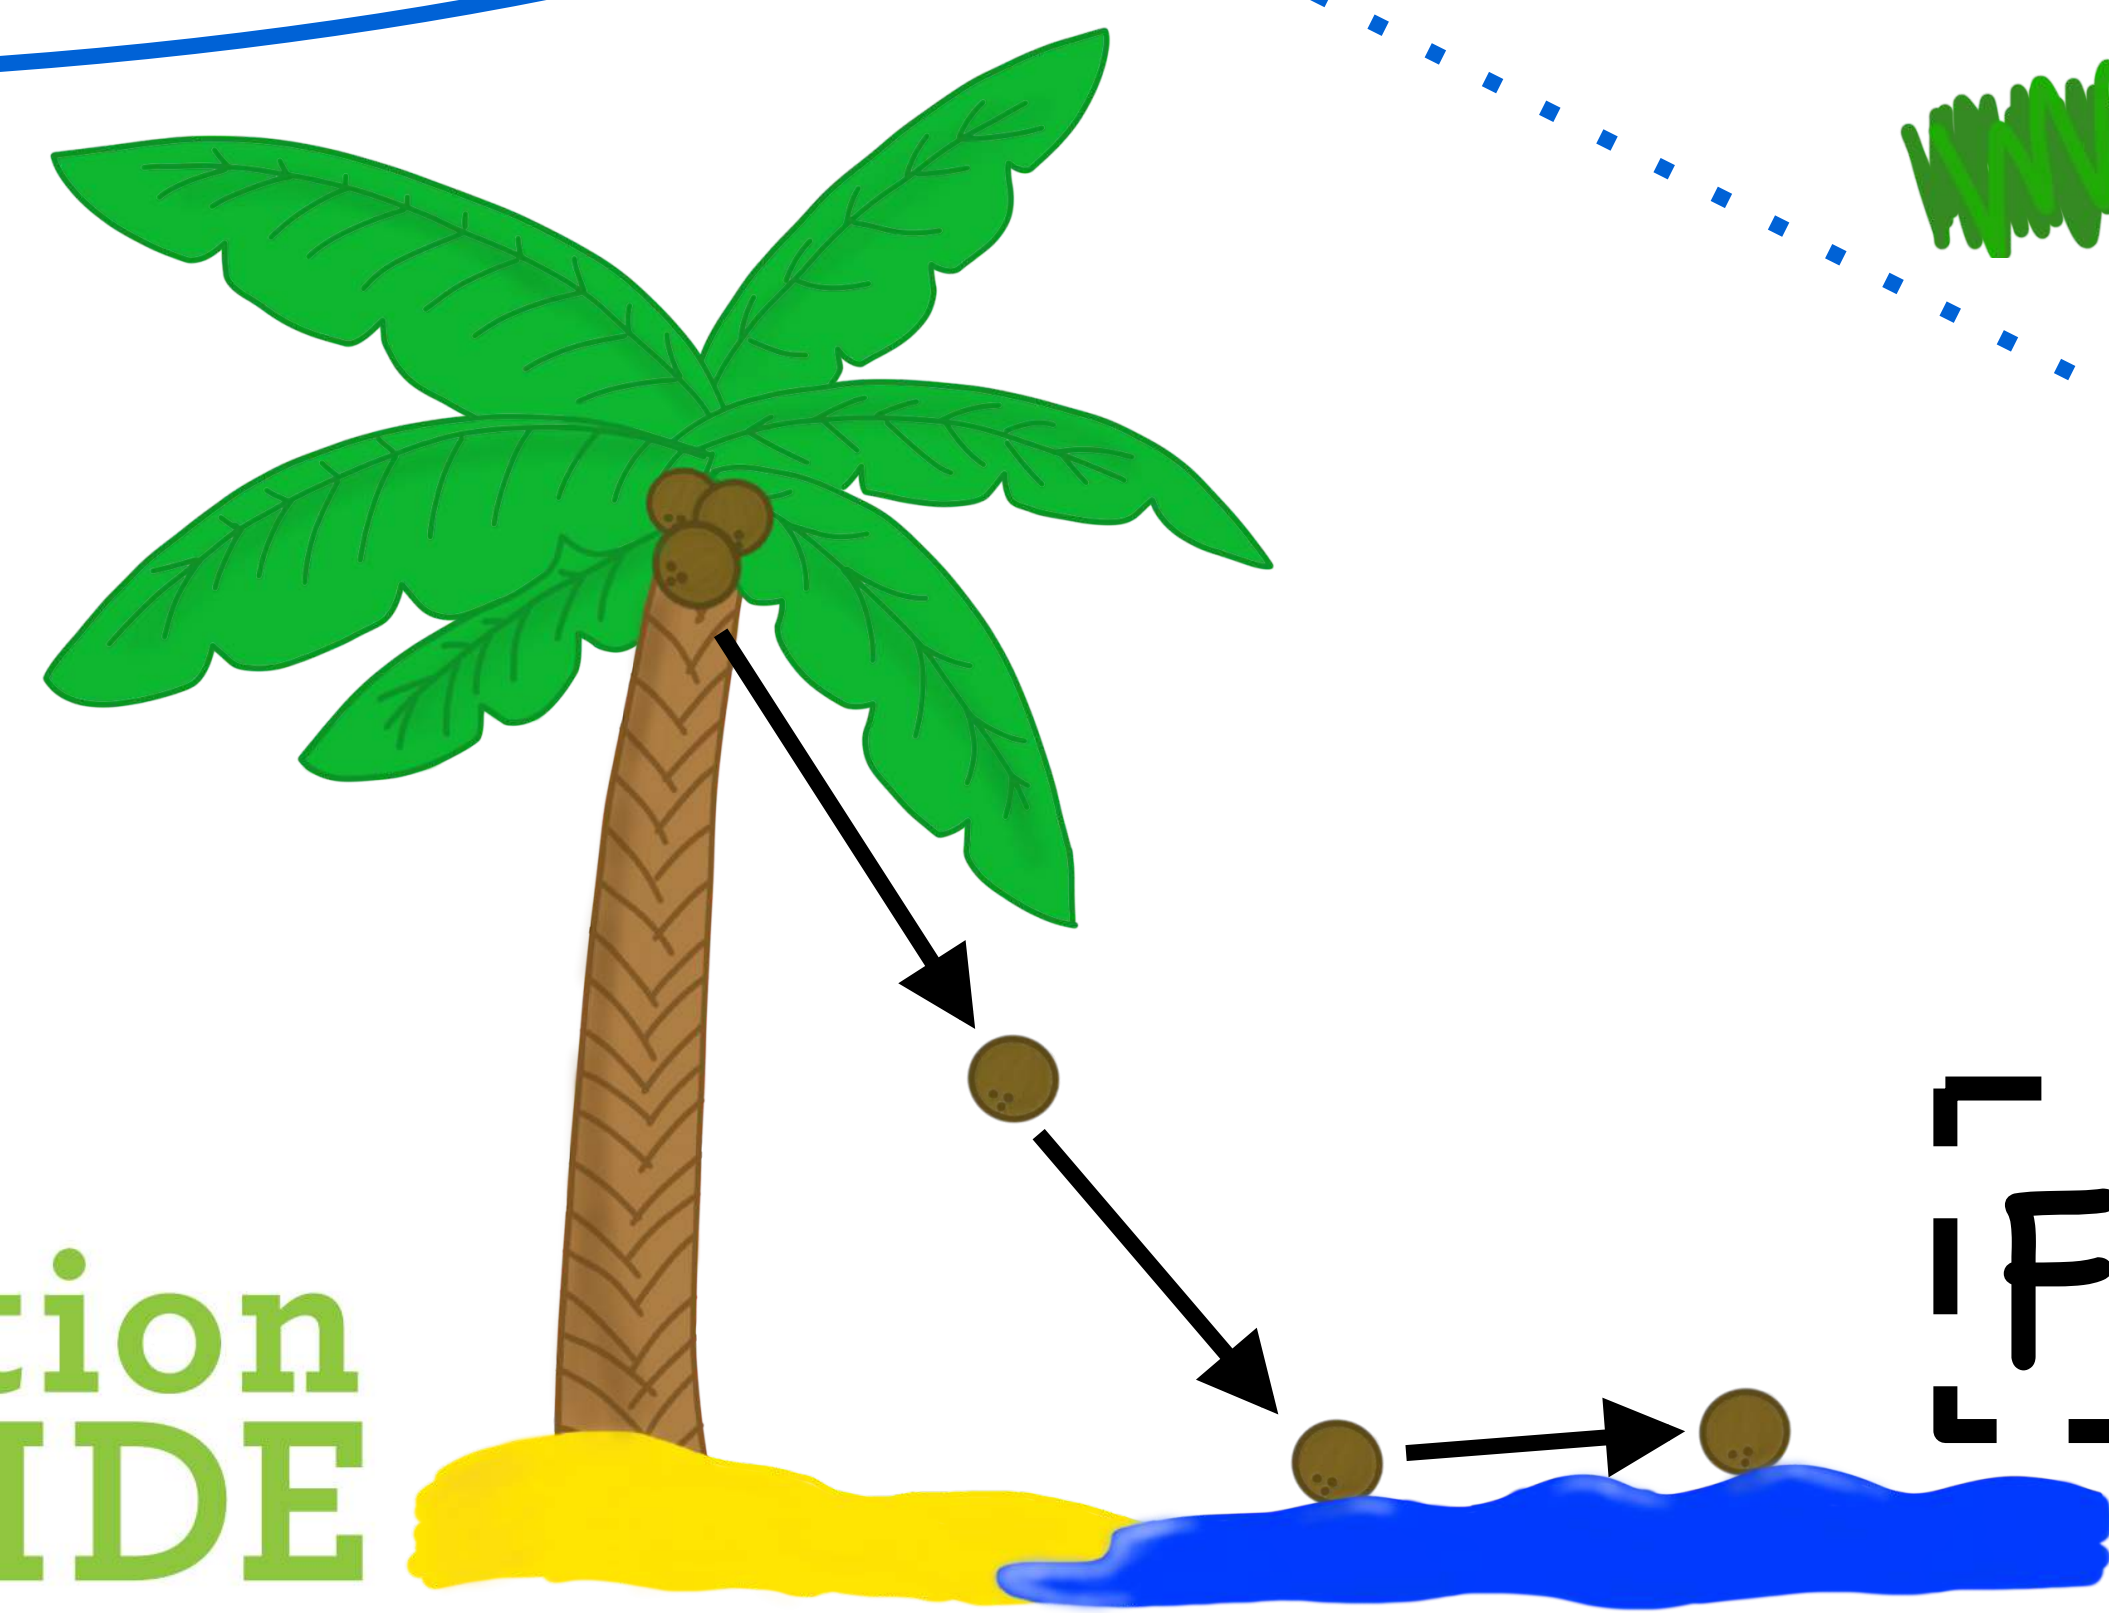

Flying

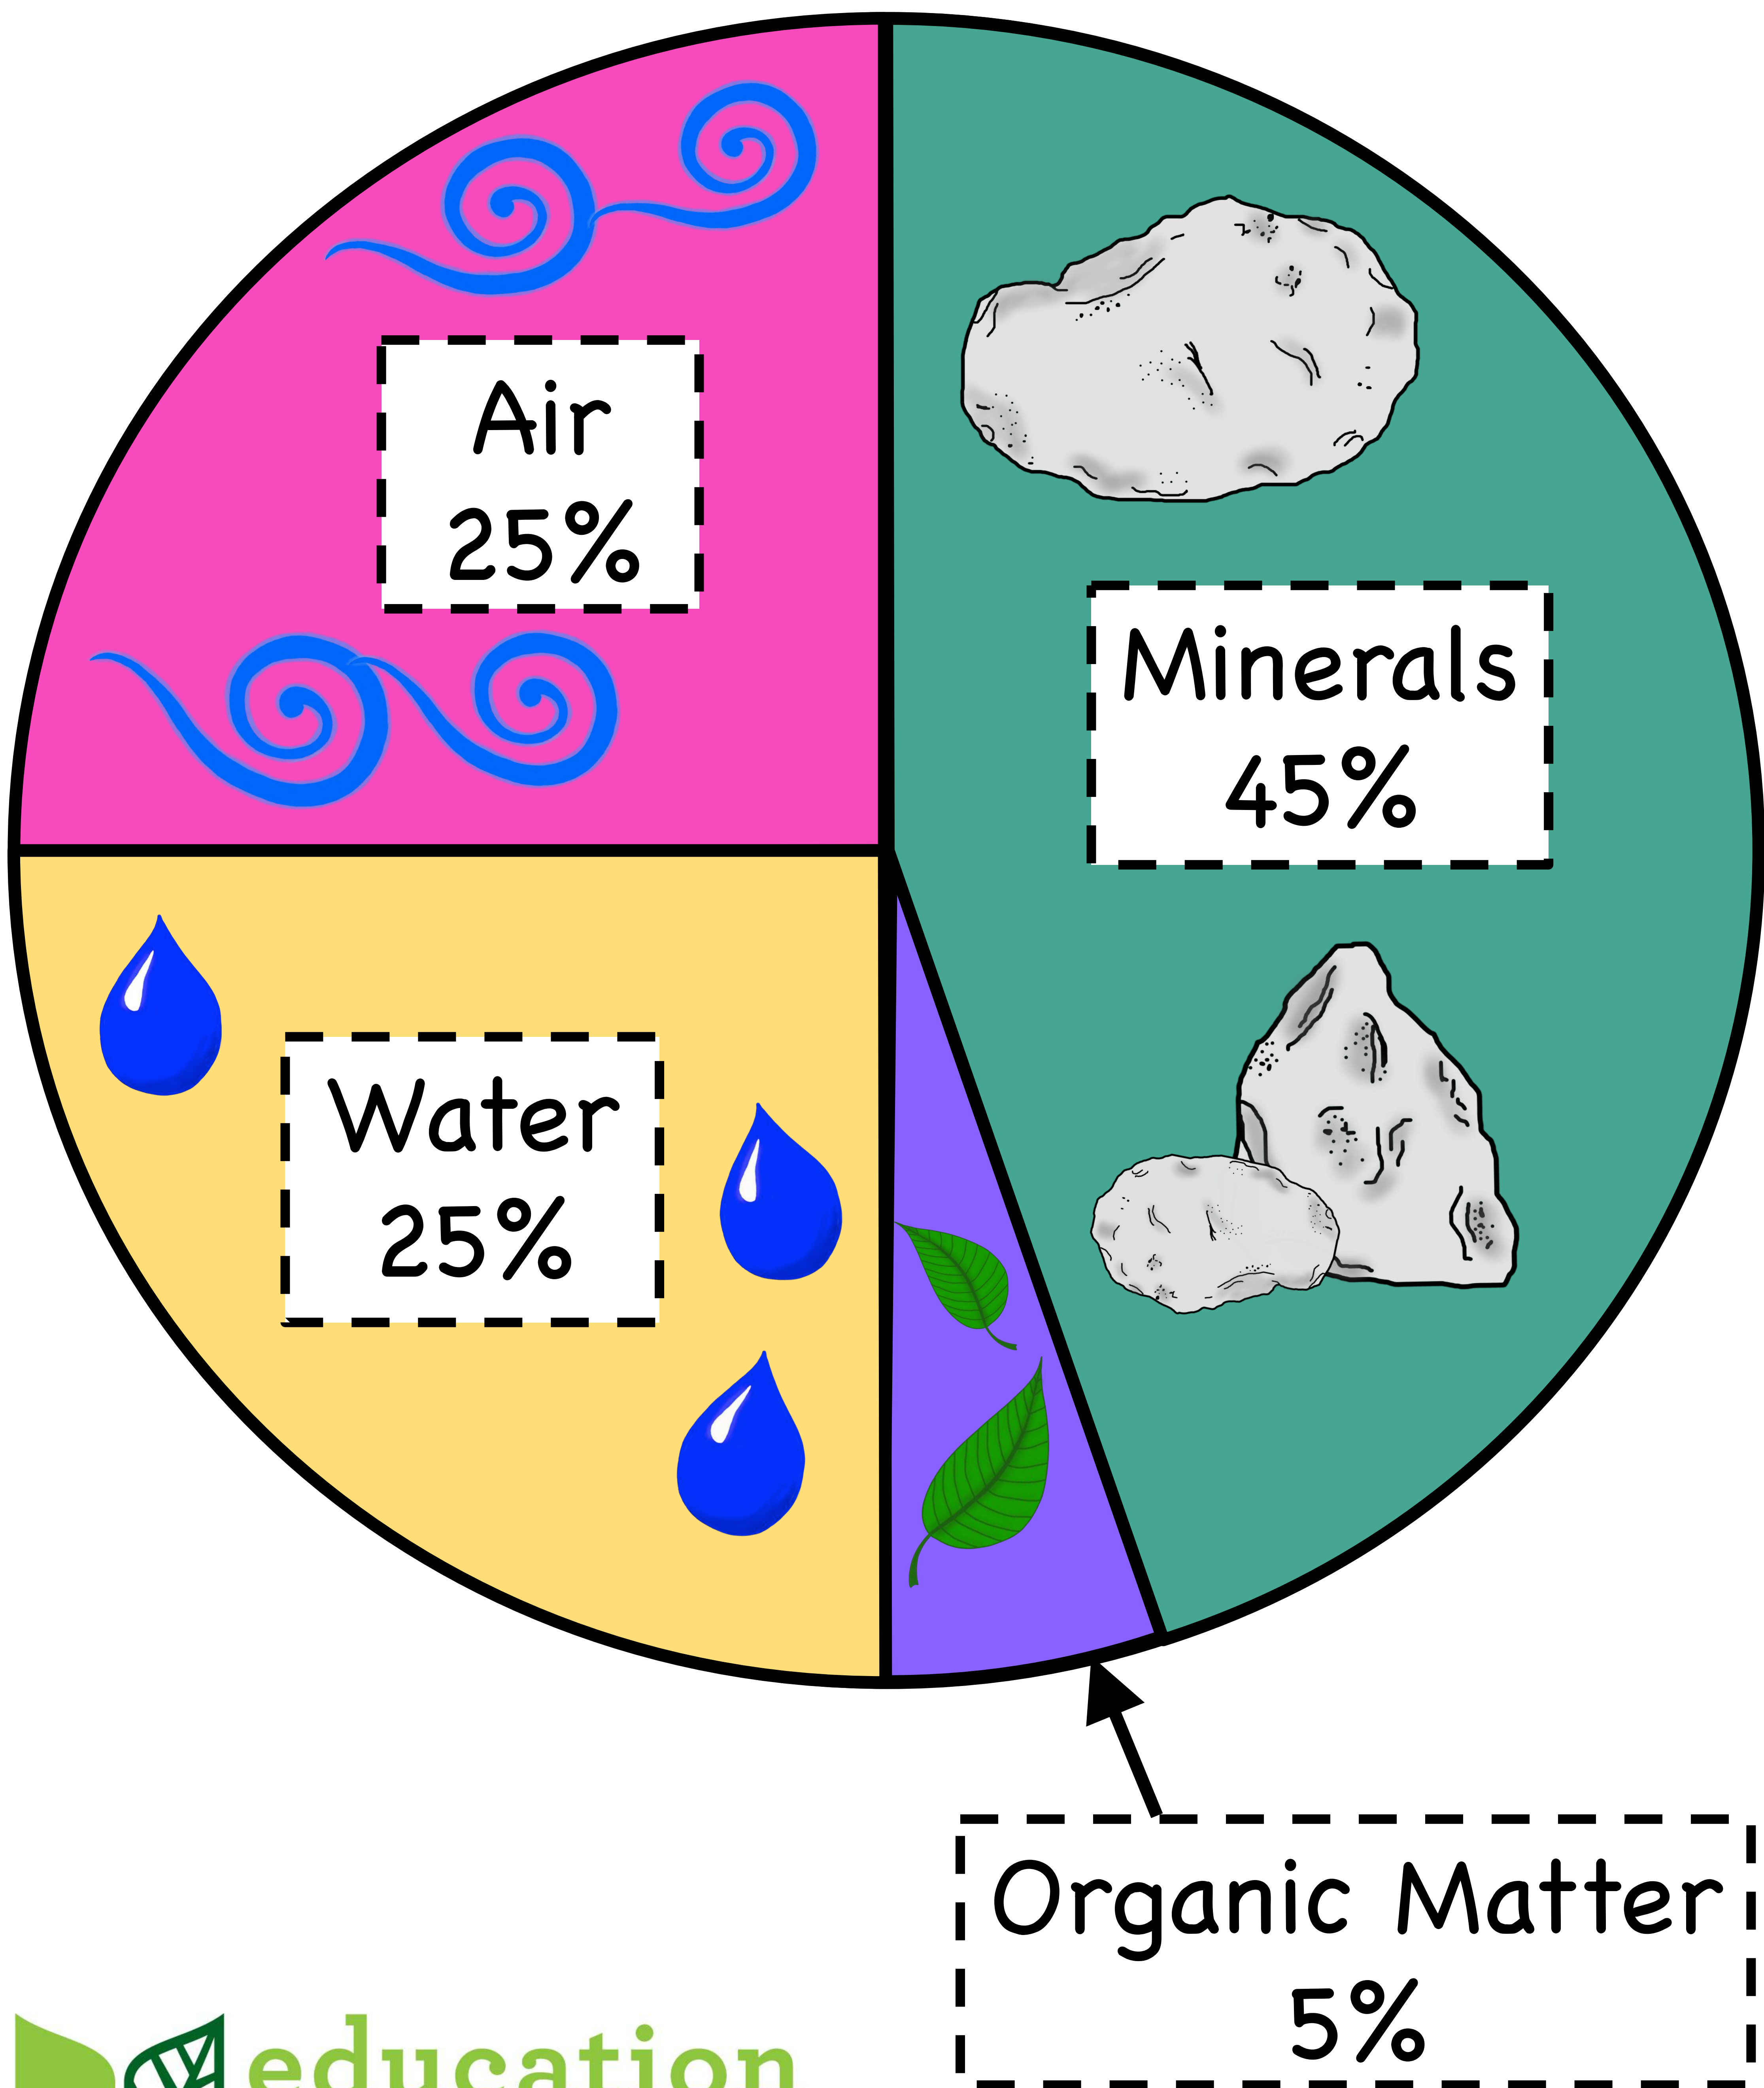

Hitchhiking

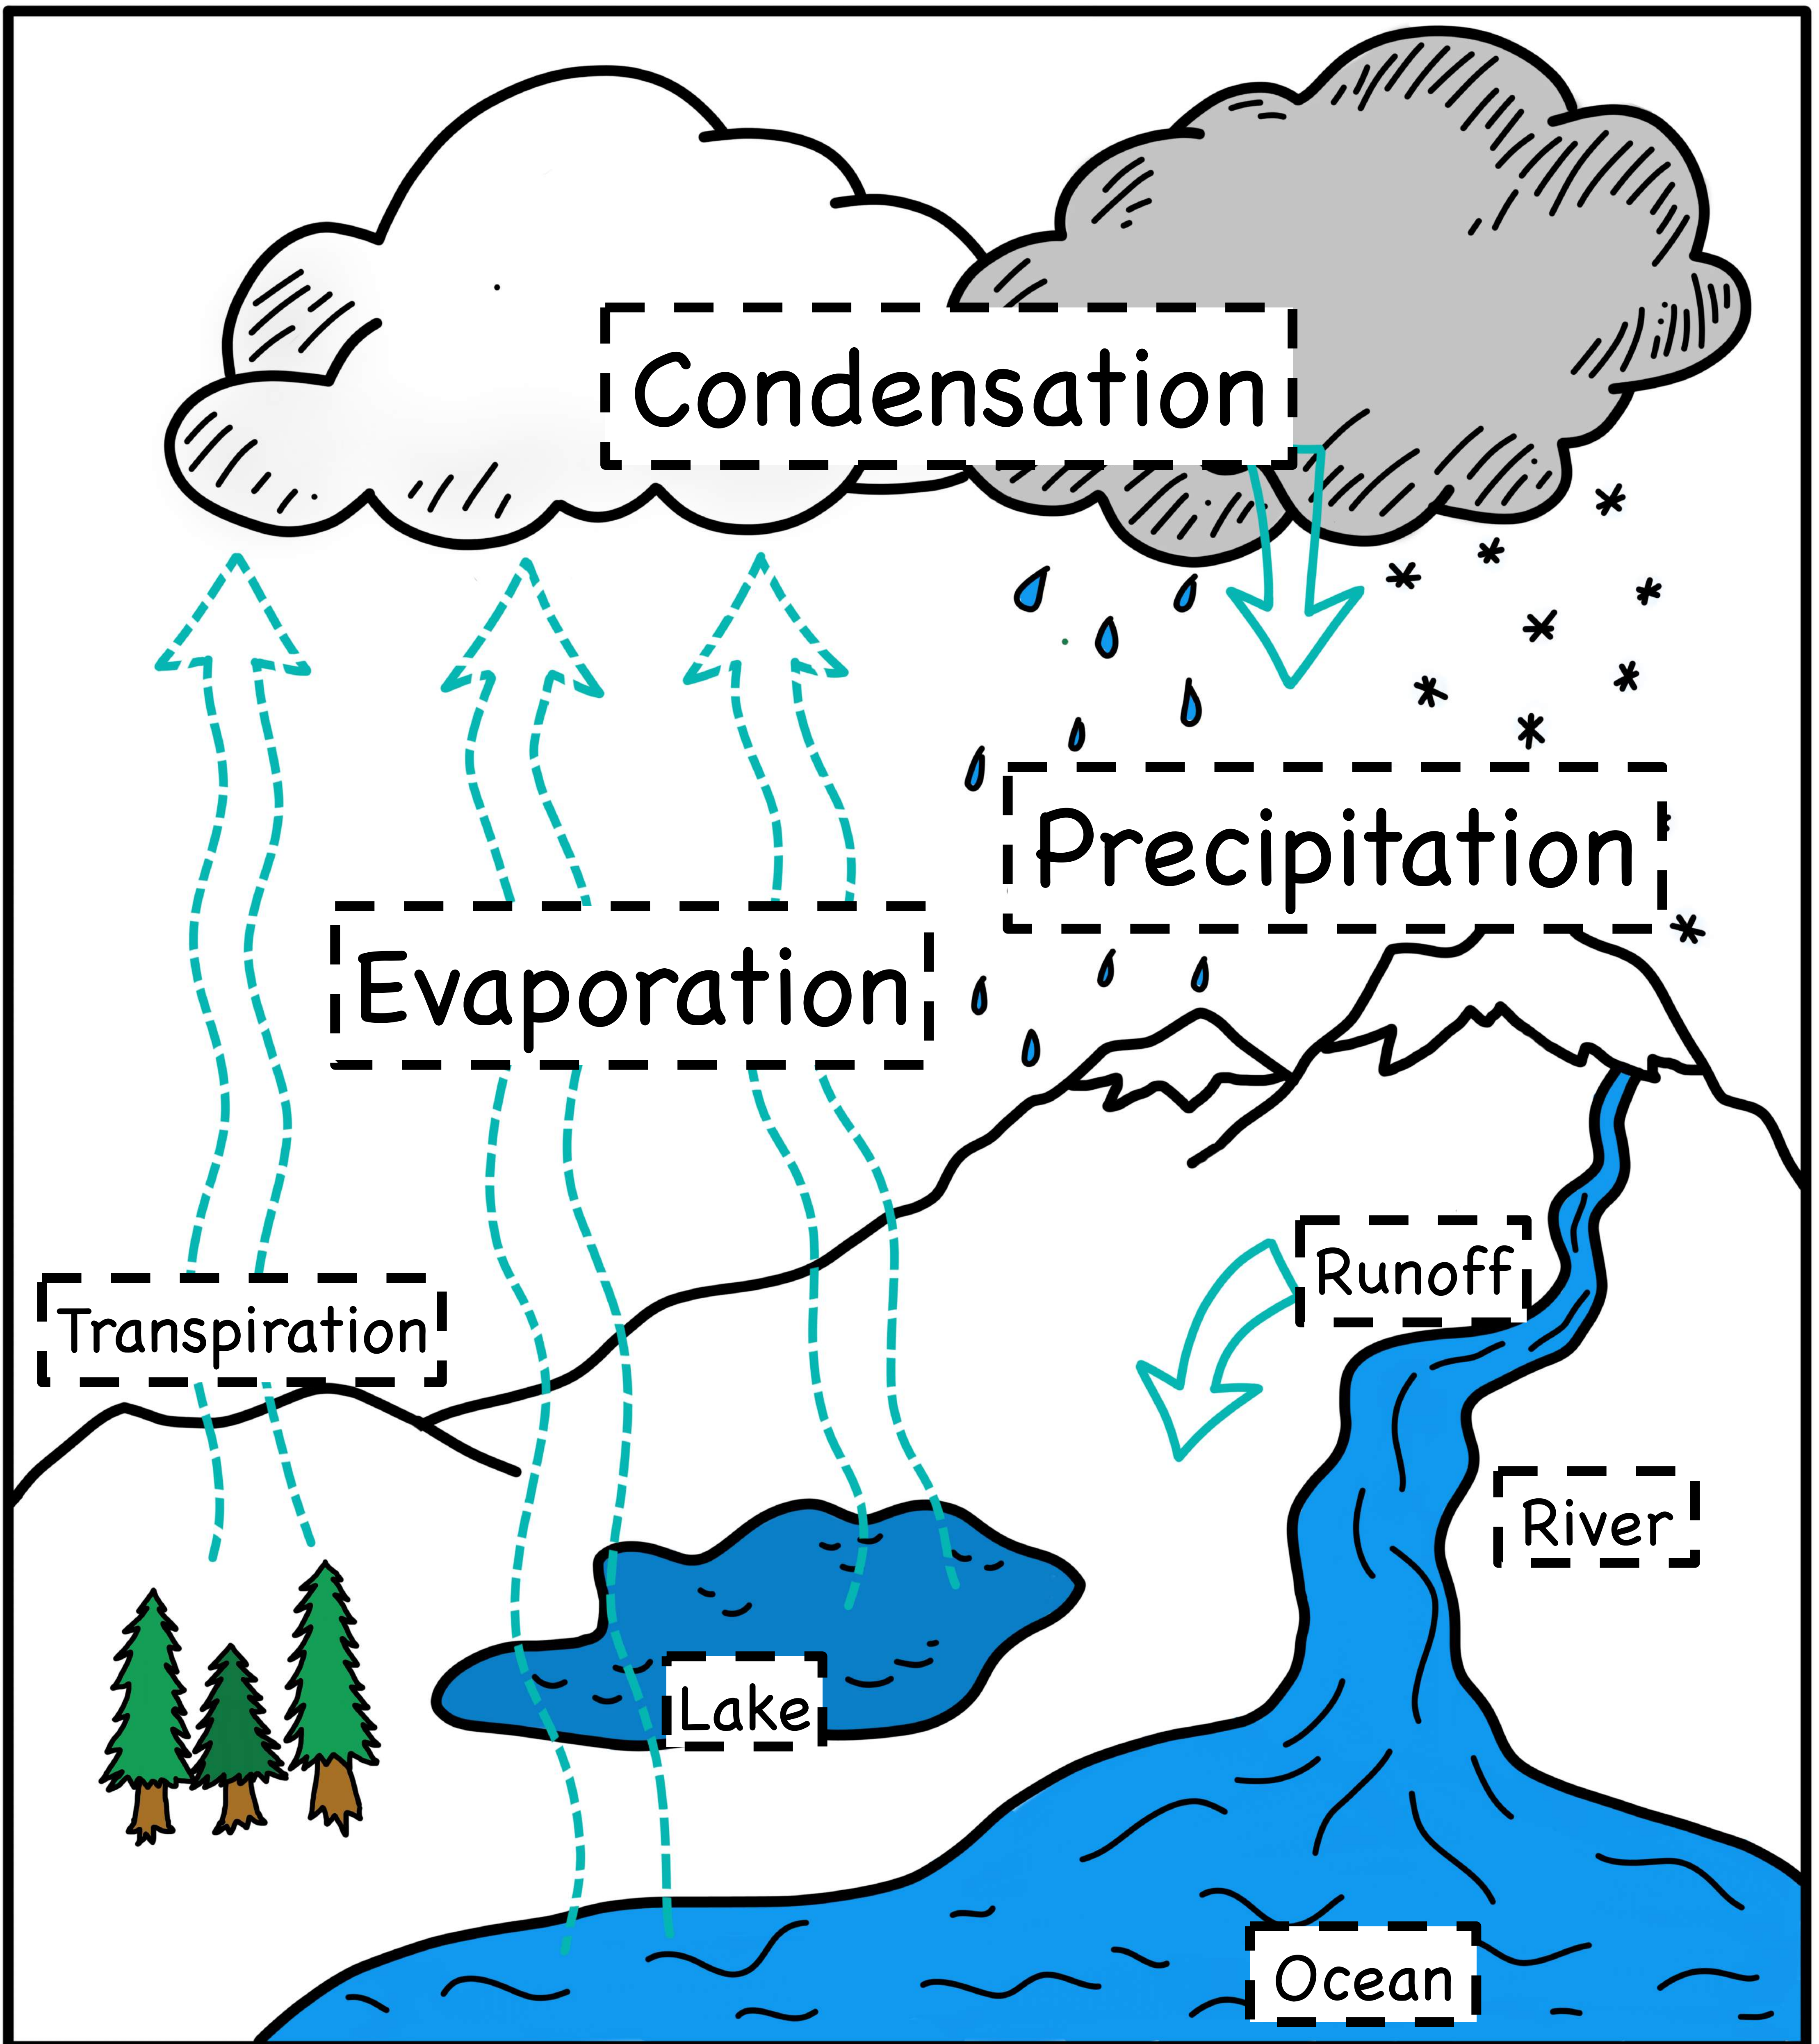

Floating

Soil Composition

Water Cycle

Watersheds

The area of land that catches rain and snow and drains into streams, rivers, lakes, groundwater, and oceans.
